Acting Secretary of the Board
Board of Public Utilities
44 South Clinton Avenue, 1st Floor
P.O. Box 350
Trenton, New Jersey 08625-0350

RE: In the Matter of the Petition of Atlantic City Electric Company for Approval of
a Voluntary Program for Plug-In Vehicle Charging
BPU Docket No. EO18020190

Dear Acting Secretary Diaz:

The undersigned is Assistant General Counsel serving on behalf of Atlantic City Electric Company (“ACE” or “the Company”). Pursuant to the February 17, 2021 Order Approving Stipulation of Settlement in the above captioned proceeding, the Company is required to make an annual Informational Filing “with the Board (with copies to the Signatory Parties) . . . no later than March 1, 2022 for the calendar year 2021 period.” Accordingly, please accept the enclosed Informational Filing as ACE’s timely compliance with this requirement.

Consistent with the Order issued by the New Jersey Board of Public Utilities in connection with *In the Matter of the New Jersey Board of Public Utilities’ Response to the COVID-19 Pandemic for a Temporary Waiver of Requirements for Certain Non-Essential Obligations*, BPU Docket No. EO20030254, Order dated March 19, 2020, these documents are being electronically filed with the Secretary of the Board and the Signatory Parties. No paper copies will follow.

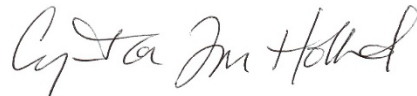

Carmen D. Diaz

**IN THE MATTER OF THE PETITION
OF ATLANTIC CITY ELECTRIC
COMPANY FOR APPROVAL OF A
VOLUNTARY PROGRAM FOR
PLUG-IN VEHICLE CHARGING**

**STATE OF NEW JERSEY
BOARD OF PUBLIC UTILITIES
BPU DOCKET NO. EO18020190**

**ANNUAL INFORMATIONAL FILING REPORT OF
ATLANTIC CITY ELECTRIC COMPANY**

Atlantic City Electric Company (“ACE” or “The Company”) submits to the New Jersey Board of Public Utilities (the “Board” or “BPU”) its annual electric vehicle informational filing in accordance with the Stipulation of Settlement executed on the 2nd day of February, 2021, by and among ACE, the Staff of the New Jersey Board of Public Utilities (“Board Staff” or “Staff”), the New Jersey Division of Rate Counsel (“Rate Counsel”), ChargePoint, Inc. (“ChargePoint”), EVgo Services LLC (“EVgo”), and Tesla, Inc. (“Tesla”) (hereafter referred to as the “Signatory Parties”). The Stipulation of Settlement resolved all issues pertaining to the above-captioned voluntary program for electric vehicle (“EV”) charging infrastructure filed by the Company on February 22, 2018 (“Original EV Petition”), and substantially revised and expanded by ACE pursuant to an Amended Petition filed on December 17, 2019 (“Amended EV Petition”). By Order dated February 17, 2021, the Board adopted the Stipulation of Settlement in its entirety.

With this filing, ACE provides the Board with the required reporting regarding the implementation of its approved electric vehicle charging program offerings, from the time period spanning from program approval to December 31, 2022.

I. EXECUTIVE SUMMARY

ACE respectfully submits this annual electric vehicle informational filing. Since the program commenced, ACE has approved 73 applications, 69 of which were residential, and 4 of which were mixed-commercial. The total number of installed ports as a result of the completed applications were 87, and incentives paid to customers were \$115,851.90. Across all programs there are also 178 applications in varying stages of approval, as well as 127 applications in “Unsupported Equipment” status. This means that these customers have charging equipment that is not currently supported by the program due to either it having a proprietary connector, the provider has currently not been onboarded. These customers are encouraged to update their charging information with a program approved EV charger, or added to a queue and later contacted when the network provider supporting their equipment is onboarded into the program. Please note, this requirement only pertains to the incentive programs and not the EV TOU rate option which ACE will be providing to its customers in the future. The largest portion are customers with Tesla wall connectors which are a proprietary plug type that is currently prohibited by our stipulation.

II. INTRODUCTION

Consistent with ACE’s representation per the 2021 Informational filing, the following report provides program summaries and details the total number of customers participating in the Residential, Mixed-use commercial, and Public DCFC make-ready incentive programs. The report also provides the total number and amount of Make-Ready rebates issued, and the total number of L2 and DCFC charging ports installed as a result of the Make-ready programs.

III. RESIDENTIAL CHARGING PROGRAM PARTICIPATION AND IMPACT HIGHLIGHTS

Residential Portfolio Program Summary

As of December 31, 2022, ACE has approved a total of 69 residential applications for a total \$42,851.90 in Make ready incentives. There are also 140 residential applications in varying stages of approval, as well as 127 in “Unsupported Equipment” status.

Residential Charging Deployment Data Summary

Consistent with the 2021 informational report, the below tables provide the implementation metrics for the residential EV charging program detailing customer participation and approved application statistics. No customers have enrolled in Offering 1(a) the Residential Plug In Vehicle (“PIV”) Time of Use (“TOU”) rate, as it is not currently available. ACE continues to collect and analyze charging data from the program to conduct a Cost of Service study.

Total Residential EV Program Offering Enrollments and Rebates Remitted

Data Points	
Total Number of Customers enrolled in Offering 1(a)	0
Total number of residential make ready rebates issued	69

Total Residential EV Program Offering Rebates Remitted by EVSE Vendor

Data Points	ChargePoint	Enel X	Total
Number of residential make ready rebates issued by EVSE vendor	47	22	69

IV. MULTIFAMILY CHARGING PROGRAM PARTICIPATION AND IMPACT HIGHLIGHTS

Multifamily Charging Portfolio Offering Summary

As of December 31, 2022, 8 applications are currently in progress for a total of 45 charging ports. However, ACE has not finalized approval for any incentives for multifamily charging applications at this time.

Multifamily Charging Deployment Data Summary

Consistent with the 2021 informational report, the below tables provide the implementation metrics for the Multifamily EV charging program detailing approved customer applications.

Total Multifamily EV Program Rebates Remitted

Data Points	
Total Number of multifamily make ready rebates issued	0
Number of multifamily make ready rebates issued for installation in overburdened communities	0

Total Residential EV Program Offering Rebates Remitted by EVSE Vendor

Data Points	Company 1	Company 2	Total
Number of multifamily make ready rebates issued by EVSE vendor	NA	NA	NA

V. **WORKPLACE CHARGING PROGRAM PARTICIPATION AND IMPACT HIGHLIGHTS**

Workplace Charging Portfolio Offering Summary

As of December 31, 2022, ACE has approved 1 application for 5 dual-port Workplace chargers for a total of 10 ports. There are also 9 applications, equating to 26 ports that are currently in progress. All installed chargers at this time are ChargePoint chargers. The total amount of incentive paid to customers for approved applications is \$45,000.

Workplace Charging Data Summary

Consistent with the 2021 informational report, the below tables provide the implementation metrics for the Workplace EV charging program detailing approved customer applications.

Total Workplace EV Program Offering Rebates Remitted

Data Points	
Total number of workplace charging make ready rebates issued	1

Total Workplace EV Program Offering Rebates Remitted by EVSE Vendor

Data Points	ChargePoint
Number of workplace make ready rebates issued by EVSE vendor	1

**VI. FLEET CHARGING PROGRAM
PARTICIPATION AND IMPACT HIGHLIGHTS**

Fleet Charging Portfolio Offering Summary

As of December 31, 2022, ACE has approved 1 application for fleet charging, consisting of 2 ChargePoint chargers, totaling 4 ports. The total amount of incentives paid to customers for approved applications is \$10,000. There are no applications in progress at this time.

Fleet Charging Data Summary

Consistent with the 2021 informational report, the below tables provide the implementation metrics for the Fleet EV charging program detailing approved customer applications.

Total Fleet EV Program Offering Rebates Remitted

Data Points	
Total Number of fleet charging make ready rebates issued	1

Total Fleet EV Program Offering Rebates Remitted by EVSE Vendor

Data Points	ChargePoint
Number of fleet make ready rebates issued by EVSE vendor	1

VII. PUBLIC CHARGING PROGRAM PARTICIPATION AND IMPACT HIGHLIGHTS

Public Charging Portfolio Offering Summary

As of December 31, 2022, ACE has approved 2 public level 2 applications totaling 4 ports for publicly available charging stations as part of its voluntary EV program. There are also 21 applications in progress equating to a total of 39 ports between DCFC and L2 stations. ACE has not finalized approval for any Public charging incentives at this time.

Public Charging Data Summary

Consistent with the 2021 informational report, the below tables provide the implementation metrics for the Public EV charging program for L2 and DCFC programs, detailing approved customer applications.

Total Multifamily EV Program Offering Rebates Remitted

Data Points	
Total Number of public charging make ready rebates issued	2

Total Public L2 EV Program Rebates Remitted by EVSE Vendor

Data Points	ChargePoint
Number of public Level 2 make ready rebates issued by EVSE vendor	2

Total Public DCFC EV Program Rebates Remitted by EVSE Vendor

Data Points	Company 1	Company 2	Total
Number of public DCFC make ready rebates issued by EVSE vendor	NA	NA	NA
