BPU Docket No. ER23020060

PLEASE TAKE NOTICE:

On February 1, 2023, Jersey Central Power & Light Company (“JCP&L” or “Company”) filed a verified petition (“Petition”) with the New Jersey Board of Public Utilities (“Board”) for the review and approval of the deferred balances accumulated with respect to the Solar Renewable Energy Certificate Financing Component (“SREC Component”), Transition Renewable Incentive Program Component (“TREC Component”), Solar Successor Incentive Program (“SuSI Program”), and Energy Efficiency and Conservation Program Component (“EE&C Component”) of its Rider RRC-RGGI Recovery Charge (“Rider RRC”) through December 31, 2022. Rider RRC allows the Company to recover the costs of demand response, energy efficiency, and renewable energy programs as directed by the Board. JCP&L’s proposed changes to the other Board-approved rate components of the Rider RRC are shown in Table #1.

The proposed changes to the various components of the Rider RRC, as set forth above, result in an overall increase to the composite Rider RRC rate from \$0.001451 per kWh, exclusive of sales and use tax (“SUT”), to \$0.003406 per kWh, exclusive of SUT. With the proposed changes to the four (4) rate components of the Rider RRC, annual revenues from Rider RRC are projected to increase by approximately \$38.953 million.

To permit customers to determine the approximate effect of the proposed increase in the Rider RRC rate, comparisons of present and proposed rates are shown in Table #2. The Company will, upon request, furnish any assistance required by customers in this regard.

The Board, in its discretion, may apply all or any portion of a rate adjustment to other rate schedules, or in a different manner than what JCP&L has proposed in this filing. Accordingly, the

final rates and charges will be determined by the Board in this proceeding and may be different from what JCP&L described and provided in the Petition.

Notice of this filing, together with a statement of the effect thereof on customers, is being served upon the clerk, executive, and/or administrator of each municipality and county within the Company's service area. Such notice has also been served, together with the supporting attachments, upon the office of the New Jersey Division of Rate Counsel ("Rate Counsel"), who will represent the interests of ratepayers in these proceedings.

Building limits to soon start in areas prone to flooding

Continues from A1

“As a national model for climate adaptation and mitigation, we can no longer afford to depend on 20th-century data to meet 21st-century challenges,” Murphy said in a statement Tuesday. “This rule’s formation and upcoming adoption testify to our commitment to rely on the most up-to-date science and robust stakeholder engagement to inform our most crucial policy decisions.”

Responding to various comments, the New Jersey Department of Environmental Protection (NJDEP) said “it acknowledges that those living in flood-prone areas will still be living in flood-prone areas after adoption of these rules. However, applicants and the department will stop using backward-looking data to justify adding more unprotected development into flood-prone areas.”

New Jersey will use current and future

rainfall rates instead of figures from 1999 to regulate new construction in inland areas along rivers affected by non-tidal stormwater runoff. Moreover, the NJDEP will raise flood hazard zones by 2 feet in those areas and update how stormwater runoff should be mitigated.

The rule was filed last Friday and is slated to become effective this July. As of Tuesday afternoon, it was not disclosed when in July the rule will take effect.

Rutgers’ 2022 “State of the Climate Report” outlined that, due to climate change, fiercer storms are bound to pound the state in the years and decades to come.

Estimates by the NJDEP show that by 2050, sea level rise in New Jersey could exceed 2 feet. The state could see that swell to slightly over 5 feet by the century’s end.

The likelihood of a 100-year storm is expected to increase by as much as 50% in some New Jersey counties in the coming decades and 24% in others, according to

Vincent Mazzei, assistant commissioner of Watershed and Land Management at the department.

In discussing the need for the rule, environmentalists on multiple occasions have lambasted Murphy’s administration for allegedly delaying its adoption.

Developers and business leaders, however, called for the normal rule process — saying thousands of development projects would be needlessly subject to the emergency proposal.

The groups previously estimated that 5% to 10% of the buildable area of the state — about 200,000 to 400,000 acres — would be affected by the plan.

Ray Cantor, deputy chief government affairs officer for the New Jersey Business & Industry Association, said Tuesday that while his group was still reviewing the rule, it was in favor of an important change that applies to “dozens, if not hundreds of projects,” he claimed.

“(We) are pleased to see that the DEP listened to the concerns of the business and development community regarding the unfair application of new standards to projects that were previously outside the flood hazard area,” Cantor said. “The changes that were made on adoption will allow numerous projects that have been designed, obtained financing, and received local approvals to now move forward bringing affordable housing and economic benefits to the state.”

State officials did not immediately clarify how many proposed projects did not have to adhere to the new rule.

Tuesday’s announcement also came about four months after Murphy said New Jersey will aim for 100% clean energy by 2035 instead of 2050. The state will also, the governor said earlier this year, look to require all new cars sold here to be fully electric in 12 years — a timeline some advocates have cast doubt on.

Biden review of chaotic Afghan withdrawal blames Trump

By Zeke Miller and
Norman Merchant
The Associated Press

WASHINGTON — President Joe Biden's administration on Thursday laid the blame on his predecessor, President Donald Trump, for the deadly and chaotic 2021 withdrawal of U.S. troops from Afghanistan that brought about some of the darkest moments of Biden's presidency.

The White House publicly released a 12-page summary of the results of the so-called "hotwash" of U.S. policies around the ending of the nation's longest war, taking little responsibility for its own actions and asserting that Biden was "severely constrained" by Trump's decisions.

It does acknowledge that the evacuation of Americans and allies from Afghanistan should have started sooner, but blames the delays on the Afghan government and military, and on U.S. military and intelligence community assessments.

The brief document was drafted by the National Security Council, rather than by an independent entity, with input from Biden himself. The administration said detailed reviews conducted by the State Department and the Pentagon, which the White House said would be transmitted privately to Congress on Thursday, were highly classified and would not be released publicly.

"President Biden's choices for how to execute a withdrawal from Afghanistan were severely constrained by conditions created by his predecessor," the White House summary states, noting that when Biden entered

office, "the Taliban were in the strongest military position that they had been in since 2001, controlling or contesting nearly half of the country."

The report does fault overly optimistic intelligence community assessments about the Afghan army's willingness to fight, and says Biden followed military commanders' recommendations for the pacing of the drawdown of U.S. forces.

"Clearly we didn't get it right," National Security Council spokesman John Kirby said Thursday, but sidestepped questions about whether Biden has any regrets for his decisions and actions leading up to the withdrawal.

Kirby said of the report that "the purpose of it is not accountability," but rather "understanding" what happened to inform future decisions.

The White House asserts the mistakes of Afghanistan informed its handling of Ukraine, where the Biden administration has been credited for supporting Kyiv's defense against Russia's invasion. The White House says it simulated worst-case scenarios prior to the February 2022 invasion and moved to release intelligence about Moscow's intentions months beforehand.

"We now prioritize earlier evacuations when faced with a degrading security situation," the White House said.

In an apparent attempt to defend its national security decision-making, the Biden administration also notes that it released prewar warnings over "strong objections from senior officials in the Ukrainian government."
