VIA OVERNIGHT DELIVERY

Ms. Kristi Izzo
Secretary
State of New Jersey
Board of Public Utilities
44 South Clinton Avenue
9th Floor
Post Office Box 350
Trenton, New Jersey 08625-0350

Dear Secretary Izzo:

TT 13121200

    Enclosed for filing are an original and three copies of tariff pages that revise AT&T Corp. ("AT&T") Tariff B.P.U.-N.J.-No. 4.

    The following pages are included in this filing:

        Tariff B.P.U. N.J. – No. 4
            Section 5 – Page 40
            Section 7 – Page 47

    This filing updates 9-1-1 language by removing references to overflow traffic being sent to company operators. This change is being made to reflect actual business practice. AT&T does not forward overflow 9-1-1 traffic to company operators. Instead, AT&T follows the direction of the PSAPs / 911 Coordinators to either overflow calls to an alternate number in the PSAP, to an alternate PSAP, or to a busy. There are no trunks or routing that exists to overflow these calls to our operators.

    The enclosed tariff pages have an effective date of December 20, 2013.

    Acknowledgement and date of receipt of this filing are requested. A postage-paid, pre-addressed envelope is enclosed for this purpose.

LOCAL EXCHANGE SERVICES

CONSUMER SERVICE DESCRIPTIONS

5.11.   EMERGENCY NUMBER SERVICE (911 AND E911) (continued)

5.11.2. Service Description

This tariff provides for Emergency Number Service (911 Service), which is
an arrangement of Central Office and trunking facilities whereby a user
who dials the telephone number "911" will reach the emergency report
center for the telephone from which the number is dialed. The telephone   (C)
user who dials the 911 number will not be charged for the call.

Both 911 and E911 service are only available from Company switching
facilities (where available) and via Company services that are equipped to
provide and that do provide 911 or E911 service. The Company shall
provide to the PSAP only such name, address and telephone number
information as the Customer shall provide to the Company, and for any 911
or E911 call, the Company shall only pass to the PSAP such information,
including ALI and/or ANI data, as the Customer's facilities, network or
station equipment shall make properly available to the Company's network
and equipment for transmission to the PSAP.

Universal Emergency Number Service (911) is a telephone exchange
communication service whereby a Public Safety Answering Point (PSAP)
serving the Customer's location may receive telephone calls dialed to the
telephone number "911" from service users within a 911 service district.

Two types of 911 services are offered: Basic 911 (911) and Enhanced 911
Service (E911). Basic 911 Service provides for routing all 911 calls
originated by telephones having telephone numbers beginning with a given
central office prefix code or codes to a single PSAP equipped to receive
those calls. Enhanced 911 Service provides additional features, such as
selective routing of 911 calls to a specific PSAP and Automatic Number
Identification.

The 911 calling party waives the privacy afforded by non-listed and non-
published service to the extent that the telephone number, address and
name associated with the originating access line location are furnished to
the PSAP.
