24

25

And, again, good morning to all of you. My name is Joe Fiordaliso and I am the President of the New Jersey Board of Public Utilities and the presiding Commissioner for today's proceeding. Today we are here for the Oral Argument regarding the petition filed by Ocean Wind, LLC, for authorization to obtain easement -- easements across Green Acres restricted properties and consents needed for certain environmental permits in and with respect to the City of Ocean City, are reasonably necessary for the construction or operation of Ocean Wind 1, Qualified Offshore Wind Project. Docket Number Q022020041, N.J.S.A. 48:3-87, grants the Board the authority to make a determination on this petition. Since we have all of the

Commissioners of the Board of Public Utilities

on hand today, this proceeding is a Public
Meeting of the New Jersey Board of Public
Utilities.

Adequate notice of this meeting

Adequate notice of this meeting has been provided as required by the Open Public Meetings Act set forth in N.J.S.A. 10:4-6. To date, we have the following on the docket. On February 3, 2022, Ocean Wind, LLC, filed a petition seeking determination that certain easements and consents are reasonable -- reasonably necessary for the construction of Ocean Wind Project. This Petition was accompanied by testimony from Pilar Patterson, Jason Kalwa and Madeline Urbish.

The Board issued an Order retaining the petition and assigning myself as presiding officer on February 23. I set the initial procedural schedule and requested supplemental information from the petitioner in an Order on March 1st. On March 15th, Ocean Wind submitted answers to the request for supplemental information. On March 22nd, I issued an Order naming Ocean City as a necessary party and updating the procedural schedule.

1 response to Ocean Wind's March 15 response.

2 Also, on April 27, Rate Counsel filed testimony

for Maximilian Chang. On April 29, Ocean Wind

4 filed an Amended Petition revising the acreage

5 impact upon or under the proposed Green and

6 Energy diversion down work. On May 11, Ocean

Wind filed a rebuttal testimony to the April 29

8 response from Ocean City.

Public hearing was held on May 19, and the Board received written comments before the deadline of June 2nd. On June 16th, Ocean Wind filed a reply to Rate Counsel's comments. This petition represents the first request for authorization under N.J.S.A. 48:3-87.1, because the petition has the potential to affect the property interests of Ocean City. The Board takes this responsibility very seriously and is committed to providing a fair and transparent process.

With us today are representatives from the parties, Ocean Wind, Ocean City and the Division of Rate Counsel. Each of the parties will have the opportunity to present their argument starting with the Petitioner, Ocean Wind, followed by Ocean City and then Rate

Counsel. The parties have indicated that each argument will take, approximately, 15 minutes.

After the initial argument, all parties will have the opportunity for a short rebuttal. As noted, the Commissioners are present today and may ask questions at the end of the

presentations.

I want to remind the parties and the public that arguments in this proceeding should be limited to the matter at hand, whether the easements and consents sought by Ocean Wind, LLC, are reasonably necessary for the construction or operation of the project. Not at issue today, let me underline that, not at issue today are the desirability of Offshore Wind, the location of the project in the ocean, or any environmental aspects positive or negative of the Ocean Wind project as a whole, except as they relate to the easements and consents sought under the petition.

I will ask that when a party is speaking, please ensure your camera is on you and you are un-muted. When not speaking, please turn your video and microphone off. On a personal note, I had hoped that we would be

```
1
    doing this procedure in person, but at the
2
    request of one of the parties, we are doing it,
    as you can see, virtually. And it -- I am sure
    we will get all of the information that we need
    in order to make a fair determination as we go
    along.
6
                With that, I will invite Ocean Wind
8
    to make their statement. Ocean Wind.
9
                MR. EISENSTARK:
                                  Thank you,
    President Fiordaliso. And I just want to check,
10
    can everyone hear me okay? I always like --
11
12
                PRESIDENT FIORDALISO: Very well,
13
    yes.
14
                MR. EISENSTARK: Thank you.
                                              And,
15
    thank you President Fiordaliso, Commissioners
    Holden, Solomon, Chivukula and Gordon. My name
16
17
    is Gregory Eisenstark. I'm with the law firm of
18
    Cozen O'Connor and we represent the petitioner,
19
    Ocean Wind, LLC, in this filing.
                 I'd just like to start briefly by,
20
21
    you know, thanking the Board for this
22
    opportunity to present some additional detail
23
    about the filing, put some issues into context
24
    and explain, you know, in some more detail what
```

exactly it is that Ocean Wind is asking the

25

Board to do here.

I think everyone here is aware, this filing concerns the Ocean Wind 1, Qualified Offshore Wind Project. That would be the first Offshore Wind Project constructed off the coast of New Jersey. It's an 1100 megawatt Offshore Wind Project. And why are we here today before the Board? Why did Ocean Wind make -- file this petition back in February of this year?

Well, because everyone knows, you have to get the generation that's being generated 15 miles or more out in the Atlantic Ocean to the shore and to interconnect with the existing electric bulk power system. All the load the customers that are going to use the electricity are located on land or, of course, not located out in the ocean. So any Offshore Wind Project, including this one, Ocean Wind 1, needs to construct cables from the ocean and make landfall on the land and then across portion of the land and interconnect with the existing bulk power system.

For this particular project, for

Ocean Wind 1, the project examined a number of
what we call points of interconnection, that's a

POI or where the -- where the project will interconnect with the existing electric grid. Ultimately, after a fair amount of evaluation, it was determined that there's essentially two viable points of interconnection for Ocean Wind One is in Lacey Township in Ocean County, and the other is in Upper Township in Cape May County. Both will be used for this project. The one -- the point of interconnection we're about talking here, of course, today is the southern one, the one in Cape May County in Upper Township. And what this matter is about is Ocean Wind's attempts to site the onshore cable from where it makes landfall, where the under ocean cable meets land to the point of interconnection in Upper Township. You know, basically, as the Board is aware, the Board approved Ocean Wind 1, just a little over three years ago. It was in June 2019. Hard to believe that three years have now passed since that initial approval was granted. Shortly after that initial approval was granted by the Board, Ocean Wind began discussions with Ocean City and its representatives. discussions were extensive. The project

1

2

6

7

8

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

explains -- explained what it needed as far as 1 2 locating the cable, property rights, environmental permitting consents. And those 3 discussions went on for some time. 4 Unfortunately, as we sit here today, we could -the project was unable to get the necessary 6 property rights or the necessary municipal 7 8 consents from Ocean City, which necessitated Because I think all the members of 9 this filing. the Board gathered here today are all aware, in 10 11 2021 the legislature sought fit to amend the 12 Offshore Wind Economic Development Act, OWEDA, 13 to allow the Board, to give the Board some 14 additional jurisdiction to address situations 15 like the one that we're faced with here today. 16 And that is the siting of the onshore portion of 17 a qualified Offshore Wind Project. I think the legislature acted 18 19 because, while OWEDA was a progressive and forward-thinking piece of legislation back in 20 21 2010 when it was enacted, it didn't address the 22 onshore portion of what needs to be constructed 23 for a qualified Offshore Wind Project. 24 unlike public utilities, electric utilities, gas

utilities, water and sewer utilities, which have

25

```
1
    some statutory rights to occupy public
2
    rights-of-way, to seek condemnation for property
    rights and to override some municipal approvals,
3
    Offshore Wind Projects didn't have any of that
4
5
    before these recent amendments, the 2021
    amendments. So those amendments, I believe, and
    Ocean Wind believes, were necessary to address
    the type of situation we have here and to allow
8
    the siting of Offshore Wind Projects, the
    onshore portion of it.
10
11
                 So, basically, as President
12
    Fiordaliso discussed briefly earlier, this
13
    petition was filed under those recent
14
    amendments. They're N.J.S.A. 48:3-87.1(f)
15
    Subsections 2 and 3. And, essentially, what the
16
    filing seeks is -- it's actually -- there's a
17
    lot of paper in the record in this thing.
    There's extensive testimony, rebuttal testimony
18
19
    and exhibits. But the relief that Ocean Wind is
20
    seeking is actually fairly simple. There are
21
    really just two or three issues that we're
22
    asking the Board to get involved with and
23
    approve here.
24
                 The first issue is the approval of
    the acquisition of two easements for the
25
```

One of those easements is at the beach fall at 35th Street in Ocean City. The second of those easements is at the point where the underground line will cross -- a bay crossing at what's known as Peck's Bay at Crooks Horn Creek at the border of where Ocean City meets, you know, on the other side of the bay, it becomes Upper Those are the two easements the Township. project is asking the Board to approve. The total acreage of those easements in total is 0.647 acres. So just a little bit more than half an acre. Each of the easements is, approximately, 30 feet wide. So they're not very wide. And the easements are simply necessary for the installation of the underground cables. In conjunction with that, both of the parcels over which Ocean Wind is seeking easements are encumbered by Green Acres -- Green Acres restrictions. Green Acres restrictions -and I won't go into a great deal of detail about

underground construction of the electric cable.

1

2

3

4

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

provides fund -- provided funding and -- for the

what the Green Acres Program is. But suffice it

to say, that the state's Green Acres Program

acquisition of certain property. And that property is generally preserved as parkland, unless an application is approved by the NJDEP to divert that. And then if they do approve a diversion, there are various things that the entity that seeks the diversion has to do in order for the DEP to approve the diversion of Green Acres, one of which is obviously to acquire an easement and to pay the property owner the fair value of the easement. second is to pay into a state Green Acres fund, a sufficient fund that would allow the acquisition three times the acreage to be diverted to be set aside for new Green Acres property. So that's the first thing. The acquisition of these two easements.

1

2

3

4

5

6

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

The second thing that the project

Ocean Wind is asking the Board to approve is to
essentially override or preempt the municipal
consents that are required -- would otherwise be
required from Ocean City for the NJDEP permits.

As -- and it's in the record of our filing here.

We discuss in our pre-file testimony, we list
all of the DEP permits that the project will
require before it can begin construction.

The way DEP -- the DEP permitting process works, the property owner must consent to the applicant -- to the application and the issuance of -- for the DEP to go through the permitting process. In this case, Ocean City is the property owner for the two easement areas and the rest of the underground cable route for the project. So absent the recent amendments to OWEDA, Ocean City would have had to consent to the DEP permit application. As I alluded to earlier, as of now, Ocean City has not consented to those DEP permit applications. So we are asking the Board to step into the municipality's place and allow the DEP permit applications to be processed and go forward, which hopefully at the end of the day will result in the DEP issuing the permits that are required for the project.

1

15

16

17

18

19

20

21

22

23

24

25

I just want to touch on a couple of other things, just in detail. And most of this -- I'm not going to obviously cover everything that's in the petition and direct and rebuttal testimony we filed, because we'll be here all day if I tried to do that. I just want to make it clear, that Ocean Wind complied with

the statutory requirements. As I mentioned earlier, we've been discussing the needs that we have within Ocean City for, you know, literally close to three years now. On August 11th of last year, the project sent a formal letter to Ocean City, which sometimes is referred to as the 90-day letter, specifically, outlining in writing what we needed as far as easements, property rights and permit consents. At some point after that, Ocean Wind also had an appraisal done for the two easements that it It sent a formal offer letter to Ocean needs. City offering to acquire those easements on a 10-times the appraised value. That offer has not been accepted and even formally responded to. And that resulted in the petition being filed.

1

2

3

4

6

8

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

I just want to highlight a couple of other things. As I said earlier, this briefly describes the route of the underground cable.

And let me pause for a second here, because I want to emphasize, all of the electric cable at issue in this filing will be constructed underground. None of it will be overhead. It will come ashore at 35th Street at the beach.

And where it passes under the beach will be installed by what's known as horizontal directional drilling, which is an underground drilling process. The line as it passes under the beach will be very deep. In parts, a line would be 60 feet below the surface of the beach to give you an idea of how deep this line would It will then go up and it will then pass under the beach and come up in the public road right-of-way on 35th Street. From that portion within Ocean City, the entire line would be -most of the rest of the line will be conducted in -- essentially in conduit, in duct vacs, much like any other existing utility underground line, gas line, waterline, telecommunication lines that are already in place in Ocean City and in most other municipalities in the state. The construction will be no different. be constructed underground within -- within volts and it will be constructed much the way any other facility would be constructed. The only other place that it won't be constructed within the public road right-of-way, as I mentioned earlier, is at the Bay Crossing on Roosevelt Boulevard where it crosses at Crook

1

2

3

4

8

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

Horn Creek. At that crossing, again, there's the second easement that's required. And at that point, because we have to cross underneath the land and underneath, essentially, the bay or the creek, horizontal directional drilling will be used again. And that takes us -- that's the end of the portion of the line that's at issue here in Ocean City. The line will then come up on the other side of the bay. It will, again, be constructed in public road right-of-way through up the rest of the way to Upper Township and it will interconnect with a new substation that will be built in Upper Township at the -basically, at the location of Atlantic City Electric's B.L. England substation. It will be constructed on a nearby parcel and it will interconnect with the Atlantic City Electric grid at that point. So, again, all of the portions within Ocean City will be underground. construction is completed, the lines wouldn't be visible, you won't see them, you won't hear them, you really won't know that they're there. Let me pause for a second and just

1

2

3

4

8

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

check my notes. Let me just speak for a few

moments on the statutory standard of review. 1 2 And I think President Fiordaliso mentioned this in this opening remarks. The standard is for the easements, whether the requested easement right-of-way or other property -- real property interests are reasonably necessary for the construction or operation of the qualified 8 Offshore Wind Project. And I just want to take And it's the same standard that a second. applies to the environmental permit consents as 10 11 well. 12 In other context, when the Board has -- had applications or petitions from public 13 14 utilities to override municipal zoning 15 authority, the Board has had a chance to comment 16 on what the reasonable -- reasonably necessary standard is. And I just want to make it clear 17 18 The reasonable necessity standard doesn't 19 mean it's absolutely necessary. It doesn't mean it's the only alternative. It doesn't even mean 20 21 it's the best alternative. It just means that 22 the project evaluated different alternatives. 23 And the alternative that is proposed is a 24 reasonable one. It doesn't have to be the best

25

one.

It doesn't have to be the lowest cost one.

One other point that I'd like to make is, you know, what this project -- what this filing is not about. And I think it's important to emphasize this, and I may get into this a bit in rebuttal, you know, quite frankly, depending on what comments Rate Counsel makes. But based on their testimony, which we responded to in rebuttal testimony, there's -- Rate Counsel raised some alleged concerns about cost of the project. And I just want to make it clear, this filing really isn't about what this underground portion of the project will cost. And that's because this isn't a public utility project. This is a qualified Offshore Wind Project. The project, as the Board is well aware, was competitively bid. Ocean Wind submitted proposed OREC prices. Those OREC

1

2

3

4

8

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

The project, as the Board is well aware, was competitively bid. Ocean Wind submitted proposed OREC prices. Those OREC prices were determined three years ago in the Board's 2019 Order, and they won't be modified based on anything that happens with -- in this filing or with this portion of the project. The risk of cost overruns or, conversely, the benefit of cost underruns from this portion of the project is entirely on Ocean Wind. It will

not impact the cost that ratepayers pay through OREC prices one-way or another. There was some confusion in some of the comments that were filed about the transmission system upgrade called sharing mechanism. That is one of the limited instances in which OREC prices can be I just want to make it clear here adjusted. today, and we have testimony in the record, Matthew Kaplan's rebuttal testimony explains this in some detail. But the transmission system upgrade called sharing mechanism does not apply to the facilities we're talking about here. The TSUC only applies to essentially PJM directed transmission system, bulk system upgrade cost. So when the project has to apply to interconnect and enter into interconnection agreements with, in this instance, Atlantic City Electric for this interconnection, JCP&L for the one in Lacey Township, PJM identifies cost that would be necessary to essentially upgrade the bulk power system to allow the interconnection and the interjection of this amount of electric generation capacity into the system. Those are the costs that are subject to the TSUC sharing The cost to run the lines from the mechanism.

1

2

3

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

turbines out in the ocean to the beach, or to landfall. And the underground portion from the landfall to the new substation is not within the TSUC. So, that is why this is a little bit different than a utility project.

1

2

3

4

5

6

7

8

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

You know, often in utility infrastructure projects, when a utility comes in, the Board is interested in how much it's going to cost because the Board knows that eventually utility is going to file a base rate case and seek to include all of the capital costs in its base rate. Here, that's not the case. Ocean Wind isn't a utility. It's not regulate -- its rates are not regulated by the Board. And at least for the facilities we're talking about here in this filing, they will have no impact on the amount that customers pay. That's already been determined in the Board's 2019 Order. It's not up for reconsideration here or really anywhere else. So I just wanted to make that point clear.

One last point, and I know I've been talking for a while, and I don't want to overstay my welcome here and leave time for others' comments. I just want to make it clear,

1 that from Ocean Wind's perspective, we've 2 clearly satisfied the statutory standard. We filed the Verified Petition. We filed three 3 pieces of direct testimony with supporting 4 5 exhibits explaining exactly what we need, explaining the outreach we've done to Ocean City 6 prior to filing the petition, explaining what 7 8 the construction will be like, explaining the -what environmental permits we need and 9 explaining in detail what the two easements are. 10 11 From our perspective, our filing meets the 12 statutory standard and is un-rebutted. The only 13 party to file testimony in response to the --14 the direct testimony of the petitioner was Rate 15 Counsel. Rate Counsel raised a number of 16 issues. You know, I'm not going to put words in Rate Counsel's mouth. I don't think Rate 17 Counsel is opposing the project. They raised 18 19 what I say a number of concerns. I think we clearly addressed them all in rebuttal testimony 20 21 and have adequately explained why those concerns are not valid and do not deter from the filing 22 23 the company has made and the relief that we're 24 requesting.

25

So, again, with that, I'm going to

stop at this point and reserve, you know, a few 1 2 minutes in case I do need rebuttal. I'd be happy to answer any questions that President 3 Fiordaliso or any of the Commissioners may have. 4 5 And at this point, that would conclude my direct 6 presentation. Thank you. 7 PRESIDENT FIORDALISO: Very good. 8 Thank you very much. We're going to save questions until the end of the presentations and 9 so on, and if anyone has them at that point. 10 I 11 thank you for your statement. I now invite 12 Ocean City to make their statement. 13 MS. McCROSSON: Thank you, President 14 Fiordaliso. Good morning to you and to the 15 Commissioners. I'm here --PRESIDENT FIORDALISO: Good morning. 16 17 MS. McCROSSON: I'm here on behalf of Ocean City and Mayor Jay Gillian and business 18 19 administrator George Savastano are with me this morning. Thank you for the opportunity to 20 21 provide closing argument in this matter. Ocean 22 City will address five points. 23 Ocean City questions the authority 24 of the BPU to grant the Petition that Ocean Wind has filed in this matter. Ocean City urges the 25

BPU to refer this matter to the Office of
Administrative Law. Ocean City believes that
the Board should require Ocean Wind to disclose
costs of alternative routes prior to making a
decision in this matter. And Ocean City
believes that the Board should wait for the
issuance of a final environmental impact
statement prior to making a decision on the
petition.

25

The City respectively questions the authority of the BPU to consider Ocean Wind's petition seeking authority to obtain an easement over the City's fragile beach and wetlands and its environmental permit consents. The New Jersey Administrative Code Section 7:36-26.8 permits local government units to initiate an application for diversion of lands on its recreation and open space inventory. Hastily adopted N.J.S.A. 48:3-87.1(f) upon which Ocean Wind relies and pursuant to which the BPU is now proceeding purports to broadly preempt and supercede all other state laws, rules and regulations. It strips elected municipal officials of the power to decide whether Ocean Wind, a private corporation, may take municipal

```
property rights within Ocean City in complete
1
2
    disregard of the will of the governing body and
    its constituents. N.J.S.A. 48:3-87.1 has not
3
    yet been tested in the courts. There remains to
4
    be seen whether it will survive judicial
6
    scrutiny.
                 The Board is likely familiar with
8
    the admonition in the New Jersey State
    Constitution of 1947 that, quote, "Any law
9
    concerning municipal corporations formed for
10
11
    local government or concerning counties, shall
12
    be liberally construed in their favor." Article
13
    4, Section 7, paragraph 11. The novelty of
14
    N.J.S.A. 48:3-87.1(f) coupled with the cited
15
    language from New Jersey Constitution should be
    reason enough for the Board to refer Ocean
16
17
    Wind's petition to the Office of Administrative
    Law as a contested case under N.J.S.A.
18
19
    52:14(f)-1 et seq., for hearing and disposition.
    Additionally, there can be no doubt that this is
20
    a contested case under the Administrative
21
    Procedure Act and under N.J.A.C. 1:1-2.1.
22
                                                 The
23
    case law confirms this.
24
                 First, this hearing is required by
              Second, the hearing will result in an
```

25

statute.

adjudication concerning rights, duties, obligations, privileges, benefits or other legal relations. And third, the hearing involves specific parties rather than a large segment of the public. These three factors are enunciated in Board of Education of the Upper Freehold Regional School District versus State Health Benefits Commission 3:14 NJ Super 486 Appellate Division 1998.

Further, in this matter there is a disputed issue of fact. Ocean Wind argues that the Great Egg Harbor route would cross under two historic bridges with low clearance making construction of this project using that route significantly challenging. Ocean city has taken the position that neither of the bridges spanning Great Egg Harbor route is historic, nor has low clearance. This issue of fact alone is reason for the Board to refer this matter to the Office of Administrative Law, and Ocean City urges the Board to make that referral.

N.J.S.A. 48:3-87.1(f) treats Ocean Wind as if it were a public utility by giving it the power of eminent domain modified by the requirement of the BPU, an agency charges the

oversight of regulated utilities. Find its seizure of property rights from the City of Ocean City and soon to come County of Cape May to be reasonably necessary. Yet according to Ocean Wind, the statute excuses Ocean Wind from the obligations of a public utility to disclose the costs of its preferred route or chosen path, extensively because the cost of construction would be borne by Ocean Wind.

23

24

25

The cost of construction is absolutely relevant to the question of whether Ocean Wind's preferred route is reasonably necessary. Realistically, each and every criterion constraint considered in the evaluation of the point of interconnection and preferred route could be mitigated if cost were of no issue. It appears that Ocean Wind is promoting the most economically expedient route. This is a self-serving approach at the cost of Ocean City. Until and unless Ocean Wind discloses the cost of each of the alternate routes, the Board cannot find that the easements and consents which Ocean Wind seeks are reasonably necessary. As Ocean City has previously argued, Ocean Wind could dispense

with its efforts to rest property rights from 1 2 Ocean City against the will of its governing body by pursuing the Great Egg Harbor route. 3 The Great Egg Harbor Inlet is sufficiently wide 4 to accommodate this route without impacting the U.S. Army Corps of Engineers borrow area, which is solely on the Ocean City shoreline. 7 8 Restriction of other vessels during construction in this wide inlet does not equate to a closure 9 of the inlet. Navigation would continue during 10 11 the temporary period of construction as it did 12 during the construction of the Ocean City-Long 13 Port Bridge in and around 2002. 14 By contrast, the preferred route 15 would traverse a much, much narrower, but 16

By contrast, the preferred route would traverse a much, much narrower, but equally heavy traveled Peck's Bay at Crook Horn Creek. The reduced distance of the preferred route likely translates into lower costs for Ocean Wind. However, it requires disturbance of the barrier islands beach and wetlands. This disturbance would be eliminated by using the Great Egg Harbor route. Going through Ocean City is not reasonably necessary. Disturbance of shellfish habitat Great Egg Harbor Inlet, another factor which disqualified the Great Egg

17

18

19

20

21

22

23

24

25

Harbor route can be mitigated with a monetary contribution to the NJDEP's fund for help -- shellfish habitate (Phonetic) -- habitat mitigation and restoration pursuant to N.J.A.C. 7:7-17.1 et seq. This is another strictly monetary issue.

It is surprising to Ocean City that Ocean Wind argued that the Great Egg Harbor route would cross under two historic bridges with low clearance. Both have high clearances 65 and 55 feet respectively. Neither bridge would be an actual obstacle to construction.

The overwhelming benefit of utilizing the Great Egg Harbor route is the utter lack of disturbance to the citizenry of Ocean City. The City's pristine beach and wetlands would not be disturbed. The streets would not be excavated. Ocean City would still bear the aesthetic effects of this project and whatever consequences they may bring. However, the island would not be defaced and the activities of the people on the island would not be interrupted. It seems clear that the Great Egg Harbor route was eliminated due to economic reasons. It is a more difficult route, perhaps

a more extensive route, but surely not impossible to implement.

In its June 16th, 2022 response to written comments, Ocean Wind explains that it eliminated the Great Egg Harbor route for a myriad of reasons, many of which were related to the characteristics of the inlet, which I already addressed. Ocean Wind appears to have overcome similar obstacles in its Oyster Creek proposals to install cable crossing Barnegat Inlet and/or Barnegat Bay. For that project, shallow areas will be dealt with through Target burial depths would be dredging. determined based on an assessment of the seabed conditions, seabed mobility and the risk of interaction with external hazards, such as fishing gear and vessel anchors, while also considering other factors such as maintain navigational channels and thermal connectivity. Many of those issues were cited in the decision to eliminate the Great Egg Harbor route as a possible route.

Ocean Wind will develop a cable burial risk assessment for the Oyster Creek project. And in the event cables cannot achieve

proper burial depths, or if cables would cross 1 2 existing infrastructure -- infrastructure, Ocean 3 Wind has options, including rock placement, concrete mattress placement, fraud (Phonetic) 4 mattress placement, rock bags for five, number 5 five, seabed spacers. These solutions are 6 7 proposed for the Ocean -- the Oyster Creek site 8 according to BOEM's Draft Environment Impact Statement, Pages 2-13 to 14. They have not been cited as reasons to reject Ocean City's 10 11 preferred route in the Oyster Creek substation. 12 Ocean Wind claims that the Great Egg 13 Harbor route would be 5.8 miles within a 14 designated shellfish habitat. It appears that 15 the distance from the edge of Island Beach State 16 Park to Oyster Creek is longer than 5.8 miles. 17 And as for the environmental characteristics of 18 the seabed to be traversed to reach the Oyster 19 Bay substation, according to the BOEM Draft 20 Environmental Impact Statement, Barnegat Bay is 21 an estuary of national importance and part of the national estuarine research reserve system. 22 Four artifical reefs are mapped offshore 23 24 adjacent to the Oyster Creek Offshore export cable corridor. Four shellfish leases, 37 25

acres, and one research lease occur in the vicinity of Oyster Creek with the primary shellfish grow-out of oysters and hard clams. The proposed offshore export cable to the southern most landfill options for Oyster Creek traverses an aquacultured lease area on the west side of Barnegat Bay. Barnegat Bay supports invertebrate species such as hard clams, soft clams, blue mussels, bay scallops and eastern oyster.

Ocean Wind evidently believes it can address all of the challenges these conditions present in the Oyster Creek landfall proposals, but would have you believe that the similar challenges in the Great Egg Harbor route are insurmountable. And in its evaluation of the Great Egg Harbor route, Ocean Wind completely disregards the consideration most important to the most impacted community, the opinions of the elected officials of Ocean City and their constituents. That is not even listed as a The failure of Ocean Wind to relevant factor. even consider the opinion of the elected officials of Ocean City, the affected community, as the preferred route should be startling to

this Board when Ocean Wind has other options.

The environmental impact statements which would be required for the project have not been finalized. BOEM has not issued a final The National Marine Fisheries Service has not adopted an EIS. And the U.S. Army Corps of Engineers has not adopted the EIS. Any one of these agencies might determine that the environmental impact of the proposed route through Ocean City is unacceptable, in which case, the easements would not be reasonably necessary. Waiting until the environmental impacts can be addressed and understood would be prudent. And Ocean City asks the Board to defer any decision in this matter until it can review BOEM's EIS and the response thereto of the NMFS and the U.S. Army Corps of Engineers.

In conclusion, if N.J.S.A. 48:3 -I'm sorry. In conclusion, if N.J.S.A.

48:3-87.1(f) were ultimately found to be
enforceable in this matter, the BPU would be
required to find sufficient evidence in the
record to support a finding that the easements
and consents which Ocean Wind seeks to take from
Ocean City without Ocean City's consent are

reasonably necessary. The factual issue 1 2 regarding the impact of the two bridges which Ocean Wind claims to be impediments to the use 3 of the Great Egg Harbor route suggests that the 4 5 petition should be referred to the Office of Administrative Law at this juncture. In the 6 absence of a cost analysis as to the various 7 8 alternate routes, the record is fatally deficient. In light of the apparent 9 inconsistencies between what is possible and 10 11 proposed for Oyster Creek, and what is deemed to 12 be impracticable and fatal to the Ocean City 13 situation, and Great Egg Harbor, Ocean Wind's 14 presentation is incomplete or not credible. 15 Thank you. PRESIDENT FIORDALISO: 16 Thank you for 17 your comments. I now invite Rate Counsel to make their statements. 18 19 MR. LIPMAN. Thank your, President Fiordaliso. Hello to all the Commissioners. 20 21 Good to see everybody. I, too, actually am glad 22 that this is virtual because I'm actually in 23 Orlando right now. So it makes it a lot easier 24 to argue from Orlando than from Trenton. I'm glad that we've stayed focused on what this 25

is about, because that's very important, the issue before the Board today is whether this easement is reasonably necessary for Ocean Wind to conduct for its line. In order for the BPU to make that finding, it needs evidence before that the line -- that the easement is reasonably necessary and the line is reasonably necessary, because if there's no easement, there's no line, if there's no line, there's no need for an easement. So the goal of the BPU here is to find that this is reasonably necessary.

Rate Counsel, unfortunately, can't

really take a position on that because we have not had the opportunity to fully probe that issue. Rebuttal testimony was filed answering some of our concerns. We were not allowed to ask discovery about that rebuttal testimony. In fact, there was no discovery in this matter.

Ocean Wind -- we were -- asked Ocean Wind if they would answer some questions, and they did answer some of our questions, but not all of our questions. And they didn't have to, because there was no discovery in this process.

Interestingly, Ocean City raises a number of issues that, quite frankly, we would

have liked to have resolved if we had known about them through discovery. And would I have — Rate Counsel would have very much liked to have taken a position. And I want to be very clear on this, we are not opposed Offshore Wind and we are not opposed to any of the projects that are going on. Our only issue is that we want to make sure that this line is reasonably necessary. And in order for us to do that, we need to get certain information which we were unable to obtain during the process of this matter.

Also, as far as the cost goes, I'm being told that cost doesn't matter in this case. Again, we weren't able to probe that issue. I know that PJM is meeting today and my understanding is that the transmission portion of this cost -- of this line is going to triple. PJM is going to increase interconnection costs significantly. For that reason, Rate Counsel wanted to probe where the line was interconnecting, whether it made sense that this interconnection made sense given the cost that will be involved. We're taking Ocean Wind's word that any cost with this project would be

borne by Ocean Wind. Obviously, Rate Counsel is 1 2 going to be paying very close attention, as I know will the Board, to that issue to hold Ocean 3 Wind to the fire -- feet to the fire, and make sure that ratepayers are not being charged anything that they're not suppose to be charged. 6 7 And we're going to hold Ocean Wind to their word 8 in this case. But, again, it's very There was rebuttal testimony dis-concerning. filed. Mr. Eisenstark started off his arguments 10 11 by thanking the Board for allowing the 12 opportunity to provide additional information. 13 Any additional information that was provided 14 today, Rate Counsel will not be able to probe, 15 nor will the Board. And then Ocean City 16 provided significant new information today that 17 Rate Counsel cannot probe, and nor can the 18 Board, because there's no opportunity to do so. 19 The process here was different than any other process. And I understand, this is the first 20 21 case of its type. And so the process was going to be somewhat different. But the lack of 22 23 ability to probe the petition, to probe the 24 answers that we got from Ocean -- from Ocean Wind and then to probe what Ocean City just said 25

```
today, makes it extremely difficult for Rate
1
2
    Counsel to take a position on this issue.
    again, I want to emphasize, on this issue.
3
    Because there's been some comments that Rate
4
    Counsel is opposed to Offshore Wind and we are
5
          The issue before the Board today is
    not.
    whether this easement is reasonably necessary.
8
    And our position at this time is, we don't know
    because we don't believe there's sufficient
    evidence in the record for that decision to be
10
11
    made.
12
                With that said, that's really all we
13
    have to say. We're not going to take a position
14
    on Ocean City's factual arguments or, quite
15
    frankly, Ocean Wind's factual assertions,
16
    because we haven't had the opportunity to probe
17
    them and we don't feel we're qualified to make
18
    those types of assertions at this time.
19
    you.
20
                PRESIDENT FIORDALISO: Thank you.
21
                MR. LIPMAN: I kept it short for you
22
    too, President Fiordaliso.
23
                PRESIDENT FIORDALISO:
                                        I'm sorry?
24
                MR. LIPMAN:
                              I kept it short for
25
    you.
```

PRESIDENT FIORDALISO: Thank you. I appreciate it. I will now invite the parties to make any rebuttal statements should they wish.

First, Ocean Wind, do you want to make any rebuttal?

MR. EISENSTARK: Yes, President

Fiordaliso, I do. Thank you. Let me -- let me make -- I'm going to respond both -- first to Ocean City and then briefly to Rate Counsel's remarks.

With respect to Ocean City, I'm going to lodge a formal objection to the statement that Ms. McCrosson appeared to be reading into the record. It's entirely inappropriate. It's a closing stage of this proceeding. We're at the very last stage here today. This is oral argument of counsel. And the purpose of oral argument of counsel, as we understood it, and it is most often understood, is to sum up the record evidence that has been presented before. The problem is, Ocean City has not really participated in this proceeding until today. So for Ocean City -- for Ocean City to have its city solicitor appear and be reading from a statement, which she is not an

expert on any of those issues, she's just an attorney, to attempt to read stuff in the record that someone else has prepared for her, much of which we've never heard before, is entirely inappropriate. So, we can do this by writing afterwards, but we're going to make a formal motion to have the Board strike most of what Ms. McCrosson said. She made some arguments that are legal arguments. I think those are fine. But she appeared to be reading factual stuff that was prepared by someone else. She is not a witness. She did not file testimony. And this also goes to Ocean City's complaints about the process that the Board has filed here. Ocean City had every right to fully participate in this proceeding. They had the right to file testimony and have sworn testimony of a witness, have a witness testimony

1

2

3

4

5

8

10

11

12

21

22

23

24

25

participate in this proceeding. They had the right to file testimony and have sworn testimony of a witness, have a witness testimony considered, exhibits. They chose not to do that. And that's to their own peril. And to appear at the very last stage of this in arguments of counsel and attempt to interject facts that really aren't evidence at all because they're not supported by a witness is entirely inappropriate. And I do not express that --

that comment in a more strong manner than I just have. It is entirely inappropriate.

3

16

17

18

19

20

21

22

23

24

25

Secondly, just I want to briefly touch on a couple of the factual allegations that Ocean City did make which were subject of Ocean Wind's rebuttal testimony. And that, basically, concerns the so-called Great Egg Harbor route. In both Ocean Wind's direct testimony of Pilar Patterson and in her rebuttal testimony, we provided extensive record evidence of why the Great Egg Harbor route was not ultimately pursued. It has much more to do than the fact whether or not the two bridges that it would have to cross under are historic or not. And as we've -- as we've said in our rebuttal testimony, those two bridges still are listed on the register of historic places. Whether they should be or not is a different question. there are many, many other reasons why the Great Egg Harbor route was not desirable. going to sit here and read from our testimony. Our testimony is part of the record. But it's clear that the Great Egg Harbor alternative is not preferable for a host of reasons; environmental reasons, construct-ability

reasons, interference with marine traffic 1 2 through the inlet. There is a better 3 alternative. The alternative is the one that we've substantiated through our testimony as the 4 5 preferred route here. The impacts to Ocean City and its residence will be minimal. The line 7 will be underground. Once the construction is 8 completed, you won't see it and you won't hear it. And, quite frankly, it will be no different than the underground facilities that are already 10 11 in Ocean City. I suggest to you that Ocean 12 City's famed objection to the route that we have 13 selected has nothing to do with the actual 14 onshore route, but it has to do with Ocean 15 City's overall objection to Offshore Wind. I'll leave it at that. 16 17 Let me respond briefly to Rate 18 Counsel's comments. And, again, you know, I 19 don't want to get into a back and forth too much here with Mr. Lipman. I respect Mr. Lipman. 20 21 Rate Counsel did have an opportunity to fully 22 participate in this process. Rate Counsel 23 served discovery on the Company's direct 24 testimony. We responded to all of the questions that Rate Counsel asked. Rate Counsel had the 25

opportunity to file its own testimony of a -- of an expert witness, which it did. It raised a number of issues that it felt were important to And then Ocean Wind had the opportunity to respond to it. We believe we've adequately addressed all of Rate Counsel's concerns. You know, and I will note, again, you know, Mr. Lipman did refer -- and, again, this is not evidence, it's just a reference. He referred to something about a PJM meeting and his belief that interconnection costs will go up. I don't know whether that's true. I don't know what the basis for that statement is. But I do know one thing for sure, whether it's true or not, it has nothing to do with this filing. Because this filing isn't about PJM interconnection costs. It's about the -- it's about the onshore cable route from where the project will make landfall to the substation. There are a limited number of places where Offshore Wind can interconnect to the existing grid in New Jersey. There are very, very few. And there's going to be, not only Ocean Wind 1, but Ocean Wind 2, the Atlantic Shore's project that's been approved and a large number of other projects that will

1

2

3

5

7

8

9

10

11

12

13

14

15

13

14

15

16

17

18

19

20

21

22

23

24

25

So, again, if we're going to stay on what is an issue in here, PJM interconnection costs are not an issue here. They may be an issue for PJM in other context, but they are simply not an issue here.

Finally, one last point, and I don't mean to speak too long, I just want to respond again to one other issue that Ocean City did And that is this suggestion that the raise. Board should wait until the final environmental impact statement is approved by the BOEM. there are a lot of things that have to go on contemporaneous for an Offshore Wind project to be constructed. There are state permits. The state permitting process is tied in some part to the federal process. But you can't -- you know, you have to do everything at the same time in order for this project to be constructed -permitted and constructed. We're already three years into -- into the process since the Board approved the project. The first commercial operation date that is planned is quickly approaching in early 2024. You simply -everything can't wait for everything else to be

```
done first. It has to be done simultaneously.
1
2
    There's no reason and no requirement under New
3
    Jersey State Law or otherwise for the Board to
    wait for the federal government's environmental
4
    impact statement to be finalized in order to act
5
    on Ocean Wind's filing here. Thank you very
6
7
    much, President Fiordaliso.
8
                PRESIDENT FIORDALISO: Thank you.
    Rate Counsel, would you like to make a rebuttal
9
10
    statement.
11
                MR. LIPMAN: You want me to go first
12
    or you want Ocean City to go first, Mr.
13
    President?
14
                PRESIDENT FIORDALISO: Oh, I'm
15
    sorry. You're absolutely correct. My bad, as
    they say. Ocean City, would like to make a
16
17
    rebuttal statement?
18
                MS. McCROSSON: Just briefly,
19
    President.
                Thank you.
20
                PRESIDENT FIORDALISO:
                                        Sure.
21
                MS. McCROSSON: The points that
22
    Ocean City made today were simply an expansion
23
    of the points in the letter previously filed
24
    prior to the hearing in this matter.
    Questioning the authority of the Board -- with
25
```

all do respect to the Board, but questioning the 1 2 propriety of the statute under which the Board is proceeding today. Ocean City also questioned whether the Great Egg Harbor route was the 4 5 better route. I was not reading a statement 6 prepared by someone else. I was making reference to the Draft Environmental Impact 7 8 Statement prepared by BOEM which came out very 9 recently, which summarizes Ocean Wind's proposed course of action with respect to the Oyster Bay 10 11 -- the Oyster Creek project, in order to explain 12 to the Board and highlight the inconsistency in 13 Ocean Wind's approach to these two projects. 14 What is possible for Oyster Creek is impossible 15 in the Great Egg Harbor -- in the Great Egg 16 Harbor Bay. 17 I think that's the only thing that 18 Mr. Eisenstark was complaining about. The fact 19 that I was referring to the BOEM draft, EIS, which has just recently come out. But I can 20 21 assure you that all of those facts are taken 22 directly from Ocean Wind's arguments and the 23 public filings that Ocean Wind has made, 24 otherwise, I would not have had access to them. They're absolutely properly before this Board. 25

And in this unusual process that is being 1 2 conducted under what, you know, I'll again called a hastily enacted statute, I submit that 3 the Board should give leeway to the City and 4 5 allow it to present all of the facts that were argued today. This -- Ocean Wind makes it sound 6 like it's of no moment to take these easements 8 and property consents, because no one will see these cables, no one will hear these cables and 9 no one will smell theses cables. No one will 10 11 know they're there. Ocean City will know 12 they're there. The Ocean -- the power of the 13 Ocean City elected officials has been incerpt 14 (Phonetic) by the state legislature and turned 15 over to the BPU for the benefit of Ocean Wind. 16 This is not a commentary on Offshore Wind 17 projects. This is a statement and an argument focused entirely on the statute under which the 18 19 Board is pursuing. And Ocean City objects to property rights being taken away from it against 20 21 its will, particularly when there is another 22 viable alternative, the objections to which have 23 been overcome by the petitioner in another 24 location. Thank you, sir. PRESIDENT FIORDALISO: 25 Thank you.

```
1
    Now, Rate Counsel, do you wish to make a
2
    rebuttal?
3
                MR. LIPMAN: Very quickly, Mr.
4
    President.
                Just a couple of things. One, I'll
5
    agree with some of the things that Mr.
    Eisenstark said. And I also -- you know, I have
    a lot of respect for Mr. Eisenstark, but a
8
    couple of things I just wanted to point out.
    One -- well, Ocean Wind did respond to all
9
    questions. Some of those responses were
10
11
    objections and refusal to respond -- to provide
12
                So, we did not get answers to every
    an answer.
13
    question we asked.
                        But I agree with him that
14
    the issues that Ocean City raises today, they're
15
    important issues that I wish they had been
    raised earlier, because these are issues that we
16
17
    would have probed and we would have liked to
    have gotten some more information on.
18
19
    would have made a more robust record before the
    Board so the Board have everything in front of
20
    it that it needs to make a finding that's
21
22
    reasonably necessary.
23
                And, again, I'm not taking a
    position as to who's right and who's wrong.
24
                                                   To
    me, what's most important is the Board has a
25
```

```
1
    full record in front of it so they could make a
2
    good decision on what is reasonably necessary.
                 PRESIDENT FIORDALISO:
3
                                         Thank you,
4
    Mr. Lipman.
5
                 MR. LIPMAN:
                              Thank you.
                 PRESIDENT FIORDALISO: And I thank
6
7
    all of the attorneys who have made their
8
    presentations and their rebuttals.
9
                 Do any of my colleagues have any
10
    questions or comments they wish to make at this
11
    time?
12
                 COMMISSIONER SOLOMON:
                                         I have a
13
    question.
14
                 PRESIDENT FIORDALISO: Yes.
15
                 COMMISSIONER SOLOMON:
                                        Yes.
                                               With
16
    respect to discussion on cost, is it the
17
    position of counsel that the only time that the
    BPU should be interested or explore issues of
18
    cost is when the OREC is being determined?
19
20
                 PRESIDENT FIORDALISO:
                                         Is that
21
    directed to someone specifically, Commissioner?
                 COMMISSIONER SOLOMON:
22
                                         I think
23
    they've both spoken about cost.
24
                 PRESIDENT FIORDALISO:
                                         Right.
25
                 COMMISSIONER SOLOMON:
                                        And the cost
```

And, you know, perhaps Rate Counsel, you 1 issue. 2 know, as a follow-up to that may want to distinguish this proceeding from what is 3 traditionally we experienced with what is 4 offered in, you know, let's say, municipal land 5 use proceeding for a pipeline or a different 6 type of line and the information that is 7 8 garnered for the Board to review in those cases. 9 MR. EISENSTARK: Commissioner Solomon, it's Greg Eisenstark. Let me perhaps 10 11 go first and others can go after me if they'd 12 like. Yeah. I mean, you know, your question 13 was, is the time of the OREC prices are set, is 14 that the only time the Board should be concerned 15 with cost. I think that's the primary time the Board should be concerned with cost or a 16 17 Qualified Offshore Wind project, because as I 18 said earlier, and as everyone is aware, these 19 are competitive solicitations. A lot of -- you know, a lot of work goes into the project's 20 21 submission of its -- of its proposed OREC 22 prices. And, you know, there's a lot of 23 analysis, there's a lot of assumptions made about inflation, future costs, you know, and 24 there's a lot of guesswork going in. 25 So I

think, you know -- not guesswork, but a lot of analytical work going in that's the basis for that. So, yes, that's the primary time, because those OREC prices are set over the life of the project and there's very limited circumstances where they can be adjusted. And this proceeding doesn't involve one of the circumstances under which the OREC price can be adjusted. We -ocean Wind doesn't have the ability to come to the Board and say, "Hey, you know what, we thought it was going to cost us X to build the onshore portion of the cable from landfall to the substation. It turns put it's going to cost us twice as much." The project doesn't have the ability to do that. That means the project -if that happens, the project is going to, you know, ultimately earn less on its investment. It's unlike a utility. So it's far different than a utility filing under the other statutory scheme which is similar in some ways, but different in other ways, and that is N.J.S.A. 40:55D.19, you know, when an electric or gas utility comes to the Board and says override municipal zoning authority. In that instance, the Board should -- is more properly concerned

```
with cost in that petition, because it's a
1
2
    regulated utility and the utility is going to
    seek to recover all the costs. Here, Ocean
3
    Wind, you know -- that's not the way OWEDA was
4
5
    set up and that's not the way the Board did the
    solicitation is the best way I could put it.
    The price was set in 2019 and it really is not
8
    going to be adjusted here one-way or the other.
    So that's about the best way I could answer your
9
    question. Thank you.
10
11
                 PRESIDENT FIORDALISO: Any other
12
    counsel want to make any comments on the
13
    Commissioner's question?
14
                MS. McCROSSON: Yes, sir, I would
15
    like to respond.
                 PRESIDENT FIORDALISO:
16
                                        Sure.
17
                MS. McCROSSON: An opinion of Ocean
18
    City, the cost is absolutely relevant to whether
19
    going through Ocean City is reasonably
    necessary. And going through Ocean City is not
20
    amiss with whether those easements are
21
22
    reasonably necessary. To take an extreme
23
    hypothetical, if the Great Egg Harbor route, or
24
    any of the other alternate routes that were
    identified by Ocean Wind costs less than going
25
```

2 that going through Ocean City and taking those easements would be reasonably necessary? 3 would be another viable alternative route. 4 Therefore, taking the easements could not be 5 reasonably necessary. So, of course, the costs are relevant. Even outside consideration of the 7 8 -- setting the price of the OREC. 9 MR. LIPMAN: So -- this is Brian. And I know this was partially addressed to me, 10 11 so I want to respond to what was asked of me. 12 Under municipal land use law, cost is a factor 13 that the Board considers when looking at whether 14 something is reasonably necessary. What's 15 important to remember, though, is that cost is not the only factor, and it doesn't mean that 16 17 you necessarily have to take the cheapest route. If there's a better -- or not better. But if --18 19 I think Mr. Eisenstark actually set the standard earlier. It doesn't have to be the best route, 20 21 it has to be the reasonable route. But the 22 Board does look pursuant to Supreme Court 23 precedent at how much the cost was for each of the alternatives, and that is one of the factors 24 that the Board considers when looking at whether 25

through Ocean City, how could the Board find

1

```
1
    the route is reasonably necessary. And, we do
2
    believe the Board should have been able to look
3
    at that in this case.
                            I know that Mr.
    Eisenstark adamantly disagrees with me on that.
4
5
    And for that reason, we don't have the cost in
    front of the Board in this case. So, I don't
6
    know what else to say. The costs are not
7
8
    available, so we can't determine whether they
    factor in favor or against or find it reasonably
9
10
    necessary.
11
                PRESIDENT FIORDALISO:
                                        Thank you.
12
    Anyone else have questions, comments?
13
                COMMISSIONER CHIVUKULA: Yeah.
14
    Thank you, Mr. President. I just have a
15
    question. I think Ocean City raised a question
16
    about the BOEM's environmental impact statement.
17
    And is that too late to consider? I don't know
    what Greg Eisenstark thinks about that.
18
19
    this all should be part of the decision-making
    process; is that correct?
20
21
                MR. EISENSTARK: Commissioner, I
22
    think your question may have been addressed to
23
         I'll try to answer it. You know, the Draft
24
    Environmental Impact Statement was issued by
25
    BOEM just a few days ago. From our perspective,
```

it really has nothing to do with this 1 2 proceeding. I mean, this -- the Board -there's a record in this proceeding that's based 3 on the testimony filed and the Petitioner's 4 response to the Board's supplemental questions and the Board's, you know, response to Rate Counsel's questions. It's not appropriate for 8 the Board to consider, you know, the record in some other proceeding here. I mean, there are many different issues that BOEM looks at in a 11 Draft Environmental Impact Statement. 12 involves, you know, literally dozens of federal 13 environmental laws which, quite frankly, have 14 nothing to do with this filing whatsoever. So, 15 I'm not sure what the suggestion, you know -the Draft Environmental Impact Statement is a 16 public document. It's publicly posted and 17 18 anyone can certainly look at it. But, again, 19 you know, the record in BPU proceedings, the record is limited normally to the evidence, the 20 file testimony, the other documentary evidence 21 that's before the Board. And I'm not sure it 22 23 would be appropriate for the Board to allow, you 24 know, every public document that may be issued by another state or another federal agency about 25

5

6

9

this project into the record here. The focus, as President Fiordaliso said here at the outset in his opening statement, is very narrow. It's under the specific relief requested under these provisions of OWEDA and I think that's what the Board should focus on.

COMMISSIONER CHIVUKULA: Thank you.

I have a question for Rate Counsel. And my question is that, you had said that -- Mr.

Lipman repeatedly said that he didn't have enough information of not -- for him to probe into. And what was the reason? And that not -- information not being provided? Was that not enough time to probe into? I'm just curious about that.

MR. LIPMAN: The way this process was set up, there was no basis -- no discovery allowed under the process. We were not permitted to ask discovery. I reached out to Mr. Eisenstark. Mr. Eisenstark agreed to accept our questions and to answer them, but that was really between the two of us. The procedural schedule did not allow for discovery after the filing of rebuttal testimony. There was -- by the Company. Normally, we would have asked some

questions, some follow-up questions in a 1 2 different type of proceeding. And then the 3 Company would answer them and then we would proceed. We didn't have that opportunity here. 4 Once rebuttal testimony was filed, we moved on 5 6 to oral argument. So it was just -- it was a very different process, one that, quite frankly, 8 we're not used to. And it didn't allow for us to get -- to ask the kinds of questions we would 9 normally ask. 10 11 COMMISSIONER CHIVUKULA: Thank you 12 for that. I just have -- I know my question to 13 Greg Eisenstark is that, I know you're not a 14 utility, because Ocean Wind is not a utility. 15 But, typically, it's usually engage in 16 settlement discussions. Was there any type of 17 approach to that or it just came for the oral 18 argument? 19 MR. EISENSTARK: Yes, Commissioner. 20 I think that question was addressed to me. And, 21 you know, I won't go into any details about any 22 settlement discussions that may have taken 23 place, because that wouldn't appropriate in this context. But I will say that there have been 24 settlement discussions between Ocean Wind and 25

```
1
    Ocean City. I won't go into details about what
2
    they were. I will say that Ocean Wind did make
3
    a formal written settlement proposal to Ocean
    City as part of that process. But, you know,
4
5
    obviously because we're here today, there has
    been no settlement. So, you know -- and I think
6
    we said this in our file petition, Ocean Wind
7
8
    would prefer to reach a voluntary agreement with
9
    Ocean City. We would have preferred to have
    done that years ago. We tried our best.
10
11
    prefer to do it now as we sit here today. But,
12
    unfortunately, we've not been -- the parties
13
    have not been able to reach an agreement and
14
    that's why we're before the Board.
15
                COMMISSIONER CHIVUKULA: Thank you.
                PRESIDENT FIORDALISO: Does Ocean
16
17
    City want to respond to any of Commission
    Chivukula's questions?
18
19
                                 No, thank you.
                MS. McCROSSON:
                PRESIDENT FIORDALISO: Okay. Just
20
21
    wanted to give you the opportunity to do so.
22
                MS. McCROSSON:
                                 Appreciate it.
23
                PRESIDENT FIORDALISO: Are there any
24
    other questions or comments?
25
                COMMISSIONER SOLOMON: Yes, I have
```

1 one more. To, I guess, Rate Counsel and the 2 issue that Commissioner Chivukula raised regarding process. You know, as this is a, you know, case, basically, first impression to some 4 extent, you know, is what you're suggesting that 5 you have concerns about the procedure that were 6 setting forth for future petitions, is that what 7 8 you're raising in your comments? Am I understanding that properly? 9 MR. LIPMAN: Yes, Commissioner. 10 I 11 think going forward -- and I know there's 12 another one pending already and I'm certain 13 there will be more. I think building discovery 14 into the process would be extremely useful and 15 even perhaps a discovery conference, some type 16 of ability for Rate Counsel and the Company to 17 -- the Company respond to Rate Counsel's questions would be extremely helpful for Rate 18 19 Counsel to then formulate some type of position so that we have the information in front of us 20 so we would feel comfortable. 21 22 And, frankly, a lot of the issues 23 raised today by Ocean City would have been 24 flushed out in discovery and not come up today

I hope.

in front of us had we had that process.

I can't make any promises, but I would hope that 1 2 that would be resolved before we got here. 3 PRESIDENT FIORDALISO: Okay. Any 4 over questions or comments? COMMISSIONER HOLDEN: President 5 Fiordaliso? 6 PRESIDENT FIORDALISO: Yes. 7 8 COMMISSIONER HOLDEN: I just have 9 one question for Ms. McCrosson. You mentioned two historic bridges. Are they listed on the 10 11 National Register of Historic Places or the 12 state register? 13 MS. McCROSSON: Commissioner, I'm 14 not sure if they are or not, but neither of them 15 Both of them have completely demolished exists. 16 and replaced in the last 20 years. And it's 17 that kind of criteria or that kind of, I'll call it an excuse, for discarding the Great Egg 18 19 Harbor alternative route. That calls into question the analysis. Isn't Ocean Wind just 20 21 going through Ocean City because it's 22 economically expedient? Does that economic 23 expedience translate into being reasonably 24 necessary? Or if there's another way that it could be done addressing all of the 25

environmental challenges that they're evidently able to address elsewhere, why go through Ocean It's not reasonably necessary. You can go somewhere else. And that's the basis for Ocean City's response. And if the Board were open to an adjournment so that the arguments which counsel believes were made for the first time today could be presented, I'd be happy to present a copy of the BOEM Draft Environmental Impact Statement issued just a few days ago in support of Ocean City's arguments. You know, if we were in court and new evidence came up shortly prior to a hearing, a court would have the ability to delay its decision to consider the additional argument or evidence. And I ask the Board to consider delaying its opinion -its decision and to allow perhaps limited discovery if Rate Counsel still has unanswered questions and to allow Ocean City to substantiate the arguments made based on the Draft Environmental Impact Statement. COMMISSIONER HOLDEN: Thank you. PRESIDENT FIORDALISO: Thank you. Any other counsel want to make any other comments on that?

24

1	MR. EISENSTARK: Yes, President
2	Fiordaliso, and not to prolong it, but I just
3	want to briefly respond to the last statement
4	that Ms. McCrosson made. This isn't new
5	evidence. The EIS process has been ongoing for
6	years now. There have been public documents
7	filed and available on the BOEM website for
8	years. The problem is, Ocean City is did not
9	follow the procedures that the Board outline for
10	this process. They had every opportunity to
11	file testimony of a witness raising all of the
12	issues that Ms. McCrosson claimed she just
13	discovered shortly before this oral argument.
14	They didn't do so. Had they done so, Ocean Wind
15	could have addressed them in its rebuttal
16	testimony. So to consider those issues now or
17	to delay this proceeding because Ocean City
18	simply didn't play along and is now
19	interjecting attempting to interject new
20	issues at the end, is unfair to Ocean Wind and
21	it's unfair to the Board and the process that
22	the Board has set out. So we oppose the
23	suggestion that there's new evidence. We were
24	not sure, because, again, it's a statement read
25	by counsel, you know, at the very end of oral

argument and, you know, we don't know exactly 1 2 what it is or what it's based on. We don't even 3 know if it's even relevant. So we object to the attempts that Ocean City is apparently making 4 5 here and to prolong this proceeding based on alleged new evidence. It's just completely 6 inappropriate. They had the ability to raise 7 8 these issues months ago. They failed to do so. And they shouldn't be given the opportunity to 9 prolong this proceeding because of their own 10 11 inaction. 12 PRESIDENT FIORDALISO: I'll give 13 Ocean City an opportunity to respond if they'd 14 like. 15 MS. McCROSSON: Thank you, Mr. President. My final point would be that if the 16 17 Commission feels that the lack of discovery in this process has had an impact on the process 18 19 and has affected the ability of any of the parties, including Rate Counsel, to opine on the 20 issue at hand, and if that evaluation is going 21 22 to result in a change in the process in the 23 future, so that when Cape May County is dragged through this process there will be a discovery 24

opportunity, then there should be a discovery

opportunity in this process as well, so that there's fairness to the city of Ocean City, the first municipality to go through this new process.
