RE: Attentive Energy LLC Response to NJ OSW Administrative Completeness Review Findings,  
Received on August 25, 2023

Dear Board Staff and Levitan & Associates,

Attentive Energy LLC (“Attentive Energy”) is excited to have the opportunity to provide the New Jersey Board of Public Utilities (“NJBPU”) with additional information regarding its Attentive Energy Two Project (the “Project”) submission into NJBPU’s third offshore wind solicitation. The Project will supply the State of New Jersey with up to 1,342 MW of clean and renewable wind energy, and it is expected to power more than 600,000 homes and generate up to \$12 billion in economic activity. Additionally, Attentive Energy Two will help the State prepare for the impacts of climate change and pave the way for New Jersey to achieve its greenhouse gas emissions targets while creating economic opportunities for communities statewide and prioritizing affordability for ratepayers. Attentive Energy, through Sponsors TotalEnergies and Corio, has deep global offshore development and operating experience, combined with a track record of investing in and partnering with local communities in the State through decades of respective company footprints in New Jersey. This Project will continue this track record of economic development by delivering up to 15,000 job-years for New Jersey residents.

Attentive Energy respectfully provides the following responses to NJBPU’s letter dated August 25, 2023 identifying deficiencies in Attentive Energy’s Application submitted in response to NJBPU’s third offshore wind solicitation.<sup>1</sup>

---

<sup>1</sup> Portions of this response contain confidential, proprietary, and/or commercially-sensitive information. Attentive Energy has submitted a Confidential Copy of this response that should be treated as a non-public record that is exempt from disclosure to the extent permitted under applicable laws and/or as expressly set forth in the Solicitation Guidance Document and Administrative Completeness Review Findings. Attentive Energy has also submitted a redacted version of this response that should only be released to the public to the extent permitted under applicable laws and/or as expressly set forth in the Solicitation Guidance Document and Administrative Completeness Review Findings. All notices or other communications regarding the confidential nature of this response should be directed to Attentive Energy’s General Counsel Murray Greene, [murray.greene@totalenergies.com](mailto:murray.greene@totalenergies.com).

### 1. Section 2, Project Descriptions

- Requirement: Provide evidence that the Applicant has selected certified wind turbine generators or has a detailed certification plan that is underwritten by a certifying body (N.J.A.C. 14:8-6.5(a)(2))
- Deficiency: A detailed WTG certification plan that is underwritten by a certifying body is not included.

[REDACTED]

[REDACTED]

### 2. Offshore Wind Infrastructure Monitoring Plan

- Requirement: The plan shall consider the entire footprint of the Project including wind farm area, cable routes, landfall locations, and upland routes, and shall address how implementation of the plan will inform outstanding questions related to and reduce impacts associated with wind farm construction and operation.
- Deficiency: The Offshore Wind Infrastructure Monitoring Plan does not reference cable locations, landfall locations, or upland routes.

Attentive Energy has uploaded a revised Offshore Wind Infrastructure Monitoring Plan (confidential and public copies) to the portal with this transmittal. The revised text referencing cable locations, landfall locations, and upland routes can be found on pages 3, 8, 9, and 10 of the updated Offshore Wind Infrastructure Monitoring Plan. [REDACTED]

[REDACTED]

### 3. Application Form – Project Option 14

- Requirement: Delivered energy as a fraction of expected generation by month and calendar year
- Deficiency: One value is missing (and there is an extra value entered) on the WTG Performance Data worksheet.

[Redacted]

### 4. Other

[Redacted]

We again thank NJBPU's Offshore Wind Team for the opportunity to address clarifications related to Attentive Energy's Application. We look forward to supporting New Jersey and its communities as a long-term partner. If you have any additional questions or seek clarification to any of our responses, please do not hesitate to contact me at [christen.wittman@totalenergies.com](mailto:christen.wittman@totalenergies.com) or (508) 272-6987.

Sincerely,

Christen Wittman  
Vice President Project Development
