RE: Comcast Business Communications, LLC
BPU NJ Access Tariff No. 2

Enclosed please find an original and five (5) copies of revisions to Comcast Business Communications, LLC Tariff BPU N.J. No. 2. The revisions are scheduled to become effective on July 1, 2014.

The purpose of this filing is to comply with the FCC's revised rules as set forth in FCC 12-47 directing LECs to adjust their intrastate originating switched access rates to mirror their interstate rates effective July 1, 2014. Further, the Company is replacing its tariffed intrastate switched access rates with a reference to the Company's interstate switched access rates as found in Comcast Phone, LLC, Tariff FCC No. 1. The net result of these changes is the billing of intrastate originating and terminating VoIP-PSTN access usage at interstate rates as set forth in FCC 11-161.

Please date stamp the attached duplicate transmittal letter and return it in the enclosed self-addressed, stamped envelope. If you require any additional information regarding this filing, please contact me on 720- 267-3224 or at David_Lloyd@cable.comcast.com.

Yours truly,

David M. Lloyd
Director - Tariffs

3. SWITCHED ACCESS SERVICE

3.3. SWITCHED ACCESS RATE CATEGORIES

3.3.2. TANDEM TRANSPORT

(C)

The Tandem Transport rate category provides for the transmission between an access tandem and the Company's End Office, Trunk Gateway or functionally equivalent location. Rate elements include:

A. Transport Termination

The Transport Termination element includes the non-distance sensitive portion of Tandem Transport and is assessed on a per-access-minute-of-use basis.

B. Transport Mileage

The Transport Mileage element includes the distance sensitive portion of Tandem Transport and is assessed on a per-access-minute-of-use-per-mile basis. Transport mileage will be calculated based on the airline mileage between the access tandem (or functional equivalent) and the Company's End Office, Trunk Gateway or functionally equivalent location within the applicable LATA.

Issued: May 30, 2014

3. SWITCHED ACCESS SERVICE

3.3.3. NETWORK ACCESS

(C)

Network Access provides the functional equivalent of traditional end office switching. It consists of the following elements: Network Switching and Common Trunk Port.

A. Network Switching

Network Switching provides for: (a) the establishment of a call path for the routing of Customer communications from the Company's End Office, Trunk Gateway, or functionally equivalent location to a Company End User and (b) the establishment of a call path for the routing of communications originating from a Company End User for delivery to the Company's End Office, Trunk Gateway, or functionally equivalent location.

The "establishment" of call path and routing is achieved through equipment and facilities, including, in some cases, a soft switch or similar equipment, owned, or controlled through contractual or other arrangements, by the Company, which allows for the routing of voice communications between the Company's End Office, Trunk Gateway, or functionally equivalent location and End Users via SS7 signaling based on telephone numbers obtained by the Company and assigned to End Users as set forth in the LERG.

B. Common Trunk Port

Provides for the termination of tandem transport trunks in shared ports at the Company's End Office, Trunk Gateway, or functionally equivalent location. The Common Trunk Port rate is assessed on a per-MOU basis to all trunkside originating and terminating access minutes routed to the Company via a third-party access tandem.
