Re: In the Matter of the Petition of Public Service Electric and Gas Company
For Approval of the Second Energy Strong Program (Energy Strong II)
BPU Docket Nos.: EO18060629 and GO18060630

Dear Secretary Camacho-Welch:

Federal Business Centers is aware that PSE&G has submitted a plan to invest over \$2.5 billion over the next five years into the regions energy utility infrastructure. The proposed program known as Energy Strong II will expand upon recent improvements so as to provide greater resiliency and reliability in the regions electric and natural gas utility services.

Federal Business Centers is heavily reliant on PSE&G for its electric and natural gas services. As the landlord for over 180 businesses in Raritan Center® in Edison, our customers expect continuous power for their business success.

The continuation of the Energy Strong program which has already made vast improvements to harden the region against the increasing threats of extreme storms and rising sea levels, is vital to the port. As we all experienced in the aftermath of Superstorm Sandy and in subsequent severe storms, the strengthening and hardening our regions utility infrastructure must remain a high priority.

Federal Business Centers is fully supportive of PSE&G's proposed plan to continue its investment in our regions infrastructure.

If you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

Peter Visceglia
President
