Atlantic Shores' proposed pilot will be testing hydrogen blending, an application that can help other New Jersey traditional industries to reduce greenhouse gas emissions. Additionally, this pilot would generate data specific to the US market and increase awareness on hydrogen usage, while supporting New Jersey in its longer-term energy system green transition agenda. Finally, this pilot project will give Atlantic Shores opportunities to explore different market applications and to track local regulations, market conditions and customer needs.

In summary, Atlantic Shores' overall position on foundation supply from New Jersey remains clear and simple: Atlantic Shores guarantees 100% of the significant local content commitments

brought forward in Section 8.3 (page 163/437) of our Application, and if unable to deliver fully, Atlantic Shores is committed to the payment of our proposed penalties to make up the shortfall.
