CERTIFICATION OF PHILIP J. PASSANANTE

PHILIP J. PASSANANTE, of full age, certifies as follows:

1. I am an Attorney at Law of the State of New Jersey and serve as Assistant General Counsel to Atlantic City Electric Company ("ACE") in connection with the above-referenced matter, with which I am familiar.
2. I hereby certify that, based upon Proofs of Publication duly received from the publishers, copies of the Notice of Filing and Public Hearing (the "Notice") attached hereto as **Exhibit A** were published in The Press of Atlantic City (**Exhibit B**) on August 22, 2023, in the Burlington County Times (**Exhibit C**) on August 24, 2023, the Courier Post (**Exhibit D**) on August 23, 2023, and the South Jersey Times (**Exhibit E**) on August 23, 2023.
3. I further certify that, on August 23, 2023, copies of the Notice were forwarded to municipal and county clerks by First Class Mail. A copy of the cover letter and Service List is attached as **Exhibit F**.
4. I further certify that the Notice was posted on the "Public Postings" page of the ACE website, www.atlanticcityelectric.com/PublicPostings. A reference to ACE's Public Postings page appears on all customer bills and has also been posted to ACE's Twitter and Facebook feeds.
5. I further and finally certify that the statements made herein are true and correct to the best of my knowledge, information and belief. I am aware that, if any of the statements made herein are willfully false, I am subject to punishment.

BPU DOCKET NO. ER23030124

PLEASE TAKE NOTICE that, on June 30, 2023, Atlantic City Electric Company (“ACE” or “Company”) and the other New Jersey electric distribution companies (jointly, “EDCs”) filed their “Annual Proposal for Basic Generation Service (“BGS”) Requirements to be Procured Effective June 1, 2024” (“Proposal”) with the New Jersey Board of Public Utilities (“Board” or “BPU”). Also on June 30, 2023, ACE filed its Company Specific Addendum to the Proposal (“Addendum”), requesting that the Board approve BGS procurement through a statewide competitive auction process with new BGS charges to become effective June 1, 2024. BGS comprises the electric generation supply provided to all ACE customers who do not purchase their electricity from a third-party supplier.

The Board mandates that the New Jersey EDCs, including ACE, provide BGS in accordance with the requirements of the Electric Discount and Energy Competition Act (“Act”). BGS is currently procured through a statewide competitive auction process in which the EDCs seek competitive offers for BGS supply from electric generation suppliers. In this auction process, electric generation suppliers bid in a descending-clock auction on specified portions of the electric requirements for BGS customers for each of the EDCs. Since 2001, the Board has approved this type of auction and found that this process meets the statutory requirements of the Act. The Proposal and the Addendum (collectively, “Petition”) are available at <https://www.bgs-auction.com/bgs.auction.regproc.asp>.

The final price for Basic Generation Service – Residential Small Commercial Pricing (“BGS-RSCP”) resulting from the BGS-RSCP auction conducted in 2023 was \$0.09217 per kilowatt (“kW”)-hour (“kWh”), for a 36-month supply period. For the Basic Generation Service – Commercial and Industrial Energy Pricing (“BGS-CIEP”) auction conducted in 2023, the Generation Capacity Charge cleared at \$319.27 per megawatt-day.

The final auction clearing prices for the BGS supply procured in the 2024 BGS-RSCP and BGS-CIEP auctions may be higher or lower than the prices obtained in the 2023 auctions. Auction prices are converted to customer charges, which may be higher or lower than current charges, depending on the outcome of the auction consistent with market conditions. BGS rates also include applicable transmission charges set by the Federal Energy Regulatory Commission (“FERC”). BGS-RSCP and BGS-CIEP rates may change to reflect any increases or decreases in these FERC-approved transmission charges.

By the Petition, the Company proposed to set the criteria for BGS-CIEP eligibility at a peak load share of 500 kW. Customers eligible to be served under the BGS-RSCP rate include customers served under ACE's rate schedules RS, DDC, SPL, CSL, and MGS and AGS customers with a peak load share of less than 500 kW. BGS-CIEP will be the only default supply option available to customers served on rate schedule TGS and to customers served on rate schedules MGS Secondary, MGS Secondary Electric Vehicle Charging, MGS Primary, AGS Secondary, and AGS Primary with a peak load share of 500 kW and higher as of November 1 of the year prior to the BGS auctions. These criteria for BGS-CIEP service are subject to change for this year's procurement at the discretion of the Board.

PLEASE TAKE FURTHER NOTICE that a virtual public hearing is scheduled for the following date and time so that members of the public may present their views on the Petition.

NOTICE TO CUSTOMERS OF ATLANTIC CITY ELECTRIC COMPANY

NOTICE OF FILING AND PUBLIC HEARINGS FOR BASIC GENERATION SERVICE ("BGS") CHARGES PROCURED BY ATLANTIC CITY ELECTRIC COMPANY ON BEHALF OF ITS BGS CUSTOMERS

AND NOTICE OF PROPOSED RECOVERY THROUGH ITS BASIC GENERATION SERVICE CHARGES OF COSTS RESULTING FROM STATEWIDE AUCTION FOR BGS

BPU DOCKET NO. ER23030124

PLEASE TAKE NOTICE that, on June 30, 2023, Atlantic City Electric Company ("ACE" or "Company") and the other New Jersey electric distribution companies (collectively, "EDCs") filed their "Annual Proposal for Basic Generation Service ("BGS") Requirements to be Procured Effective June 1, 2024" ("Proposal") with the New Jersey Board of Public Utilities ("Board" or "BPU"). Also on June 30, 2023, ACE filed its Company Specific Addendum to the Proposal ("Addendum"), requesting that the Board approve BGS procurement through a statewide competitive auction process with new BGS charges to become effective June 1, 2024. BGS comprises the electric generation supply provided to all ACE customers who do not purchase their electricity from a third-party supplier.

The Board mandates that the New Jersey EDCs, including ACE, provide BGS in accordance with the requirements of the Electric Discount and Energy Competition Act ("Act"). BGS is currently procured through a statewide competitive auction process in which the EDCs seek competitive offers for BGS supply from electric generation suppliers. In this auction process, electric generation suppliers bid in a descending-bid auction on specified portions of the electric requirements for BGS customers for each of the EDCs. Since 2001, the Board has approved this type of auction and found that this process meets the statutory requirements of the Act. The frequent and the Addendum (collectively, "Addendum") are available at <https://www.bpu-auctions.com/auctions/register.asp>.

The final price for Basic Generation Service – Residential Small Commercial Pricing ("BGS-RSCP") resulting from the BGS-RSCP auction conducted in 2023 was \$3.69217 per kilowatt ("KW") hour ("KWh"), for a 36-month supply period. For the Basic Generation Service – Commercial and Industrial Energy Pricing ("BGS-CIEP") auction conducted in 2023, the Generation Capacity Charge cleared at \$19.27 per megawatt-day.

The final auction clearing prices for the BGS supply procured in the 2024 BGS-RSCP and BGS-CIEP auctions may be higher or lower than the prices obtained in the 2023 auctions. Auction prices are subject to customer charges, which may be higher or lower than current charges, depending on the outcome of the auction consistent with market conditions. BGS rates also include applicable transmission charges set by the Federal Energy Regulatory Commission ("FERC"). BGS-RSCP and BGS-CIEP rates may change to reflect any increases or decreases in these FERC-approved transmission charges.

By the Petition, the Company proposed to set the criteria for BGS-CIEP eligibility at a peak load share of 500 KW. Customers eligible to be served under the BGS-RSCP rate include customers served under ACE's rate schedules AS, DDC, SPL, CSL, and MGS and AGS customers with a peak load share of less than 500 KW. BGS-CIEP will be the only default supply option available to customers served on rate schedule TGS and to customers served on rate schedules MGS Secondary, BGS Secondary Electric Variable Charging, MGS Primary AGS Secondary, and AGS Tierney with a peak load share of 500 KW and higher as of November 1 of the year prior to the BGS auctions. These criteria for BGS-CIEP service are subject to change for this year's procurement at the discretion of the Board.

PLEASE TAKE FURTHER NOTICE that a virtual public hearing is scheduled for the following date and time so that members of the public may present their views on the Petition.
