metered water and fire service customers and 53,200 sewer service customers as of December 31, 2022.

2. By this Petition, NJAWC is seeking approval of the Municipal Consent – officially Ordinance No. 23-16 adopted by the City on December 18, 2023. The Municipal Consent was introduced and adopted pursuant to N.J.S.A. 48:3-11 to 15, and N.J.S.A. 48:13-11 to permit Petitioner to construct, lay, maintain, and operate the necessary water and wastewater mains, pipes and appurtenances throughout the geographical area of the City (the “Proposed Franchise Area”) and to provide water and wastewater services to the City. A copy of the Municipal Consent is attached hereto as Exhibit A and incorporated into this Petition by reference.
3. The Municipal Consent adopted by the City was part of a sale process conducted in compliance with and pursuant to the procedures set forth in N.J.S.A. 40:62-3 through 40:62-6, in which the City sought public bids for the sale of its water and wastewater Systems (the “Systems”) that serve the City as well as providing water service to portions of the neighboring municipalities of Mannington and Quinton Townships.¹ After review and analysis of the bid submitted by NJAWC, the City awarded the contract to NJAWC, subject to the approval of the voters and the approval of the Board.
4. Thus, the governing body of the City has decided that it is in the public interest for the Systems to be owned and operated by Petitioner. As a result of the acquisition, the governing body realizes that the Systems will be operated by a company that is part of the largest provider of regulated water and wastewater services in the United States. The

¹ The Townships of Quinton and Mannington are in the process of granting municipal consents to NJAWC to continue providing water service to those customers currently being served by Salem. Once adopted, NJAWC will be petitioning for approval of those municipal consents under separate dockets. In addition, by agreement, the City accepts wastewater flow from Quinton and maintains Quinton’s wastewater lift station. At closing, NJAWC will assume that agreement.

Systems will be subject to industry practices followed by Petitioner and its parent organization; high quality and reliable service; and the financial wherewithal to maintain and improve the Systems.

5. In addition to the Municipal Consent, the City adopted Ordinance No. 23-10 approving the agreement of sale between the City and NJAWC and authorizing the placement of the proposed sale of the Systems on the ballot for consideration by the voters in the next general election. (Attached hereto as Exhibit B).
6. Pursuant to N.J.S.A. 40:62-5, on November 7, 2023, the City held a referendum on whether or not to approve the acquisition of the Systems by Petitioner. The referendum resulted in an approval of said acquisition, by the voters of the City.
7. The City encompasses approximately 2.34 square miles and has a population of approximately 5,324 people.
8. The City currently owns and operates the Systems servicing the residents and property owners within the Proposed Franchise Area. The Systems serve approximately 2,309 connections in the City, as well as providing water service to portions of the neighboring municipalities of Mannington and Quinton Township.
9. By this Petition, NJAWC is only seeking approval by the Board of the Municipal Consent. Petitioner is not, at this time, seeking any ratemaking treatment relative to the Systems. Rather, in a separate docket, NJAWC will seek ratemaking recognition for the Systems, as part of a general base rate proceeding.
10. NJAWC and the City have executed an Asset Purchase Agreement (the “Agreement”) for the sale and purchase of the Systems. The Agreement provides for the purchase of the Systems, subject to various contingencies, including the approval by the Board of the Municipal Consent. A copy of the Agreement is attached hereto as Exhibit C. Upon

approval by the Board of the Municipal Consent, the City and NJAWC will complete the transaction.

11. Approval of the Municipal Consent submitted to the Board with this Petition will serve the public interest by permitting NJAWC to begin providing wastewater utility service within the City, and to leverage its experience, expertise and economies of scale to benefit the customers of the City and of NJAWC. NJAWC's significant resources will support more efficient service as well as provide additional system reliability to the City.
12. For the reasons stated above, including the approval of the acquisition of the Systems by the governing body of the City; and the approval by the residents of the City; the granting of approval of the Municipal Consent will serve the public convenience and properly conserve the public interests pursuant to N.J.S.A. 48:2-14. As a result, the Board should approve the Municipal Consent, and address any ratemaking issues in the base rate case to be filed by Petitioner.
13. The Petitioner has not yet commenced water or wastewater service within the service area of the City, covered by the Municipal Consent.

WHEREFORE, Petitioner respectfully requests that the Board approve Ordinance No. 23-16 of the City of Salem and grant such other and further relief as the Board may deem reasonable and appropriate under the circumstances.

Respectfully submitted,

New Jersey-American Water Company, Inc.

EXHIBIT A
DESCRIPTION OF THE SYSTEMS

Salem City Water and Wastewater Systems Descriptions

The following is a summarized description of the City's water and wastewater systems. A more comprehensive description of the City's systems is included in the Remington & Vernick Evaluation Report.

A. Water Supply, Treatment, Storage and Distribution

The existing water supply, treatment and distribution system consists of four (4) actively permitted water supply wells, two (2) surface water intakes, one (1) water treatment plant, one (1) elevated water storage tank, one (1) standpipe and a water distribution system. The age of the water system infrastructure ranges from 1880 to more recent improvements completed as recent as 2014. All four (4) water supply wells are constructed into the Wenonah-Mt. Laurel (WML) Aquifer system. The two (2) water surface water intakes are located at Elkinton Pond and Laurel Lake in neighboring Quinton Township. The wells and surface water supply sources are all piped to a common Water Treatment Plant located on the southerly end of the City corporate limits on Grieves Parkway. The Water Treatment Plant was constructed in 2012 for the treatment of both surface water and well water. Prior to its construction, the wells were treated at each well site and pumped directly to the water distribution system. The surface water had been pumped to the previous water treatment plant, located on the same site, and then pumped into the water distribution system. The new Water Treatment Plant is comprised of an enhanced coagulation pre-treatment system including slow and rapid mix aeration zones, followed by a main treatment system including four (4) low pressure ultrafiltration membrane trains, and two ultraviolet (UV) units for disinfection. The treatment system also includes the addition of sodium hydroxide and sulfuric acid for pH adjustment, aluminum chlorohydrate for coagulation, powdered activated carbon for taste and odor control, a phosphate feed system for sequestration and sodium hypochlorite for post chlorination. A clearwell and set of high service pumps at the plant effluent provide for the appropriate chlorine contact time and distribute the treated water. The plant is designed to treat 2 MGD of both surface and groundwater and is also designed for future expansion up to 3 MGD. The new Water Treatment Plant building is constructed of a pre-engineered steel structure supported by a reinforced concrete foundation. There are also office and storage space located in the new Water Treatment Plant.

The old water treatment facility, which is out of commission, but still on site, consists of

the following:

- One original brick main treatment building with an addition and four (4) horizontal filters partially in the building
- Two (2) steel clarifier tanks
- One (1) masonry block garage
- Various structures used as part of former treatment process

Water storage for the City water supply includes a 1 MG bolted steel standpipe and 1 MG elevated, multi-column (leg supported) steel water storage tank.

The City provides water service to the residents of the City of Salem as well as portions of Quinton Township and Mannington Township. The City owns and operates the infrastructure in the outlying service area including the responsibility of responding to emergency calls.

The water distribution system consists of approximately 21 miles of water main that provides water service to a population size of approximately 5,000 via 2,309 residential water service connections. The distribution infrastructure that the City owns consists of mostly cast or ductile iron pipe with pipe diameters ranging in sizes from 4” up to 12”. The City does not have any emergency interconnections with either public or private purveyors that are adjacent to the City limits.

B. Wastewater Facilities

The existing wastewater system includes a collection and pumping system consisting of three (3) sanitary lift stations and associated force mains, and gravity sewer mains. In addition, the City owns and operates its own Wastewater Treatment Plant for the treatment of the sanitary sewerage. The Wastewater Treatment Plant is near the intersection of Grieves Parkway and West Front Street. The Wastewater Treatment Plant is permitted for up to 1.4 MGD. The age of most of the major treatment components are estimated to be 40 years old.

The Wastewater Treatment Plant consists of the following:

- Screw Pumps with screen system
- Orbal Tank
- Clarifiers
- Digester Tanks
- Effluent Tank

The Wastewater Treatment Plant effluent, after treatment, outfalls to the Salem River.

The wastewater discharge limits are included in the City's New Jersey Pollutant Discharge Elimination System (NJPDES) Permit No. NJ0024856.

Similar to the water distribution system, the wastewater collection system is a mixture of newer and older components, ranging in pipe diameter sizes from 6" to 8". The existing sanitary system is estimated at fifteen (15) miles of gravity main and approximately two (2) miles of force main associated with the lift stations. The age and materials used in the system is mostly unknown at this time.

The City does not own any of the sanitary laterals from the main to the residences. The City is responsible only for main repairs and property owners are responsible for the sewer lateral up to the main. The City also accepts flow from Quinton Township and maintains the lift stations pumping from Quinton Township into the City.

FORM OF ASSIGNMENT AND ASSUMPTION AGREEMENT

THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (the “Assignment and Assumption Agreement”) is made and entered into on [_____] by and between the City of Salem, a public body corporate and politic in Salem County in the State of New Jersey (the “Assignor”) and New Jersey Water Company, Inc., a New Jersey Public Utility Corporation with principal corporate offices at 1 Water Street, Camden, NJ 08102 (the “Assignee”). To the extent that the Assignment contemplated by this Section 1 constitutes or would be deemed to constitute a grant, sale, assignment, transfer, conveyance, or delivery, or an attempted grant, sale, assignment, transfer, conveyance, or delivery to the Assignee of any Assumed Liabilities, and such transaction would be prohibited by any applicable law or would require any governmental or third party authorizations, approvals, consents, or waivers, and such authorizations, approvals, consents, or waivers have not been obtained prior to the date hereof, this Assignment and Assumption Agreement shall not constitute a grant, sale, assignment, transfer, conveyance, or delivery, or an attempted grant, sale, assignment, transfer, conveyance, or delivery thereof. Following the date hereof, the parties shall cooperate and use commercially reasonable best efforts to obtain promptly such authorizations, approvals, consents, or waivers, and to obtain novations or other agreements if appropriate and, after obtaining such, to complete the transactions contemplated hereby. Pending such authorization, approval, novation, consent, or waiver, the parties shall cooperate with each other in any reasonable and lawful arrangement designed to provide the economic costs and benefits of the Assumed Liabilities to the Assignee. To the extent possible,

performance obligations of Assignor with respect to any such Assumed Liabilities shall be deemed to be subcontracted to the Assignee.

Section 2. FURTHER ASSURANCES. The Assignor and the Assignee each covenants and agrees to execute and deliver, at the request and expense of the other party hereto, such further instruments of transfer and assignment and to take such other action as such the other party may reasonably request to more effectively consummate the assignments and assumptions contemplated by this Assignment and Assumption Agreement.

Section 3. MISCELLANEOUS. This Assignment and Assumption Agreement constitutes an agreement solely among the parties hereto and is not intended to and shall not confer any rights, remedies, obligations, or liabilities, legal or equitable, on any person other than the parties hereto and their respective successors, assigns, and legal representatives, nor shall person other such person otherwise constitute a third party beneficiary under or by reason hereof. This Assignment and Assumption Agreement may be executed in one or more counterparts, each of which shall be deemed an original agreement, but all of which together shall constitute one and the same instrument. This Assignment and Assumption Agreement shall be governed by and construed in accordance with the internal laws of the State of New Jersey without reference to choice of law principles thereof. This Assignment and Assumption Agreement may only be amended or modified in writing, signed by the party against whom enforcement of such amendment or modification is sought. In the event that the Closing does not occur, this Assignment and Assumption Agreement shall become null and void and the Assumed Liabilities shall remain the sole obligation of Assignor.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first above written.

Section 7. ASSIGNMENT OF RIGHTS TO THE ESCROW FUND; ASSIGNMENT OF OBLIGATIONS; SUCCESSORS. This Agreement shall be binding upon and inure solely to the benefit of the parties hereto and their permitted assigns.

Section 8. ESCROW AGENT.

(A) Except as expressly contemplated by this Agreement or by joint written instructions from the Buyer and the City, the Escrow Agent shall not sell, transfer, or otherwise dispose of all or any portion of the Escrow Fund in any manner, except pursuant to an order of a court of competent jurisdiction.

(B) The duties and obligations of the Escrow Agent shall be determined solely by this Escrow Agreement, and the Escrow Agent shall not be liable except for the performance of such duties and obligations as are specifically set forth in this Escrow Agreement.

(C) In the performance of its duties hereunder, the Escrow Agent shall be entitled to rely upon any document, instrument, or signature believed by it in good faith to be genuine and signed by any party hereto or an authorized officer or agent thereof (specifically

The Escrow Agent may assume that any person purporting to give any notice on behalf of a party hereto in accordance with the provisions of this Agreement has been duly authorized to do so.

(D) The Buyer and the City acknowledge that Escrow Agent is acting solely as a stakeholder at the request of, and as an accommodation to, the parties to this Agreement. Escrow Agent shall not be deemed to be the agent of the City or the Buyer and shall not be liable to either of the parties hereto for any act or omission hereunder or any matter or thing arising out of its conduct hereunder, except for Escrow Agent's willful disregard of this Agreement or gross negligence. (F) As compensation for its services to be rendered under this Agreement, Escrow Agent shall be reimbursed upon request for all expenses, disbursements, and advances, including reasonable fees of outside counsel, if any, incurred or made by it in connection with the preparation of this Escrow Agreement and the carrying out of its duties under this Escrow Agreement. All such expenses shall be the joint and several responsibility of the City and the Buyer.

(G) The Buyer and the City shall reimburse and indemnify the Escrow Agent for and hold it harmless against any loss, liability, or expense, including, without limitation, reasonable attorney's fees incurred except in connection with gross negligence, bad faith, or willful misconduct on the part of the Escrow Agent arising out of, or in connection with the acceptance or performance of its duties and obligations under this Escrow Agreement.

(H) The Escrow Agent may resign at any time by giving twenty (20) Business Days' prior written notice of resignation to the City's Representative and the Buyer. The City and the Buyer may remove the Escrow Agent at any time by jointly giving the Escrow Agent ten (10) Business Days' written notice signed by each of them. If the Escrow Agent is to resign or be removed, a successor Escrow Agent shall be appointed by the Buyer by written instrument executed by the City's Representative and the Buyer. Such instrument shall be delivered to the Escrow Agent and to such successor Escrow Agent and, thereupon, the resignation or removal of the predecessor Escrow Agent shall become effective and such successor Escrow Agent, without any further act, deed or conveyance, shall become vested with all right, title, and interest to all cash and property held hereunder of such predecessor Escrow Agent. Such predecessor Escrow Agent shall, on the written request of the City's Representative, the Buyer, or the successor Escrow Agent, execute and deliver to such successor Escrow Agent all the right, title, and interest hereunder in and to the Escrow Fund of such predecessor Escrow Agent and all other rights hereunder of such predecessor Escrow Agent. If no successor Escrow Agent is appointed within twenty (20) Business Days of a notice of resignation by the Escrow Agent, the Escrow

Agent's sole responsibility shall thereafter be to hold the Escrow Fund until the earlier of its receipt of designation of a successor Escrow Agent, a joint written instruction by the City's Representative and the Buyer, or termination of this Escrow Agreement in accordance with its terms.

(I) The Escrow Agent is acting as a stakeholder only with respect to the Escrow Fund. Upon making delivery of the Escrow Fund in the manner herein provided, the Escrow Agent shall have no further liability hereunder.

(J) The City and the Buyer acknowledge that the Escrow Agent has represented the City in connection with, among others things, the Agreement and the matters giving rise to this Escrow Agreement and will continue to represent the City in connection with such matters and any other matters. Each of the parties to this Agreement waives any right it now has or may have in the future to any claim of conflict as a result of the Escrow Agent's execution, delivery, and performance of this Agreement or the transactions contemplated hereby and the Escrow Agent's representation of the City in any matter including, without limitation, any action, litigation, or representation relating to the Agreement, this Escrow Agreement, and the matters giving rise to each of them.

(K) Escrow Agent shall not be bound in any way by any contract or understanding between the parties hereto other than this Agreement, whether or not Escrow Agent has knowledge thereof or consents thereto unless Escrow Agent consents to being so bound in writing.

(L) Escrow Agent shall not be liable for any action taken or omitted by Escrow Agent in good faith and reasonably believed by Escrow Agent to be authorized or within its rights or powers conferred upon it by this Agreement, except for damage caused by the gross negligence or willful misconduct of Escrow Agent.

(M) Escrow Agent shall not have any liability or obligation for loss of all or any portion of the Escrow Amount by reason of the insolvency or failure of the Escrow depository, or any other occurrence or circumstance affecting the Escrow depository.

Section 9. TERMINATION. This Escrow Agreement shall terminate on the earlier of: (i) the date on which there are no funds remaining in the Escrow Fund or (ii) the date on which the Escrow Agreement receives a signed notice from the City and the Buyer that the Escrow Agreement is terminated, including instruction to the Escrow Agent on the disbursement of the Escrow Fund.

Wastewater emergencies are given the highest priority because of the potential health risk exposure to customers, environmental contamination, or damage to residents’ property.
- Customer billing that implements the following billing structure for City of Salem customers, while maintaining the rate stabilization covenant. New Jersey American Water would provide customers with one monthly bill that clearly identifies the charges associated with water service and the charges associated with wastewater service. For water service, the billing structure would primarily include a meter charge based on meter size, a flat rate, and a volumetric rate based on monthly water consumption, plus possible inclusion of NJBPU approved recovery surcharges. For wastewater service, billing structure would primarily include a flat rate plus a volumetric rate calculated from the monthly water usage, plus possible inclusion of NJBPU approved recovery surcharges. This billing plan will alter the frequency of which City residents pay for water and wastewater service to monthly.
- Convenient payment options, including by mail, in-person, by phone or online. For those customers who prefer to make their payments in-person, American Water partners with

established payment centers to offer this option, including retail grocery stores and other established sites, such as Walmart, and will do so to offer this service within the City of Salem. To give customers the flexibility to pay how they prefer, payments are also accepted electronically with a credit card or through direct debit, so there are no checks to write, and no stamps required.

REQUIRED CAPITAL IMPROVEMENTS

New Jersey American Water anticipates executing a capital improvement plan that includes:

1. Completion of installation of Granular Activated Carbon treatment initiated by the City of Salem to remove PFAS from the drinking water supply, as outlined in the Remedial Measures Report provided in Addendum No. 3, to deliver safe, reliable drinking water service to City customers that meets all federal, state and local drinking water standards (see additional details below).

2. Repairs and upgrades to the Wastewater Treatment Plant to deliver reliable service that is compliant with all regulations.

3. Rehabilitation of the Elkinton Dam to reduce risk associated with this infrastructure, which has been previously classified by NJDEP as a Class 1 High Hazard Structure.

4. Upgrades to pump stations and wells to secure reliable water supply.

5. Inspection and replacement of lead service lines to comply with NJDEP lead service line replacement requirements and improve water service quality for City residents.

6. Timely replacement of aging water and sewer mains throughout the water and wastewater systems.

7. A robust, comprehensive analysis of the entire water and wastewater systems to inform future capital investment needs. Based on the site visit and materials provided during the RFB process, New Jersey American Water anticipates that the City of Salem systems could require more than \$50 million of capital over 10 years. The comprehensive analysis of the systems would further inform this anticipated investment.

Further, New Jersey American Water will obtain GPS coordinates on all existing above-ground or at-grade assets such as hydrants, manholes, valves, and clean outs. These coordinates will be used to build a GIS mapping database to upload into the company's online work management system.

New Jersey American Water will collaborate with the city to evaluate the condition of any water and sewer main that falls within the limits of a road reconstruction project initiated by the City. If the company elects to replace or rehabilitate the water or wastewater assets, the work would be coordinated with the City ahead of the planned road reconstruction project.

PLAN TO ADDRESS PFAS

To address the presence of PFAS in the City of Salem's source water, New Jersey American Water commits to completing the installation of Granular Activated Carbon treatment initiated by the City of Salem to remove PFAS, as outlined in the Remedial Measures Report. New Jersey American Water would see the permitted design through completion, as well as utilize best practices to systematically assess the source of detection and address any additional treatment needs of the system.

The company has experience in implementing PFAS treatment through the following steps:

1. Evaluate all groundwater wells and surface water sources for detections of PFAS above NJDEP MCLs, as well as the U.S. EPA's proposed limits;
2. Immediately shut down, if not shut down already, any supply source exceeding the NJDEP MCLs;
3. Maximize flow from any supply source that are below the NJDEP MCLs;
4. Design, permit and deploy the appropriate treatment technology, such as a Granular Activated Carbon filtration system.

As demonstrated by the City prior to Closing, water demand can be met with supply sources not impacted by the presence of PFAS above the NJDEP MCL. New Jersey American Water would continue to keep any impacted supply offline while treatment is installed.

Based on the Remedial Measures Report provided by the City and the milestones and proposed completion date, New Jersey American Water assumes that design and permitting for PFAS treatment at the Water Treatment Plant will be complete upon an anticipated Closing in June 2024, and New Jersey American Water is prepared to finalize construction of the designed and permitted project upon taking ownership.
