RE: In the Matter of the Letter Petition of Atlantic City Electric Company for a Waiver of the Requirements of N.J.A.C. 14:1-5.6 and for Approval Pursuant to N.J.A.C. 14:1-1.2 of the Sale of Certain Utility Assets to Lund's Fisheries, Inc.
BPU Docket No. _____

Dear Acting Secretary Diaz:

ATLANTIC CITY ELECTRIC COMPANY (hereinafter referred to as "Petitioner," "ACE" or the "Company"), a public utility corporation of the State of New Jersey, respectfully requests that the New Jersey Board of Public Utilities (the "Board" or "BPU") accept this Letter Petition (the "Petition") in lieu of a more formally styled filing, seeking the Board's authorization pursuant to N.J.A.C. 14:1-1.2 to waive the requirements of N.J.A.C. 14:1-5.6 and approve the sale of certain of the Company's utility assets to Lund's Fisheries, Inc. ("Lund's").

BACKGROUND

By way of background, Lund's is a commercial fishing and processing operation located in Cape May, New Jersey, with fishing operations along both the Atlantic and Pacific coasts. It has been in business for 63 years, operating 17 commercial fishing vessels and employing more

than 110 employees. It is one of the nation's leading wholesale providers of fresh and sustainable seafood products in the United States. See Lund's website at www.lundsfish.com for more information on the Lund's business operations. Lund's has been a commercial class customer of ACE since April 1998, and currently receives electric distribution service pursuant to the Company's AGS-SECOND and MGS-SECOND tariffs. ACE currently receives approximately \$630,000 in annual revenue from Lund's operations in Cape May.

Several years ago, Lund's approached the Company and requested an analysis of what would be required to change its class of service from Secondary electric distribution service to Primary electric distribution service under the Company's AGS-PRIMARY tariff. After a review of the technical requirements associated with such a tariff modification, Lund's was advised that it could make the requested tariff change by either (i) acquiring the Company's three ABB 2000KVA/480v pad mounted transformers, along with ancillary poles and equipment (the "Assets"), which are currently located on Lund's property or (ii) independently purchasing and installing similar equipment from a third-party supplier.

The Company has estimated that, if Lund's should purchase similar Assets from a third-party supplier to modify its tariff classification from Secondary to Primary, the cost to do so would be approximately \$148,000.00, comprised of approximately \$78,000.00 in installment costs and \$70,000.00 for the purchase of the equipment. Should Lund's choose to independently acquire utility facilities similar to the Assets, and therefore be eligible to change its tariff classification to AGS-PRIMARY, it would realize an annual savings in ACE distribution costs of approximately \$73,000.00. In that case, ACE would have to remove and retire the Assets currently in place that serve Lund's Secondary distribution service without realizing any further value for them. The value of the Assets on the Company's books is approximately \$70,108.00.

Based upon discussions between ACE and Lund's, it was determined that it would be in both party's interests for ACE to convey its interests in the Assets to Lund's. By so doing, Petitioner's customers would be compensated for the Assets currently serving Lund's. Attached as **Exhibit A** is an Equipment Agreement ("EA") dated as of April 26, 2022, pursuant to which ACE has agreed, subject to the regulatory approval provision contained in paragraph 5.3 of the AE, to transfer the Assets to Lund's for a purchase price of \$70,108.00

BASIS FOR REQUESTED RELIEF

N.J.A.C. 14:1-5.6 sets forth generally the criteria upon which a utility, such as ACE, may petition the Board for approval of the sale of utility property. N.J.A.C. 14:1-5.6 (d) exempts from specific Board approval certain sales where either (a) the sale of an asset is deemed to be in the "ordinary course of business" or (b) the sale price is less than \$100,000.00 and the assets are "no longer used by or useful to the utility." Petitioner is not alleging in the instant matter that either of these criteria is applicable. Rather, Petitioner is requesting that the Board exercise its authority pursuant to N.J.A.C 14:1-1.2 (b). This regulation states that, "for good cause shown, the Board may...relax or permit deviations from these rules" referring to the Board's Rules contained in N.J.A.C. Title 14. For the reasons set forth herein, the Board should grant a waiver of the requirements of N.J.A.C. 14:1-5.6 et seq. Petitioner asserts that good cause is shown to support such a waiver.

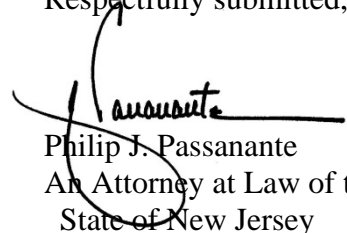

Lund's has been a good and reliable customer of the Company. As the Board is aware, the economic environment for small businesses, especially coming out of the COVID-19 pandemic, has been challenging. Like most small businesses, Lund's continually reviews all opportunities available to it to reduce its costs of doing business to maintain the high level of service that its customers and community have come to expect. With respect to its electric service requirements,

it has been determined that Lund's can benefit by transferring its AGS-SECOND and MSG-SECOND services to a primary metering point and take service from ACE under its AGS-PRIMARY service classification. This transfer is something that Lund's can accomplish unilaterally by acquiring and installing the utility equipment similar to the Assets from a third-party supplier. Should Lund's decide to pursue that option, ACE's customers would be adversely affected in that they would not receive any value for the Assets currently in place to serve Lund's. The Assets would be deemed to no longer be used and useful to ACE and would permanently be retired on the Company's books. Alternatively, the Board's approval of a waiver of its regulations governing the sale of utility assets and its authorization for ACE to complete the transaction proposed in the EA, would benefit the Petitioner's other ratepayers by providing a credit to them equal to the sale price in the Company's next base rate case.

CONCLUSION AND RELIEF REQUESTED

For the reasons set forth herein, the Company respectfully requests that the Board, pursuant to its authority under N.J.A.C. 14:1-1.2, waive the requirements for the sale of utility personal property under N.J.A.C. 14:1-5.6, and permit the Company to transfer the Assets to Lund's under the terms and conditions of the EA, and for such other and further relief as the Board shall deem just and reasonable.

Respectfully submitted,

Philip J. Passanante
An Attorney at Law of the
State of New Jersey

Enclosure

cc: Service List

Exhibit A

EQUIPMENT AGREEMENT

April 26 *AM*

2022
8 This EQUIPMENT AGREEMENT ("Equipment Agreement") is entered into as of ~~March~~, 2021 between Atlantic City Electric Company ("ACE"), a corporation organized under the laws of the State of New Jersey with an office at 5100 Harding Highway, Mays Landing, New Jersey 08330, and Lund's Fisheries Inc ("Lund's"), a New Jersey corporation with an office at 997 Ocean Drive, Cape May, New Jersey 08204.

WHEREAS, ACE presently owns certain equipment, including pad-mounted transformers and underground cables as listed in Exhibit A, attached and incorporated by reference herein and located at 997 Ocean Drive, Cape May, New Jersey 08204 ("Equipment") through which ACE provides electric service to Lund's;

WHEREAS, Lund's requested a conversion from secondary voltage metering to primary metering to take advantage of AGS rate schedules. The plan for this conversion was to sell three (3) existing transformers that currently feed the site of the Equipment to Lund's to minimize outage impact and facilitate more seamless transition. After this metering conversion, Lund's will own and maintain the facilities downstream of the metering point including these three (3) transformers.

WHEREAS, Lund's is interested in taking ownership of the Equipment through which ACE provides electric service to Lund's; and

WHEREAS, ACE desires to sell the Equipment to Lund's and Lund's desires to purchase the Equipment from ACE.

NOW THEREFORE, in consideration of these premises and the mutual promises set forth herein, ACE and Lund's ("Parties," or individually "Party"), each intending to be legally bound, hereby agree to the following:

ARTICLE I EQUIPMENT TO BE SOLD AND PURCHASED

1.1 ACE agrees to sell the Equipment set forth in Exhibit A to Lund's and Lund's agrees to purchase the Equipment subject to the terms and conditions set forth herein and in Exhibit B.

1.2 The negotiated sale price shall be \$70,108.00 and this will be paid at execution of this Equipment Agreement.

1.3 Upon execution of this Equipment Agreement, title will transfer to the Equipment and Lund's will own and maintain all of the Equipment.

1.4 Lund's agrees as of the execution of this Equipment Agreement to assume all liability associated with the Equipment, except to the extent provided in Article 3.2.

ARTICLE II

EXCLUSION OF WARRANTIES

2.1 LUND'S AGREES THAT IT IS TAKING THE EQUIPMENT "AS IS", "WHERE IS" AND "WITH ALL FAULTS." ACE MAKES NO REPRESENTATIONS, COVENANTS OR WARRANTIES OF ANY NATURE AS TO THE CONDITION OF OR THE CONTINUED SERVICEABILITY OF THE EQUIPMENT AND LUND'S, ITS SUCCESSORS AND ASSIGNS, ACCEPT ALL RISKS CONNECTED WITH THE OWNERSHIP AND USE OF SAID EQUIPMENT. THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, ARE EXCLUDED FROM THIS TRANSACTION AND SHALL NOT APPLY TO THE EQUIPMENT SOLD.

2.2 ACE warrants that as of the day of execution of this Equipment Agreement, it will be transferring title of the Equipment to Lund's free and clear of any third party liens, encumbrances, unpaid fees, and that, as of the date of the execution of this Equipment Agreement, it is aware of no third party liens, claims, or encumbrances of any kind against the Equipment. Subject to the limitations set forth in Article 4 below, ACE agrees to indemnify, defend and hold Lund's harmless against any such claims, liens or encumbrances.

2.3 Lund's warrants that it has the authority to purchase the Equipment. ACE warrants that it has full corporate authority to sell the Equipment.

ARTICLE III

LIABILITY

3.1 Lund's Liability. As of the date of execution of this Equipment Agreement, Lund's hereby assumes all risk of liability for any and all injury to persons, including death, and damage to property with respect to the design, installation, operation, maintenance, or other activities associated Lund's ownership. Operation, and maintenance of the Equipment after the date of this Agreement.

3.2 LIMITATION ON LIABILITY. IN NO EVENT SHALL EITHER ACE OR LUND'S BE LIABLE TO THE OTHER OR ANY OTHER PERSON OR ENTITY FOR ANY CONSEQUENTIAL, INDIRECT, INCIDENTAL OR SPECIAL DAMAGES UNDER ANY CAUSE OF ACTION ARISING OUT OF OR RELATED TO THIS EQUIPMENT AGREEMENT FOR LOSS OF USE OF FACILITIES, BUSINESS INTERRUPTION, LOSS OF BUSINESS, PROFITS OR INFORMATION OR OTHER ECONOMIC LOSS.

ARTICLE IV **INDEMNIFICATION**

4.1 On and after execution of this Equipment Agreement, Lund's agrees to be solely responsible for, and shall indemnify, hold harmless, and defend ACE, and each and every one of ACE's parents, affiliates, officers, agents, servants, employees, independent contractors, successors and assigns from and against any causes of action, claims, suits, actions, liabilities (including environmental liability), response costs, natural resource damages, pollution, penalty, fine, losses, damages, and judgments (a "Claim"), to the extent caused by Lund's, its officers, agents, servants, employees, successors, or assigns, or by a third party, as well as against any fees, including counsel fees, charges, or expenses which ACE, its parents, affiliates, officers, agents, servants, employees, successors, and assigns may incur in the defense of any such claim, suits, actions or similar such demands in any manner directly or indirectly arising from, connected with, or growing out of any activities under or connected with this Equipment Agreement or the Equipment, irrespective of whether the cause of action arises as a result of activities prior to or after execution of this Equipment Agreement; provided, however, that such indemnification shall not apply to the extent that the Claim is proven to be directly the result of gross negligence or intentional harm occurring after the execution of this Equipment Agreement by ACE, its parents, affiliates, officers, agents, servants, employees, successors, or assigns, and provided further that this indemnification shall not be in effect with respect to a breach of contract Claim brought by Lund's, or a breach of warranty under Article 2.2.

4.2 ACE shall not be responsible to Lund's in tort (including negligence and strict liability), contract or otherwise for any loss, cost, or damage of any kind that may result from or be caused by interruptions in service as a result of any failures of the Equipment.

ARTICLE V **MISCELLANEOUS**

5.1 Governing Law and Jurisdiction. This Equipment Agreement is to be interpreted and enforced under New Jersey law (without regard to the choice of law provisions thereof), and any dispute involving this Equipment Agreement shall be heard in a court of competent jurisdiction in New Jersey.

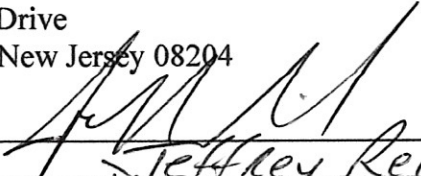

5.2 Compliance with Governmental Requirements. Each party agrees to comply with all applicable laws and regulations of governmental bodies having jurisdiction over the subject matter of this Equipment Agreement.

5.3 Regulatory Approval; Cooperation Before Regulatory Authorities. Each Party agrees and understands that this Equipment Agreement requires the approval of the New Jersey Board of Public Utilities ("BPU"). ACE agrees that, upon execution hereof by Lund's, ACE shall file a Petition or other application with the BPU (the "Regulatory Filing") seeking BPU authorization to consummate the terms and conditions of this Equipment Agreement. Lund's agrees to cooperate with ACE in obtaining the approval of the Equipment Agreement from the BPU. If the BPU fails to issue an order approving of the sale of the assets within nine months from the

date of the Regulatory Filing, either Party shall have the right to terminate this Equipment Agreement and shall have no further obligation to the other Party as a result thereof.

IN WITNESS WHEREOF, the Parties hereto have duly executed this Equipment Agreement as of the day and year first above written.

TREATED WOOD PRODUCTS GIVEAWAY PROCEDURE

- 1. Obtain a “Beneficial Reuse of Treated Wood” form.**
- 2. Obtain Consumer Information Sheet(s) (CISs) for appropriate wood products being given away.**
- 3. Obtain Material Safety Data Sheet(s) (MSDSs) for appropriate wood products being given away.**
- 4. Complete SECTION 1 of “Beneficial Reuse of Treated Wood” form**
- 5. Give Treated Wood Recipient(s) copies of appropriate MSDSs and CISs.**
- 6. Have Treated Wood Recipient complete SECTION 2 of the “Beneficial Reuse of Treated Wood” form.**
- 7. Copy completed form.**
- 8. Retain one copy in your Department/Area/District.**
- 9. Forward one copy to Power Delivery Safety & Environmental, NCRO.**

NOTE for Pole Giveaways New Castle/Bay Regions only:

Verify the date of MITC-fume application (vial installation) prior to including these materials in a giveaway. Any poles with a MITC-fume treatment date, 3 years or younger, are not available for giveaways. Please contact your supervisor or PD, Safety & Environmental with any questions.

**If you are in need of any of the above-mentioned forms, or sheets, please contact:
Barbara Riebe @ 8-225-4046, Power Delivery Safety & Environmental.**

INORGANIC ARSENICAL PRESSURE-TREATED WOOD

(Including: CCA, ACA, and ACZA)

CONSUMER INFORMATION

This wood has been preserved by pressure-treatment with an EPA-registered pesticide containing inorganic arsenic to protect it from insect attack and decay. Wood treated with inorganic arsenic should be used only where such protection is important.

Inorganic arsenic penetrates deeply into and remains in the pressure-treated wood for a long time. Exposure to inorganic arsenic may present certain hazards. Therefore, the following precautions should be taken both when handling the treated wood and in determining where to use or dispose of the treated wood.

USE SITE PRECAUTIONS

Wood pressure-treated with waterborne arsenical preservatives may be used inside residences as long as all sawdust and construction debris are cleaned up and disposed of after construction.

Do not use treated wood under circumstances where the preservative may become a component of food or animal feed. Examples of such sites would be structures or containers for storing silage or food.

Do not use treated wood for cutting boards or countertops.

Only treated wood that is visibly clean and free of surface residue should be used for patios, decks and walkways.

Do not use treated wood for construction of those portions of beehives which may come into contact with the honey.

Treated wood should not be used where it may come into direct or indirect contact with public drinking water, except for uses involving incidental contact such as docks and bridges.

HANDLING PRECAUTIONS

Dispose of treated wood by ordinary trash collection or burial. Treated wood should not be burned in open fires or in stoves, fireplaces, or residential boilers because toxic chemicals may be produced as part of the smoke and ashes. Treated wood from commercial or industrial use (e.g., construction sites) may be burned only in commercial or industrial incinerators or boilers in accordance with state and Federal regulations.

Avoid frequent or prolonged inhalation of sawdust from treated wood. When sawing and machining treated wood, wear a dust mask. Whenever possible, these operations should be performed outdoors to avoid indoor accumulations of airborne sawdust from treated wood.

When power-sawing and machining, wear goggles to protect eyes from flying particles.

After working with the wood, and before eating, drinking, and use of tobacco products, wash exposed areas thoroughly.

If preservatives or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household clothing.

Consumer Information Sheet

PENTACHLOROPHENOL PRESSURE-TREATED WOOD

This wood has been preserved by pressure-treatment with an EPA-registered pesticide containing pentachlorophenol to protect it from insect attack and decay. Wood treated with pentachlorophenol should be used only where such protection is important.

Pentachlorophenol penetrates deeply into and remains in the pressure-treated wood for a long time. Exposure to pentachlorophenol may present certain hazards. Therefore, the following precautions should be taken both when handling the treated wood and in determining where to use and dispose of the treated wood.

USE SITE PRECAUTIONS

Logs treated with pentachlorophenol should not be used for log homes.

Wood treated with pentachlorophenol should not be used where it will be in frequent or prolonged contact with bare skin (for example, chairs and other outdoor furniture), unless an effective sealer has been applied.

Pentachlorophenol-treated wood should not be used in residential, industrial, or commercial interiors except for laminated beams or for building components which are in ground contact and are subject to decay or insect infestation and where two coats of an appropriate sealer are applied. Sealers may be applied at the installation site.

Wood treated with pentachlorophenol should not be used in the interiors of farm buildings where domestic animals or livestock are unlikely to crib (bite) or lick the wood, pentachlorophenol-treated wood may be used for building components which are in ground contact and are subject to decay or insect infestation and where two coats of an appropriate sealer are applied. Sealers may be applied at the installation site.

Do not use pentachlorophenol-treated wood for farrowing or brooding facilities.

Do not use treated wood under circumstances where the preservative may become a component of food or animal feed. Examples of such sites would be structures or containers for storing silage or food.

Do not use treated wood for cutting boards or countertops.

Only treated wood that is visibly clean and free of surface residue should be used for patios, decks and walkways. Do not use treated wood for construction of those portions of beehives which may come into contact with the honey.

Pentachlorophenol-treated wood should not be used where it may come into direct or indirect contact with public drinking water, except for uses involving incidental contact such as docks and bridges.

Do not use pentachlorophenol-treated wood where it may come into direct or indirect contact with drinking water for domestic animals or livestock, except for uses involving incidental contact such as docks and bridges.

HANDLING PRECAUTIONS

Dispose of treated wood by ordinary trash collection or burial. Treated wood should not be burned in open fires or in stoves, fireplaces, or residential boilers because toxic chemicals may be produced as part of the smoke and ashes. Treated wood from commercial or industrial use (e.g., construction sites) may be burned only in commercial or industrial incinerators or boilers rated at 20

million BTU/hour or greater heat input or its equivalent in accordance with state and Federal regulations.

Avoid frequent or prolonged inhalation of sawdust from treated wood. When sawing and machining treated wood, wear a dust mask. Whenever possible, these operations should be performed outdoors to avoid indoor accumulations of airborne sawdust from treated wood.

Avoid frequent or prolonged skin contact with pentachlorophenol-treated wood; when handling the treated wood, wear longsleeved shirts and long pants and use gloves impervious to the chemicals (for example, gloves that are vinyl-coated).

When power-sawing and machining, wear goggles to protect eyes from flying particles.

After working with the wood, and before eating, drinking, and use of tobacco products, wash exposed areas thoroughly.

If oily preservatives or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household clothing.

Urethane, shellac, latex epoxy enamel and varnish are acceptable sealers for pentachlorophenol-treated wood.

*Used by permission of American Wood Preservers Institute
Approved by the U.S. Environmental Protection Agency*

8/87

Consumer Information Sheet

CREOSOTE PRESSURE-TREATED WOOD

This wood has been preserved by pressure-treatment with an EPA-registered pesticide containing creosote to protect it from insect attack and decay. Wood treated with creosote should be used only where such protection is important.

Creosote penetrates deeply into and remains in the pressure-treated wood for a long time. Exposure to creosote may present certain hazards. Therefore, the following precautions should be taken both when handling the treated wood and in determining where to use the treated wood.

USE SITE PRECAUTIONS

Wood treated with creosote should not be used where it will be in frequent or prolonged contact with bare skin (for example, chairs and other outdoor furniture) unless an effective sealer has been applied.

Creosote-treated wood should not be used in residential interiors. Creosote-treated wood in interiors of industrial buildings should be used only for industrial building components which are in ground contact and are subject to decay or insect infestation and wood block flooring. For such uses, two coats of an appropriate sealer must be applied. Sealers may be applied at the installation site.

Wood treated with creosote should not be used in the interiors of farm buildings where there may be direct contact with domestic animals or livestock which may crib (bite) or lick the wood.

In interiors of farm buildings where domestic animals or livestock are unlikely to crib (bite) or lick the wood, creosote-treated wood may be used for building components which are in ground contact and are subject to decay or insect infestation if two coats of an effective sealer are applied. Sealers may be applied at the installation site.

Do not use creosote-treated wood for farrowing or brooding facilities.

Do not use treated wood under circumstances where the preservative may become a component of food or animal feed. Examples of such use would be structures or containers for storing silage or food.

Do not use treated wood for cutting boards or countertops.

Only treated wood that is visibly clean and free of surface residues should be used for patios, decks and walkways.

Do not use treated wood for construction of those portions of beehives which may come into contact with the honey.

Creosote-treated wood should not be used where it may come into direct or indirect contact with public drinking water, except for uses involving incidental contact such as docks and bridges.

Do not use creosote-treated wood where it may come into direct or indirect contact with drinking water for domestic animals or livestock, except for uses involving incidental contact such as docks and bridges.

HANDLING PRECAUTIONS

Dispose of treated wood by ordinary trash collection or burial. Treated wood should not be burned in open fires or in stoves, fireplaces, or residential boilers because toxic chemicals may be produced as part of the smoke and ashes. Treated wood from commercial or industrial use (e.g., construction sites) may be burned only in commercial or industrial incinerators or boilers in accordance with state and Federal regulations.

Avoid frequent or prolonged inhalation of sawdust from treated wood. When sawing and machining treated wood, wear a dust mask. Whenever possible, these operations should be performed outdoors to avoid indoor accumulations of airborne sawdust from treated wood.

Avoid frequent or prolonged skin contact with creosote-treated wood; when handling the treated wood, wear longsleeved shirts and long pants and use gloves impervious to the chemicals (for example, gloves that are vinyl-coated).

When power-sawing and machining, wear goggles to protect eyes from flying particles.

After working with the wood, and before eating, drinking, and use of tobacco products, wash exposed areas thoroughly.

If oily preservatives or sawdust accumulate on clothes, launder before reuse. Wash work clothes separately from other household clothing.

Coal tar pitch and coal tar pitch emulsion are effective sealers for creosote-treated wood-block flooring. Urethane, epoxy and shellac are acceptable sealers for all creosote-treated wood.
