Re: TM14030234

Dear Secretary Izzo:

Enclosed for filing are an original and three copies of tariff pages that revise Teleport Communications America, LLC ("TCAL") Tariff B.P.U.-N.J.-No. 5.

The following pages are included in this filing:

- Tariff B.P.U. N.J. – No. 5
- Section 3 – Page 13.1
- Section 8 – Page 1
- Section 24 – Pages 1- 9
- Section 25 – Pages 1 & 2
- Section 26 – Pages 1- 6
- Price List – Pages 2, 2.1, 9.2 – 9.6, 16.2 – 16.5, 20.1 – 20.3, 21, 37.2 – 36.6, & 46 - 53

On April 24, 2014 the Board of Public Utilities approved the Joint Petition of Teleport Communications New York ("TCNY") and Teleport Communications America ("TCAL") For Approval of an Internal Merger and Transfer of a License as Part of Internal Corporate Restructuring. This tariff filing updates the existing TCAL Local Tariff to include the services that are offered solely by TCNY. There are no changes being made to terms, rates, or conditions. Customers were informed of this change by a bill message that appeared during April and May. A copy is included as Attachment 1.

The enclosed tariff pages have an effective date of June 1, 2014.

24. MILLENNIUM ONE SERVICE * **

(C)

24.1 Description

Millennium One Centrex service provides the Customer with multiple voice-grade station lines capable of receiving and originating a call. The station line connects the Customer's Centrex-compatible customer provided station equipment to the Company's switching location. Each Millennium One line provides the following:

- Intercom capabilities between stations associated with the system.
- A 7-digit telephone number capable of receiving direct station in-dialing.
- Call transfer of incoming calls from one station to another.

Millennium One Centrex station lines located in the same central office district include the exchange access line dial tone charges. Usage packages apply as specified in the Local Calling Services Section of this Tariff.

24.2 Regulations

24.2.1 Contract Periods

Contracts for Millennium One Centrex station lines are available for periods of one (1), three (3) or five (5) years. Optional features and miscellaneous charges are not provided under contract. New Lines added after the initial contract become co-terminus with the existing system's contract.

24.2.2 Customer Termination Liability

Station Line Calculation

If applicable, customer termination liability will be calculated on the average number of station lines installed during the contract period, prior to the issuance of a final total disconnect order.

(1) Option 1 - One Year

For all systems, a termination charge equal to 100% of the applicable monthly recurring station line charges applies to the remaining months of the contract within the first twelve (12) month period.

* This service is not available to customers formerly served by Teleport Communications New York.

(N)
(N)

** Effective December 1, 2013, customers may not establish new term plans greater than 36 months for Millennium One Service, and existing term plans greater than 36 months may not be renewed or extended for a term greater than 36 months.

ISSUED: MAY 1, 2014
EFFECTIVE: JUNE 1, 2014
LINDA GUAY, DIRECTOR

24. MILLENNIUM ONE SERVICE *

(C)

24.2 Regulations (continued)

24.2.2 Customer Termination Liability (continued)

(2) Option 2 - Three Years

For all systems, a termination charge equal to 75% of the monthly recurring station line charge applies for the remaining months of the first twelve (12) month period. If the first year of the contract has been satisfied, the termination charge equals 10% of the monthly recurring charges for the next 12 month period or the remaining number of months in the contract, whichever is less.

(3) Option 3 - Five Years **

A termination charge equal to 75% of the monthly recurring station line charge applies for the remaining months of the first 12 month period. If the first year of the contract has been satisfied, the termination charge equal 10% of the monthly recurring charges for the next 12 month period or the remaining number of months in the contract, whichever is less.

24.2.3 Directory Listings

One free directory listing is provided with all Millennium One Centrex systems. A note following the main service listing may be provided without additional charge, calling attention to the fact that stations may be dialed directly if the number is unknown.

* This service is not available to customers formerly served by Teleport Communications New York.

(N)
(N)

** Effective December 1, 2013, customers may not establish new term plans greater than 36 months for Millennium One Service, and existing term plans greater than 36 months may not be renewed or extended for a term greater than 36 months.

24. MILLENNIUM ONE SERVICE *

(C)

24.3 Features

24.3.1 Standard Features

The following list of standard features is included in the basic rates for Millennium One Service. The descriptions of some of the features are found in Section 6.1 of this Tariff.

3-Way Conference	Consultation Hold
Auto Callback	Dial Call Waiting
Call Forward-Busy	Direct Inward Dialing (DID)
Call Forward-Busy Line and No Answer	Direct Outward Dialing (DOD)
Call Forward-No Answer	Directed Call Park
Call Forwarding-Variable	Directed Call Pickup
Call Hold	Distinctive Ringing
Call Park	Distinctive Call Waiting
Call Pickup	Station Line Hunting
Call Transfer	Station-to-Station Calling
Call Waiting-Originating	System Speed dialing
Call Waiting-Terminating	
Classes of Service Restrictions	

3-Way conference: A user may add a third party to any in-progress call, by switchhook emulation, and then dialing another party. By again evoking switchhook emulation, the station user joins all three parties together.

Auto Callback: Allows the user to dial an activation code when attempting an intercommunication call to a Millenium One busy line. When both lines become idle at the same time the calling station will ring. Lifting the handset will then ring the called Station.

Call forward-busy Line and No Answer: Routes Incoming Calls to another specified line of the system.

Call Waiting-Terminating: An arrangement in which an incoming call to a line in use "announced" by a short tone burst (audible only to the called party) and is automatically completed upon termination of the call, or if the in-progress call is placed on Call Hold.

Classes of Service Restrictions: Selected stations can be arranged to control originating or terminating calls to the access network.

Consultation Hold: Centrex user may hold any in-progress call for the purpose of contacting a third party, speaking discreetly, and then returning to the first party. This feature is activated by switchhook emulation.

* This service is not available to customers formerly served by Teleport Communications New York.

24. MILLENNIUM ONE SERVICE *

(C)

24.3 Features (continued)

24.3.1 Standard Features (continued)

Dial Call Waiting: This feature provides an equipped line with the ability to selectively invoke the call waiting tone on a busy station within the Millennium One Centrex system.

Directed Call Park: A user may dial a code plus extension which parks an in-progress call into the system. The call may then be retrieved from any station on the system.

Directed Call Pickup: Provides the ability for a call directed to any station to be answered by any other station user by dialing a code followed by the station line number. Only one of two arrangements, per system is permitted.

Station Line Hunting: Calls to preselected groups may be arranged that if a line is busy, the call will search to the next idle line until completion to another line in the group which is not busy.

System Speed Calling: A group controller may program 48 numbers for system. Up to 24 digits can be stored in a 2 digit code. Access to speed list may go to everyone on system.

* This service is not available to customers formerly served by Teleport Communications New York.

24. MILLENNIUM ONE SERVICE *

(C)

24.3 Features (continued)

24.3.2 Optional Features

The following list of optional features is available for Millennium One Service.

Automatic Route Selection	Meet-Me-Conference (6)
Call Forwarding-External	Meet-Me-Conference (30)
Call Transfer-External	Personal Speed Calling Short
Station Control Conference (6)	Personal Speed Calling Long
Station Control Conference (30)	Uniform Call Distribution

Automatic route Selection (ARS): Provides the most economically available route as determined by the user's preselected choice.

Call Forwarding-External: Allows a user to program incoming call to automatically route to a number outside the Centrex system.

Call Transfer-External: Allows a Centrex user to conference with two parties outside the Centrex, and then disconnect leaving external parties connected.

Meet-Me-Conference (6): A maximum of 6 callers may hold a conference by dialing an equipped Centrex directory number, from any location, at a specified time. Additional conferencing capability may be added in 4 port increments, up to 30 ports.

Personal Speed Call Short: A user may program 6 numbers for personal use. Up to 24 digits can be stored in a single digit code.

Personal Speed Call Long: A group controller may program 48 numbers for selected users. Up to 24 digits can be stored in a 2 digit code.

Station Control Conference (6): Enables any station, so equipped, to set up a conference of up to 6 conferees. Additional conferencing capability may be added in 4 port increments, up to 30 ports.

Uniform Call Distribution: Efficiently handles large volumes of incoming calls by distributing them equitably among a designated group of answering positions.

24. MILLENNIUM ONE SERVICE *

(C)

24.4 Multi-Location Service

Multi-Location Service is an optional Millennium One Centrex offering which permits the purchase of Millennium One Centrex lines outside the customer's rate center as the "home site". Calling between the "home site" and other customer Millennium One Centrex locations will be billed as intercom calls. Calls made from locations other than the "home site" will be billed as if the call originated at the home site. All other local, toll or interLATA charges are applicable.

* This service is not available to customers formerly served by Teleport Communications New York.

24.5 Millennium One-Business Set

24.5.1 Business Set Features and Business Set with Display Capability

All rates for the Business Set Package and the Business Display Set Package are in addition to the rates and charges for Millennium One. Feature availability is dependent on the type and compatibility of station equipment provided by the Customer. The package rate may include all or some of the specified features.

24.5.2 Business Set Features

The following list of Business Set features is available for Millennium One-Business Set.

Automatic Answerback	Last Number Redial
Automatic Dial Line	Query Busy Station
Automatic Line	Terminating Line Select
Group Intercom	

Automatic Answerback: Provides activation of hands free unit in response to an incoming call.

Automatic Dial Line: Permits to storage and key activation of a telephone number. User changeable.

Automatic Line: Automatic ring to a predetermined number.

Group Intercom: Permits station to station dialing between business sets on a separate key.

Last Number Redial: Enables user to redial last number by depressing a single key.

Query Busy Station: Accessing the key show line status of a predetermined station. User is tone alerted when the station becomes idle.

Terminating Line select: Permits auto answer to a line ringing on set with multiple line appearances.

* This service is not available to customers formerly served by Teleport Communications New York.

24.5 Millennium One-Business Set (continued)

24.5.3 Display Features

The following list of display features is available for Millennium One-Business Set.

Call Forward Display	Feature Display
Display Called Number	Feature Recall Identification
Display Calling Number	Station Message Waiting

Call Forward Display: Displays both the number programmed to call forward and the auto dial features.

Display Called Number: Provides the user with visual feedback concerning the called number during the origination, termination, programming and feature-activation operations.

Display Calling Number: When an incoming intra-Centrex call is received, this feature provides the user with visual feedback conferring the Centrex station number.

Feature Display: For the user of a business set equipped with the 32-character display, provides a visual display of user entered data and intra-Centrex user group incoming call information during the use of other Centrex features.

Feature Recall Identification: Alphanumeric message provides reason for return of feature activated call.

Station Message Waiting: Provides visual indication that a message waits at the message center (usually voice mail). Accessing the key will retrieve the message(s) and extinguish the indication.

* This service is not available to customers formerly served by Teleport Communications New York.

24.5 Millennium One-Business Set (continued)

24.5.4 Optional Features

The following list of optional features is available for Millennium One-Business Set.

Multiple Appearance Directory Number (MADN)

- Multiple Call Arrangement
- Single Call Arrangement

Secondary Millennium One Line

Multiple Appearance Directory Number-Multiple Call Arrangement: permits appearance of a single line number on up to 32 different business sets. Each line appearance has its own call path. Once an incoming call is taken at a station, the remaining appearances can take additional calls to the same number.

Multiple Appearance Directory Number-Single Call Arrangement: Permits appearance of a line on up to 32 different business sets. Only one set at a time may be active on the line at one time.

Secondary Millennium One Line: Secondary appearance of primary directory number on a business set.

25. INBOUND SERVICE *

(C)

25.1 Description

Inbound Service provides trunk connections between an end user's data communications equipment collocated at a Company facility and a Company switch port. Inbound Service is available as a DS1 (1544 Mbps) in multiples of 24 DS0 equivalent parts and is available for commitment periods of 3 years or longer. The service will support a maximum of four rate centers per facility within the Company designated service area. All other Arrangements will be considered on an Individual case Basis.

25.2 Regulations

25.2.1 Minimum Service Period

Contracts for High Usage Inbound Service are available for periods of three (3) years or longer. After the initial contract period, the customer may elect to renew the existing term agreement, at tariffed pricing, select another term agreement, or elect a month-to-month option, at month-to-month tariffed pricing. If the month-to-month option is selected, the Customer must provide the Company with 90 days written notice prior to the discontinuance of service. New facilities added after the initial contract become co-terminous with the existing Inbound Service's contract.

25.2.2 Termination Liability

For all contracts, a termination charge equal to 100% of the monthly recurring path charge applies for the remaining months of the first twelve (12) month period. If the first year of the contract has been satisfied, the termination equals 75% of the monthly recurring charge for the next 12 month period or the remaining number of months in the contract, whichever is less.

* This service is not available to customers formerly served by Teleport Communications New York.

(N)

ISSUED: MAY 1, 2014
EFFECTIVE: JUNE 1, 2014
LINDA GUAY, DIRECTOR

25. INBOUND SERVICE *

(C)

25.2 Regulations (continued)

25.2.3 Service Standards

The Customer is responsible for all communications over the facilities furnished by the Company, thus the Company is not liable for interruptions, errors or call completion problems which result due to traffic volumes which exceed industry standards for the applicable facilities.

Per subscribed facility, the Customer is required to subscribe to a sufficient number of trunks so as to not degrade the network below an incoming call completion rate of 99%. The call completion rate is based on an average of the busy hours occurring during the Customer's busiest hours during the billing cycle. Once the service has been established, the Company may require the Customer to increase the number of trunks to satisfy the call completion criteria listed above.

25.3 Rates and Charges

See the Price List.

26. LOCAL EXCHANGE ACCESS SERVICE *

(C)

26.1 Introduction

Local Exchange Access service provides a Customer with a connection to the Company's Switching node, which offers the Customer the following:

- A unique telephone number or group of telephone numbers;
- Access to the public switched network, including:
 - a) The ability to receive calls from other stations on the public switched network;
 - b) Company's exchange and switched calling;
 - c) Interexchange calling provided by interexchange carriers presubscribed to the Company's switch, such as 700, 800/888, 900/976 and long distance;
 - d) operator services;
 - e) directory assistance;
 - f) emergency services, including 911;
 - g) telecommunications relay services.

Customers subscribing to Company's Local Exchange Access Service will be provided with 1+, 0+, 0-, and 10XXX dialing capabilities where available.

The Company offers Customers a one-time, no charge option to block access to services offered under the 900/976 service access code at the time of installation. After the initial installation, a tariff charge will apply.

Each Company Local Exchange Access Service includes a primary directory listing in telephone directory(s) published by the dominant local exchange carrier serving Customer's location, unless another arrangement is requested by the Customer. The listed number will be Customer's main Billing number.

On a annual basis, a Customer of the Company's Local Exchange Access Service will receive, at no charge, one copy of the directory(s), listing all telephone service subscribers (except for unlisted and unpublished numbers) within the Customer's local area.

* This service is not available to customers formerly served by Teleport Communications New York.

26. LOCAL EXCHANGE ACCESS SERVICE *

(C)

26.2 Local Exchange Access Line Service

26.2.1 Description

Local Exchange Access Line Service provides a Customer with voice-grade telephone communications channels which can be used to place or receive a call. Local Exchange Access Lines provide for connection of Customer-provided single-line terminal equipment, key systems, and/or facsimile machines to Company's switching node.

Company Local Exchange Access Line Service will be provisioned on an on-net or Off-net basis.

1. ON-NET service is provided at locations in which Company has installed facilities and has access to Customer's location. Service will be provided based on availability of Company facilities.
2. OFF-NET service utilizes unbundled loop services or resold services provided by other local exchange carriers. Service will be provided based upon the cost effective availability or interconnection arrangements, unbundled loops and/or resold facilities.

26.2.2 Line Characteristics

Terminal Interface:	2 - wire
Signaling Type:	Loop Start
Pulse Type:	Dual Tone Multifrequency (DTMF)
Directionality:	Two-Way, In-Only, or Out-Only, at the option of the Customer

26.2.3 Rates and Charges

(C)

26.3 Local Exchange Access Trunk Service

26.3.1 Description

Trunks are provided for connection of Customer-provided public Branch Exchange (PBX), key systems, and/or other terminal equipment to the Company's switching node. A trunk is delivered at a DS0 level or at the DS1 level. All trunks can be equipped with multiline hunting.

Direct Inward Dial (DID) trunks are one-way inbound trunks with outpulsing capability.

Exchange Access Trunk Service will be provisioned on an on-net and off-net basis.

26.3.2 DS0 Local Exchange Access Trunk Service

Exchange Access Trunk Service provides the Customer with a single voice-grade telephonic communications channel which can be used to place or receive one call at a time.

26.3.3 Trunk Characteristics

Terminal Interface: 2-wire or 4-wire, as required for the provision of service.

Signaling Type: Loop, Ground, E&M

Pulse Type: Dual Tone Multi-Frequency (DTMF)

Directionality: Provisioned as two-way by the Company but can be used by the Customer at two-way, Inbound only or outbound only.

26.3.4 Digital Interface Characteristics

Refer to Digital Local Exchange Access Digital Interface Service.

(C)

26.4 DS1 Local Exchange Access Digital Interface Service

26.4.1 Description

Digital Exchange Access Digital Interface Service provides a Customer with a connection to the Company's switching node via a DS1 digital facility operating at 1.544 Mbps. Digital Trunk Service is available as a DS1 connection.

The Customer may opt to utilize Digital Exchange Access Trunk Service for outgoing calls only, incoming calls only or both outgoing and incoming calls. In the latter case, DID numbers must be purchased from the Company. Refer to section 5.6.1. These numbers can only be associated with a single rate center, and that is the rate center where the service is terminated. Calls from Multiple rate centers delivered over the same DID Digital Interface is available for an additional charge per rate center.

26.4.2 Digital Trunk Characteristics

Terminal Interface:	DSX-1 panel
Signaling Type:	Loop, Ground, E&M, Wink Start for DID
Pulse Type:	Dual Tone Multi-Frequency (DTMF)
Directionality:	Two-Way, In-Only or Out-Only as specified by the customer.

26.5 Features

26.5.1 Standard Features

The following list of standard features is included in the basic rates for Local Exchange Access Service. The descriptions of some of the features are found in Section 6.1 of this Tariff.

900, 976 and 700 Blocking	Main Number Retention
Accounting Codes	Multi-Line Hunting
Analog Interface	Remote Call Forwarding
Blocking Service	Vanity Number Service
Direct Inward Dial (DID)	

900, 976 and 700 Blocking: Allows the subscriber to block calls beginning with the above prefixes from being placed. This is not applicable to specific line number.

Accounting Codes: Provides Customers with a means of restricting calls or itemizing calls according to specific digits that must be dialed before the call is completed. The length of the Accounting Codes may vary up to 12 digits. Packages of codes offered are either verified against a specific list of valid numbers, for call restriction or are unverified package of codes.

Analog Interface:

Terminal Interface	2 Wire
Signal Type	Loop/Reverse Battery Wink Start
Pulse Type	Touch Tone
Directionality	One-Way Inbound to the Customer

Main Number Retention: A new Customer who was formally a Customer of another certified local exchange carrier at the same premises may retain the main telephone numbers and main fax numbers for use with the Company's exchange access services. This feature is available at the discretion of the Company

Multi-Line Hunting: A one-time charge will apply for the establishment of multi-line hunting.

* This service is not available to customers formerly served by Teleport Communications New York.

26. LOCAL EXCHANGE ACCESS SERVICE *

(C)

26.5 Features (continued)

26.5.1 Standard Features (continued)

Remote Call Forwarding: This feature utilizes a telephone number and electronic switching facilities to automatically forward all incoming calls to a Company assigned RFC telephone number certified by a local exchange carrier. All other access, local and toll rates and charges for all services ordered by the Customer will apply. This feature is offered where facilities permit. Transmission may not be satisfactory on all calls. This feature is not suitable for transmission of data. The Customer must subscribe to sufficient RCF paths and terminating facilities to adequately handle calls to the RCF Customer without interfering with or impairing any other services offered by the Company.

Toll Restriction: Blocks any Customer dialed calls that are to locations outside of the LATA. This is not applicable to a specific line number.

Vanity Number Service: A new Customer may request a specific or unique telephone number and/or fax number for use with the Company's Local Exchange Access Service. This service provides for assignment of a Customer requested telephone number other than the next available for assignment.

26.5.2 Rates and Charges
