Re: In the Matter of The Petition Of New Jersey Natural Gas Company for Approval of
Base Rate Adjustment Pursuant to the NJ RISE and SAFE II Programs
BPU Docket No. GR20030279

Dear Secretary Camacho-Welch:

Enclosed please find revised updated Schedules RD-1, RD-2, and RD-4 of New Jersey Natural Gas Company (NJNG) for Approval of a Base Rate Adjustment Pursuant to its NJ RISE and SAFE II Programs.

Due to a file conversion error, the GSS and GSL billing determinants did not recalculate appropriately. Please note that the only change is a decrease of \$0.01 to the GSL customer charge. For your convenience, while only a few tariff pages were affected, NJNG is providing a complete tariff incorporating these changes.

Copies are also being served upon the New Jersey Division of Rate Counsel and the Division of Law.

Kindly acknowledge receipt of this filing via return email.

Respectfully submitted,

A handwritten signature in blue ink that reads 'Andrew K. Dembia'.

Andrew K Dembia, Esq.
Regulatory Affairs Counsel

SPECIAL PROVISIONS

I. Applicable to All Customers in this Service Classification

1. Determination of Demand

The highest monthly average daily usage (HMAD) that occurs in any billing period will be used to calculate the Demand Charge. CONSERVATION INCENTIVE PROGRAM – CIP (continued)

7. **Customer Class Group** – For purposes of determining and applying the CIP, customers shall be aggregated into four separate recovery class groups. The Customer Class Groups shall be as follows:

- Group I: RS (non-heating customers only)
- Group II: RS (heating customers only)
- Group III: GSS, ED using less than 5,000 therms annually
- Group IV: GSL, ED using 5,000 therms or greater annually

8. **Forecast Annual Usage** – the Forecast Annual Usage (“FAU”) shall be the projected total annual throughput for all customers within the applicable Customer Class Group. The FAU shall be estimated based on normal weather.

9. **Incremental Large Customer Count Adjustment** – the Company shall maintain a list of incremental commercial and industrial customers added to its system on or after September 1, 2019 whose connected load is greater than that typical for the Company’s average commercial and industrial customer. For purposes of the CIP, large incremental customers shall be those customers whose connected load exceeds 5,500 cubic feet per hour (“CFH”). A new customer at an existing location previously connected to NJNG’s facilities shall not be considered an incremental customer. The Actual Number of Customers for the Customer Class Group shall be adjusted to reflect the impact of all such incremental commercial or industrial customers. Specifically, the Incremental Large Customer Count Adjustment for the applicable month shall equal the aggregate connected load for all active customers that exceed the 5,500 CFH threshold divided by 2,750 CFH less the number of active customers, rounded to the nearest whole number.

10. **Margin Revenue Factor** – the Margin Revenue Factor (“MRF”) shall be the weighted-average margin rate as quoted in the individual service classes to which the CIP applies. The MRFs by Customer Class Group are as follows:

Group I (RS non-heating):	<u>\$0.45990.4690</u>
Group II (RS heating):	<u>\$0.45990.4690</u>
Group III (GSS, ED using less than 5,000 therms annually)	<u>\$0.40570.4153</u>
Group IV (GSL, ED using 5,000 therms or greater annually)	<u>\$0.27070.2711</u>

The MRF shall be reset each time new base rates are placed into effect.
