**Subject:** [EXTERNAL] Enact a Moratorium On Gas And Gas Infrastructure!  
**Date:** Friday, September 1, 2023 9:06:19 PM

---

To the Members of the Board:

GHG emissions have already gone a long way toward destroying our planet and more and worse will keep happening without swift reversals of our current practices.

As a NJ resident who loves planet earth and all its intricate and interdependent ecosystems on which we all depend, I am writing to tell you, Board Members of NJ Public Utilities, to stop making it worse. You can do that by ENACTING A MORATORIUM on approving any gas or infrastructure projects other than those needed to ensure the safety of the current gas distribution systems until a plan is in place to meet the State's clean energy (100% by 2035) and carbon reduction goals (50% by 2030).

I hope that your own senses of long-term self-preservation - for yourselves and your families - will guide you on this obviously necessary path. It is also the moral thing to do.

Sincerely,  
Judith Green, PhD
