Re: Grid Modernization Public Comments Docket No. QO21010085

Dear Acting Secretary Diaz:

FuelCell Energy, Inc. (“FCE”) would like to thank the Board of Public Utilities for initiating and hosting this Grid Modernization proceeding. FCE would also like to thank Guidehouse, Inc. for its role in hosting and moderating the meetings, as well as for preparing the Draft Report on Grid Modernization and Interconnection in New Jersey. FCE is grateful to have had the opportunity to participate in these discussions, to present at the Non-EDC Readout on January 28, 2022, and to share FCE’s vision of building the future of energy by decarbonizing power and creating hydrogen.

In light of the Findings and Recommendations outlined in the Draft Report, FCE looks forward to engaging with the electric distribution companies in New Jersey as they begin integrated distributed energy resource planning. FCE also looks forward to participating in subsequent proceedings hosted by the Board in connection with further Grid Modernization efforts. In particular, FCE hopes to participate in the regulatory sandbox, technical working groups, and cost allocation proceeding called for in the Draft Report.

FCE appreciates this opportunity to provide input and comments regarding the Grid Modernization proceeding and eagerly awaits the release of the Final Report. Thank you for your review and consideration.

Very truly yours,

Alexandra L. Isaac, Esq.
Senior Counsel
