Subject: [EXTERNAL] Please support clean energy (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN)

Dear Board Secretary Sherri L. Golden,

As a frequent New Jersey resident and Transit Rider I urge a key part of your Energy Master plan to include provisions for zero emissions Electric Rail. This could be powered by Solar plus stationary batteries at train stations parking lots and even along the Rail right of Way. Wind energy from Atlantic City should surely be used to power an electrified Atlantic City Rail Line.
As a New Jersey resident, I'm writing to you on Docket Number QO24020126 to urge you to ensure that the updated Energy Master Plan creates the framework for our state to meet the goal of 100% clean energy by 2035 by providing a certainty for utilities, energy suppliers, and businesses.

Climate change affects everyone regardless of zip code, so I urge you to implement a plan that greatly reduces our emissions in a way that also benefits our communities and improves people's lives.

To reach our clean energy goals and reduce emissions, New Jersey must reduce harmful pollution from the transportation sector, decrease emissions from the building sector, maximize energy efficiency, and help residents lower their energy bills.

Lastly, I urge you to think about New Jersey's most vulnerable communities who may not have access to these clean energy sources in all facets of the plan. In order to make a fair transition to clean energy, all New Jerseyans must have access to affordable clean energy.

Thank you for your time, and I look forward to New Jersey's clean energy future!

Sincerely,
Timothy Sevener
