I'm inclined to suggest we stay silent on this. And I'm not sure if this is supposed to be considered a public comment and filed under the Docket (Docket No. QO22020041).

Paul, what do you think?

Subject: [EXTERNAL] Meeting On Wind Farm Project - Ocean City

Hi Jay,

The BPU indicated today that Ocean City declined comment in today's hearing that was shared on short notice. Can you please make a statement on this?

Dear Mr. Fiordaliso,

I shared today the Tesla solar roof project that I put in at my house in the South End of Ocean City. If you would like more information on this I am happy to share it with you.

The solution is maintenance free and it cost me \$15K after rebates. It generates 5MW per year. Orsted wants to do all of this damage to our environment and cause disruption in our city for 7500 MW. 1500 homes with Tesla roofs generate this WITHOUT maintenance costs and WITHOUT environmental impacts and WITHOUT disrupting our community.

The cost of the state to subsidize this is far less than the total cost for the wind farm.

I ask the state to please evaluate alternatives and to not proceed with this project.

Thank you,

Jim Plousis
