

PSEG Nuclear, LLC
ZEC 2 – Salem II
Docket No: ER20080558

Response to Discovery Request: SII-SSA-0005
Date: 10/1/2020

Question:

Comparison of the expected benefits of a Fixed Resource Requirement scenario with the expected benefits of ZECs.

Attachments Provided Herewith: NO

Response:

A Fixed Resource Requirement can be structured in many different ways. Without knowing the details of the particular Fixed Resource Requirement scenario, it is not possible to determine the expected benefits of a Fixed Resource Requirement. However, the FRR is an alternative for capacity revenues, not an alternative for the ZEC as it is currently structured.
