SUNPOWER CORPORATION FOR A WAIVER OF)	
N.J.A.C. 14:8-11.4(b) AS APPLIED TO CERTAIN)	
APPLICATIONS TO THE ADMINISTRATIVELY)	DOCKET NO. QW23050290
DETERMINED INCENTIVE (ADI) PROGRAM)	
NJADRE1550129709 et al. ¹)	

Parties of Record:

Brian O. Lipman, Esq., Director, New Jersey Division of Rate Counsel
Michael S. Kettler, Esq. on behalf of SunPower Corporation²

BY THE BOARD:

By this Order, the New Jersey Board of Public Utilities (“Board”) considers a limited waiver of N.J.A.C. 14:8-11.4(b) to permit projects that received Permission to Operate (“PTO”) prior to the opening of the Administratively Determined Incentive (“ADI”) Program, or those that began construction prior to their acceptance into the ADI Program, eligibility for the ADI Program incentive. The Board also considers a limited waiver of N.J.A.C. 14:8-11.5(k), which forbids an increase in generation capacity by more than 20 percent or 25 kWdc, whichever is smaller, over the size indicated in the registration accepted into the ADI Program.

¹ The petitions addressed in this Order are identified in Appendix A.

² The complete list of Parties of Record can be found in Appendix B.

BACKGROUND

On July 9, 2021, Governor Murphy signed the Solar Act of 2021 (“Solar Act”).³ The Solar Act directed the Board to establish a program to incent the development of at least 3,750 megawatts (“MW”) of new solar by 2026.

On July 28, 2021, following an extensive stakeholder process, the Board approved the creation of the Successor Solar Incentive (“SuSI”) Program, consisting of the ADI Program and the Competitive Solar Incentive (“CSI”) Program.⁴ The ADI Program launched on August 28, 2021, and is open to residential projects, net metered non-residential projects equal to or less than five (5) MW, and community solar projects. The Board expressly limited ADI Program eligibility to projects that had not yet commenced construction, stating that “projects seeking eligibility in the ADI Program are required to submit a complete ADI Program registration package and receive a notice of conditional registration prior to beginning construction on the facility.”⁵ The Board’s ADI rules, N.J.A.C. 14:8-11.1 to -11.9 (“ADI Rules”), which took effect February 22, 2022, codify this prohibition and further prohibit solar generation facilities from registering in the ADI Program if they commenced commercial operation prior to the opening of the ADI Program registration portal.

The ADI Program shall only be open to new facilities that have not commenced commercial operation prior to the opening of the ADI Program registration portal . . . Additionally, facilities seeking eligibility in the ADI Program must submit a registration and receive a notice of conditional registration pursuant to N.J.A.C. 14:8-11.5(g) prior to beginning construction on the facility, unless the Board grants a waiver in response to a petition.

[N.J.A.C. 14:8-11.4(b).]

The ADI Rules also limit increases in project generating capacity after registration in the ADI Program to 20 percent or 25 kWdc, whichever is smaller.⁶

Pursuant to the ADI Rules, the Board makes an annual allocation of capacity to each market segment established in the ADI Program. N.J.A.C. 14:8-11.7. The annual allocation of capacity to market segments for Energy Year 2024 (“EY24”), which commenced on June 1, 2023, was updated by Order dated May 10, 2023.⁷ The Board allocated the EY24 residential net metered market segment to have a total capacity of 200 MWdc.

³ L. 2021, c.169; N.J.S.A. 48:3-114 to -121.

⁴ In re a New Jersey Solar Transition Pursuant to P.L. 2018, c. 17, BPU No. QO19010068, Order dated July 28, 2021 (“SuSI Program Order”).

⁵ SuSI Program Order at 50.

⁶ See N.J.A.C. 14:8-11.5(k), 55 N.J.R. 12(2) (Dec 18th 2023).

⁷ In re a Successor Solar Incentive Program Pursuant to P.L. 2021, c.169, BPU No. QO20020184 and In re a Certification of Energy Year 2022 Cost Cap Calculation and Setting ADI Program Megawatt Blocks for Energy Year 2024, BPU No. QO23040206, Order dated May 10, 2023 (“May 2023 Order”).

PETITIONS

The Board has received 152 petitions from customers and developers, which collectively represent 1,233 projects that seek a waiver of the Board's rules to participate in the ADI Program.⁸ Twenty-two projects included in these petitions had already received their NJ Certification Numbers and do not require relief. With respect to those projects, identified in Appendix C at section six, the petitions that include them are moot.

There are 1,187 projects that received PTO prior to the receipt of the notice of conditional registration, which necessarily entails having commenced construction prior to receipt, who have petitioned the Board to waive N.J.A.C. 14:8-11.4(b) in order to register in the ADI Program. An additional 22 projects that received PTO prior to ADI Program launch have petitioned the Board for a waiver of the relevant portion of ADI Rule N.J.A.C. 14:8-11.4(b). Petitioners contended that they have invested in solar projects at their homes in good faith and should be allowed to participate in the ADI Program to receive an incentive. Some alleged that they relied on their installers for completion of program requirements and were failed by them. The installers cited challenges caused by the COVID-19 pandemic, worldwide supply shortages, and significant employee turnover, along with confusion regarding the new procedures applicable to the ADI Program, as reasons for projects failing to meet the requirements of the ADI Rules.

There are also 24 projects among the petitions that are seeking approval of solar electric generation facilities at a capacity that exceeds the size submitted in the initial registration package. These petitions seek a waiver of the ADI rules at N.J.A.C. 14:8-11.5(k). Pending direction from the Board, the ADI registration processing team has placed an administrative hold on these projects.

STAFF RECOMMENDATION

Projects commencing construction prior to receipt of ADI conditional registration

Board Staff ("Staff") recommends that the Board take action to ensure that the 1,187 solar projects referenced above that commenced construction prior to receipt of their ADI Program acceptance may register in the ADI Program, if otherwise eligible. Staff is concerned that these projects will be stranded without an incentive in the absence of Board action.

The prohibition on registration after starting construction is designed to ensure that solar incentives go only to projects that need incentives. This provision also recognizes the structure of the ADI Program in blocks of available capacity. It is intended to ensure that, when confronted with the impending full subscription of an ADI Program MW block and the closure of a market segment to new registrations, developers will not rush to construct projects prior to registration in the hope that commencement of construction without a valid registration would lock in an incentive value.

These continue to be valid policy goals. Nonetheless, Staff believes that some flexibility in the application of this restriction is warranted, although the time for such flexibility is coming to an end. The solar incentive program changed twice within the space of three (3) years, and there has been some confusion regarding the requirements of the different programs. For instance, the MW caps included in the ADI Program did not previously exist. Moreover, Staff is concerned

⁸ The projects addressed in this Order are identified in Appendix C.

that these projects would be stranded without any incentive if the Board does not act to grant relief. The Board has previously recognized the justification for some flexibility under these circumstances and Staff recommends that it do so now and waive N.J.A.C. 14:8-11.4(b) for these petitioners.⁹ Staff notes that the justification for such flexibility will soon be obsolete and discusses appropriate treatment of future petitions below.

Staff notes that in support of certain waiver requests, some petitioners argued that projects should be found not to require a waiver because they “commenced construction” prior to May 31, 2022 and are thus entitled to the waiver for such projects granted in the April 2022 Order. Staff recommends these projects be granted waivers of N.J.A.C. 14:8-11.4(b) for the reasons discussed below, and therefore recommends the Board decline to address this argument as moot.

In summary, Staff recommends that the Board grant the petitions seeking a waiver of N.J.A.C. 14:8-11.4(b) for commencing construction prior to acceptance into the ADI Program. Petitioners should refer to Appendix C for the next steps required for the processing of their projects.

Projects commencing commercial operation prior to the opening of the ADI Program

Twenty-two projects among the petitions identified above commenced commercial operation prior to the opening of the ADI registration portal. As with the projects that commenced construction prior to receipt of their ADI acceptance, Staff is concerned that these projects will be stranded without an incentive in the absence of Board action. Staff believes that a waiver of the ADI Program eligibility requirement for these projects is appropriate given the relatively rapid change in incentive programs described above and the consequent potential for confusion among solar market participants. Staff recommends that the Board grant these petitions and waive N.J.A.C. 14:8-11.4(b) for these projects, such that their prior receipt of PTO does not render them ineligible for the ADI Program. This approach is consistent with the Board’s prior orders granting waivers of ADI Program rules, although as noted above Staff does not necessarily recommend that it guide the treatment of future petitions.¹⁰

⁹ See, e.g., In re a Solar Successor Incentive Program Pursuant to P.L. 2018, c.17 – Order Modifying ADI Program Eligibility Conditions, BPU No. QO20020184, Order dated January 26, 2022 (allowing projects registered in the TI Program that had commenced construction but failed to meet the TI deadline for commercial operation to be eligible to apply to the ADI Program); In re a Successor Solar Incentive Program Pursuant to P.L. 2021, c. 169 - Order Waiving ADI Program Eligibility Rules, BPU Docket No. QW22030128, Order dated April 6, 2022 (“April 2022 Order”) (granting a limited waiver of N.J.A.C. 14:8-11.4(b) to projects that had not previously registered in the TI Program but had commenced construction prior to receiving a conditional acceptance for an application in the ADI Program); In re a Successor Solar Incentive Program Pursuant to P.L. 2021, c. 169 Order Waiving ADI Program Eligibility Rules, BPU Docket No. QW22030128, Order dated October 12, 2022 (granting a limited waiver of N.J.A.C. 14:8-11.4(b) to projects that had not previously registered in the TI Program but had commenced construction prior to receiving a conditional acceptance for an application in the ADI Program); In re a Successor Solar Incentive Program Pursuant to P.L. 2021, c. 169 - Order Waiving ADI Program Eligibility Rules, BPU Docket No. QW22030128, Order dated April 26, 2023 (“April 2023 Order”) (granting a limited waiver of N.J.A.C. 14:8-11.4(b) to projects that commenced construction prior to notice of conditional registration, for certain projects that commenced commercial operations prior to the launch of the program, and for certain projects that constructed systems greater than 10% larger than stated in their initial registration).

¹⁰ April 2022 Order at 5–6 and April 2023 Order at 13–14.

Staff also recommends that the Board waive for these projects N.J.A.C. 14:8-11.6(a), which provides that the 15-year Solar Renewable Energy Certificate-II (“SREC-II”) qualification life for a SuSI eligible facility begins on the date commercial operation is commenced, and order that the qualification life for these projects commence instead on August 28, 2021, the date on which the ADI registration portal opened to the public. This is consistent with the Board’s approach in the TI Program and prior orders granting waivers of the ADI program rules.¹¹ Therefore, only the electricity generated by these projects after the start of the ADI Program shall be eligible to create SREC-IIs.

This Order represents the third time that the Board has granted relief to petitioners seeking a waiver of the prohibition on commencing construction prior to acceptance into the ADI Program. The Board has looked to the rapid change in incentive programs in 2020 and 2021, as well as the lingering effects of the COVID-19 pandemic and the consequent supply chain delays and labor disruptions. However, those changes and the worst impacts of the pandemic are now more than a year in the past. Rather than continuing to waive the ADI Rules for projects that are in violation of them, the Board should consider placing an endpoint on its willingness to entertain such waivers. Staff recommends that the end of EY24 serve as that endpoint and that the Board require that any request for a waiver of N.J.A.C. 14:8-11.4(b) be supported by factors other than the impact of COVID-19 and the program changes that occurred in 2020-2021.

In summary, Staff recommends that the Board grant the petitions of the projects seeking a waiver of N.J.A.C. 14:8-11.4(b) for commencing commercial operation prior to the opening of the ADI Program, with the proviso that the qualifying life of these projects should commence on August 28, 2021. Petitioners should refer to Appendix C for the next steps required for the processing of their projects. Staff also recommends that the Board find that requests for waivers of N.J.A.C. 14:8-11.4(b) received after the end of EY24 are unlikely to benefit from considerations of the impact of the pandemic or the change in programs during the 2020-2021 period.

Projects that have not submitted a registration to the ADI Program

Staff is aware that some of the petitions include projects that have received PTO but have not yet submitted a registration in the ADI Program.¹² Staff recommends that, provided they meet the conditions described below, these projects be granted the above-discussed waivers of N.J.A.C. 14:8-11.4(b) and of N.J.A.C. 14:8-11.6(a), if a project received PTO prior to the opening of the ADI Program. Staff recommends that the Board require petitioners to register all such projects expeditiously and submit an ADI program number (“Program Number”) to the Program Manager within 20 calendar days of the effective date of this Order. If a developer has more than one project that is not yet registered, Staff recommends that the Board require such developers to provide all projects and their Program Numbers in one excel spreadsheet document. Staff also recommends that the registrant be required to upload a copy of this Order with the registration of each unregistered project. In addition, Staff suggests that if a developer’s petition encompasses

¹¹ See, e.g., In re the Petition for Eligibility of Solar Photovoltaic Project (NJSTRE1547234718) in the Transition Incentive Program (Vishal Patel), BPU No. QO21081080, Order dated November 17, 2021 (waiving requirement that the petitioner not commence commercial operation prior to the opening of the ADI program, and setting August 28, 2021 as the beginning of the qualification life for the petitioner’s solar facility).

¹² SunPower has not registered the 41 projects identified in its supplemental filing. In addition, Staff is aware of 745 unregistered Sunnova projects, 41 Palmetto Solar projects, and one Tesla project, for a total of 828 unregistered projects seeking waivers of the Board’s eligibility rules.

projects for which a registration must be submitted pursuant to Appendix C, that developer be encouraged to reach out to the Program Manager to confirm the information needed and provide that information timely. In addition, Staff recommends that for petitioners Sunpower and Sunnova, which have multiple unregistered projects seeking relief, the Board condition waiver of its rules on their ceasing to submit new registrations until such time as all the unregistered projects addressed in this Order have been registered. Finally, Staff recommends that after the end of EY24, the Board look first at whether a complete registration package has been submitted for a project in the ADI Program before considering a waiver request.

Projects which constructed solar capacity which exceeds the initial registration by the maximum allowed by rule

Twenty-four petitions were received from the owners or developers of projects which were constructed to capacities that exceeded the generation capacity for which their registrations had been approved by over twenty percent. During the pendency of these petitions, the Board amended its rules to allow increases over the registered size of up to 20% or 25 kW, whichever is smaller.¹³ The Board has previously granted Staff the ability to waive the 10% cap on increases for projects with an increase greater than 10%, but less than 20%, pending the final adoption of the rule. April 2023 Order at 14. However, no existing or pending rule contemplates size increases of over 20%. The rule provision at issue is designed to ensure that project capacity aggregated across solar facilities within an ADI market segment does not exceed the amount of capacity allocated to that market segment by the Board. Although there is no risk of exceeding the capacity allocations at this time, neither is there any standard by which to evaluate system size increases that exceed 20%.¹⁴ Therefore, Staff recommends that the Board deny these petitions and encourage petitioners withdraw their registrations and to re-register their projects.¹⁵ For any such re-registration, Staff further recommends that the Board waive the prohibition on commencing construction prior to acceptance found at N.J.A.C. 14:8-11.4(b). Petitioners should refer to Appendix C for the next steps required for the processing of their projects.

As previously mentioned, these rules continue to serve legitimate policy goals. N.J.A.C. 14:8-11.4(b) and N.J.A.C. 14:8-11.5(k) enable effective management of the ADI registration process in the face of full subscription of a market segment allocation. Thus, Staff does not recommend a blanket waiver of these provisions; instead, Staff recommends that projects seeking an increase in size greater than 20% be required to re-register at their new size. Staff further recommends that the Board clarify that the relief granted through this Order is dependent upon the facts presented in these petitions and does not extend to other solar project registrations that are out of compliance with the above rules.

Contractor Non-Compliance with ADI Program Rules

As noted above, Staff does not believe that customers who invested in good faith in solar electricity generation should be penalized. Consequences are appropriate, however, for the solar installers that repeatedly seek waivers of the program rules. The Board's Contractor Remediation Procedures ("CRP") provide an appropriate tool here.

¹³ See N.J.A.C. 14:8-11.5(k), 55 N.J.R. 12(2) (Dec 18th 2023).

¹⁴ The capacity allocations for EY2024 were refreshed in May 2023. May 2023 Order at 7-8.

¹⁵ These projects are identified in Appendix C, Section 5.

The Board first approved the CRP on October 5, 2010; the procedures were subsequently revised and updated on January 25, 2017.¹⁶ The CRP grants Program Managers, including the ADI Program Manager, the ability to address contractor violations of program procedures. All contractors who participate in the New Jersey Clean Energy Program (“NJCEP”) are subject to the CRP. CRP Order at 2.

The volume of registrations required to be placed on hold due to a violation of the Board’s rules since the ADI Program’s inception indicates a persistent inability or unwillingness on the part of some solar installers to abide by the requirements of the program, even as they continue to seek its incentives on behalf of customers. One petitioner, for example, has added more than 40 waiver requests during the pendency of its petition.¹⁷ This is the type of repeated violation of program procedures for which the CRP were created. Pursuant to the CRP Order, the ADI Program Manager has initiated the CRP and will schedule mandatory meetings with the developers as needed.¹⁸ The 15 developers identified below are among those that have already entered the CRP.

Complete Solar	Powerlutions Solar
Exact Solar	Powur, PBC
Fusion Solar Energy	Reanimate Contractor, LLC
Palmetto Solar, LLC	Spectacular Solar
Panatec Corporation	Sunnova Energy Corporation
Posigen NJ, LLC	Sunpower Corporation
Power Home Remodeling Group	Sunwise Energy, LLC
Tesla Energy Operations, Inc.	

Finally, Staff recommends that the Board direct Staff to initiate a rulemaking proceeding to amend the ADI Program rules to include consequences for those filing registrations and failing to comply with the program rules. Such consequences might include penalties in the form of depreciating incentive levels and suspension or revocation of incentives.

DISCUSSION AND FINDINGS

A majority of the projects considered in this order commenced construction, as evidenced by receipt of PTO, without receiving notice of conditional registration. A few projects received PTO prior to the opening of the ADI registration portal.¹⁹ As a result of their non-compliance with the ADI rules, all of these projects would be denied incentives absent a waiver by the Board. The Board **FINDS** that waiving the applicable rule for these projects will avoid stranding them without any incentive. Several projects have increased in size since registration acceptance by more than the amount allowed by the rules. The Board **FINDS** that denying these petitions while

¹⁶ See In re the Clean Energy Programs and Budget for Fiscal Year 2017 (FY17) - Contractor Remediation Procedures, BPU No. QO16040353, Order dated January 25, 2017 (“CRP Order”).

¹⁷ SunPower Corporation

¹⁸ The CRP include four (4) levels: Coaching, Probation, Suspension, and Disbarment.

¹⁹ The Board notes that some petitioners advanced the argument they had “commenced construction” in time to qualify for a time-limited waiver granted in an earlier Order. Since the Board’s ruling on the pending petitions is based on other grounds, this argument is moot and will not be addressed here.

allowing re-registration at the installed capacity will not strand the associated projects without an incentive.

The Board's rules state that "[i]n special cases and for good cause shown, the Board may . . . relax or permit deviations from these rules." N.J.A.C. 14:1-1.2(b). The rules go on to explain that "[t]he Board shall, in accordance with the general purpose and intent of the rules, waive section(s) of the rule if full compliance with the rule(s) would adversely affect the ratepayers of a utility or other regulated entity, the ability of said utility or other regulated entity to continue to render safe, adequate and proper service, or the interests of the general public." N.J.A.C. 14:1-1.2(b)(1).

In launching the SuSI Program, the Board sought to provide a smooth transition to that program for projects already under development. As part of that effort, the Board provided in the SuSI Program Order that although the ADI Program was generally limited to new projects that had not yet begun construction, developers could file a petition with the Board to allow them to participate. That provision is codified in the ADI rules at N.J.A.C. 14:8-11.4(b), which contemplate and permit waivers of this provision to be granted by the Board. Subsequently, in the October 2022 and April 2023 Orders, the Board allowed projects that had registered in the ADI Program and had commenced construction prior to being accepted into the program to be eligible for incentives. The Board **FINDS** that facilitating the ability of the petitioners' projects to similarly participate in the ADI Program will benefit the customers. The Board **FURTHER FINDS** that waiving N.J.A.C. 14:8-11.4(b) for a limited class of solar electric generation facilities seeking admission into the ADI Program that began construction prior to receipt of the ADI notice of conditional registration is in the public interest. The public benefits from a smoothly functioning incentive program and from smooth transitions between such programs. In circumstances such as those present here, a smooth transition is furthered by limited waivers of rules that would otherwise have the unintended consequence of stranding solar facilities without an incentive. Moreover, as noted above, the MW caps included in the ADI Program did not previously exist and in the past, registrations were not denied because of insufficient capacity to accommodate additional installations. The Board concurs with Staff that some flexibility is appropriate at the present time. However, solar market participants must adapt to the current incentive program and its requirements. The Board **FINDS** that the facts and circumstances that justify the waivers granted in this Order will not support these waivers indefinitely. The ADI Program launched in mid-2021, approximately two and a half years ago. The federal COVID-19 Public Health Emergency was lifted on May 11, 2023.²⁰ Governor Murphy lifted the Public Health Emergency earlier still, on March 4, 2022.²¹ The Board concurs with Staff that the end of EY24 will serve as an appropriate end point for waiving N.J.A.C. 14:8-11.4(b) without a rationale that goes beyond the launch of the ADI Program, COVID-19-related delays, or developer error.

The Board carefully considered the petitions and Staff's recommendations. With respect to the customers that began construction prior to receipt of the ADI notice of conditional registration and petitioned for relief, the Board **GRANTS** these petitions, and having found good cause, **HEREBY WAIVES** the prohibition against commencing construction prior to receipt of the ADI Program notice of conditional registration enumerated in N.J.A.C. 14:8-11.4(b). The Board **DIRECTS** those petitioners that sought waivers for unregistered projects to register those projects and provide the Program Number and associated name and address to the Program Manager within 20 calendar days of the effective date of this Order. If a petitioner has more than one project that is not yet

²⁰ <https://www.cdc.gov/coronavirus/2019-ncov/your-health/end-of-phe.html#:~:text=What%20You%20Need%20to%20Know,share%20certain%20data%20will%20change.>

²¹ Executive Order 292, <https://www.nj.gov/health/news/2022/approved/20220304a.shtml>

registered, it shall provide all projects and their Program Numbers to the Program Manager in one excel spreadsheet document. In addition, the petitioners must upload a copy of this Order with the registration of each unregistered project. Finally, the Board conditions any waivers granted herein for petitioners Sunpower and Sunnova on their ceasing to submit new ADI Program registrations until such time as all the unregistered projects addressed in this Order have been registered.

With respect to the customers that received PTO prior to the opening of the ADI registration portal and that petitioned the Board for a waiver of N.J.A.C. 14:8-11.4(b), the Board is cognizant that these projects achieved commercial operation during a time of novel challenges which affected many aspects of solar development. The Board closed one incentive program, opened and closed a second, and opened a third within the span of two (2) years. The Board concurs with Staff that flexibility is warranted in this matter, and that deviation from the strict application of the rule provision is reasonable and appropriate. The Board **FINDS** that at this point in the progression of the Board's solar incentive programs, and under these circumstances, the non-compliance of these projects with the provisions of N.J.A.C. 14:11-4(b) prohibiting commercial operation prior to the opening of the ADI Program should not render them ineligible.

Therefore, having considered the petitions seeking a waiver of the prohibition on getting PTO prior to the opening of the ADI Program and Staff's recommendation, the Board **GRANTS** these petitions, and having found good cause, **HEREBY WAIVES** the prohibition against commencing commercial operations prior to the opening of the ADI Program registration portal by the Board enumerated in N.J.A.C. 14:8-11.4(b) for the projects identified in this Order. The Board also recognizes that as a result of this waiver, these projects will benefit from an incentive for which they would not otherwise qualify. Thus, the Board **FURTHER FINDS** good cause, under these particular facts and circumstances, to modify the date on which the SREC-II qualification life begins. Therefore, the Board **HEREBY WAIVES** N.J.A.C 14:8-11.6(a) to the extent necessary to permit the 15-year SREC-II qualification life for this project to commence on August 28, 2021, the first day of ADI Program registration opening, rather than on the date of commercial operation.

With respect to the petitions seeking a waiver of the prohibition on exceeding their approved registration capacity by over 20%, the Board notes that neither the existing nor the pending rule contemplates size increases of over 20%. The rule provision at issue is designed to ensure that project capacity aggregated across solar facilities within an ADI market segment does not exceed the amount of capacity allocated to that market segment by the Board. The Board declines to further relax the application of this rule. The Board **FINDS** that there is no good cause to waive this rule and therefore **DENIES** these petitions.²² The Board encourages these specific petitioners to withdraw their existing registrations and re-register their projects at their increased size. For any such project that re-registers, the Board **HEREBY WAIVES** the prohibition on commencing construction prior to acceptance at N.J.A.C. 14:8-11.4(b). Staff has noted that as of February 7, 2024, approximately 129 MWdc of the net-metered residential market segment capacity is subscribed.²³ The Board **FINDS** that this rate of registration means that this market segment could be fully subscribed before the end of EY24. The Board shares Staff's concern regarding the implications for the MW block approved by the Board should increasing system sizes continue to be sought as market segment allocation blocks move closer to full subscription and closure. The Board **DIRECTS** Staff to continue to monitor any further requests for similar relief to assess the potential impact upon the relevant ADI market segment allocation and to make a

²² The petitions are identified in Appendix C, Section 5.

²³ <https://njadi.programprocessing.com>

recommendation on Staff's findings in a future ADI stakeholder proceeding.

The Board agrees with Staff that residential customers who invested in good faith in solar electricity generation should not be penalized. However, contractors who benefit from the ADI Program should be expected to understand and to follow the program's rules. To judge by the volume of waivers needed by pending registrations, some of the contractors benefitting from the ADI Program are consistently failing to do so. As stated in the CRP Order, "the programs require a proper enforcement such that the integrity of the NJCEP is maintained." CRP Order at 4. The Board notes that the Program Administrator has appropriately implemented CRP for the 15 contractors listed in this Order, including escalating a contractor through the four CRP levels if and as needed, and will hold mandatory meetings with the developers as needed.²⁴

The Board **DIRECTS** Staff to initiate a rulemaking proceeding to amend the ADI Program rules to include consequences for those filing registrations and failing to comply with the program rules, which may include penalties in the form of depreciating incentive levels and suspension or revocation of incentives.

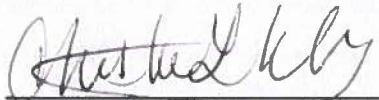

The Board notes that the relief granted in this Order is predicated upon the specific facts and circumstances alleged by the petitioners. As noted above, the Board **FINDS** that as of May 31, 2024, requests for waiver of N.J.A.C. 14:8-11.4(b) will require a rationale that goes beyond the impacts of COVID-19 and the programmatic changes of 2020-2021 if they are to be granted. The Board notes that developers which fail to comply with these rules after the end of EY24 should recognize that they will need to explain to their customers the reason that these customers will not receive the incentives available to them through the ADI Program at the time they registered. The Board encourages these developers to re-register their customers' projects at the incentive level available if and when the initial registration is withdrawn or expires.

²⁴ For purposes of this action, the terms "contractors" and "developers" are used interchangeably.

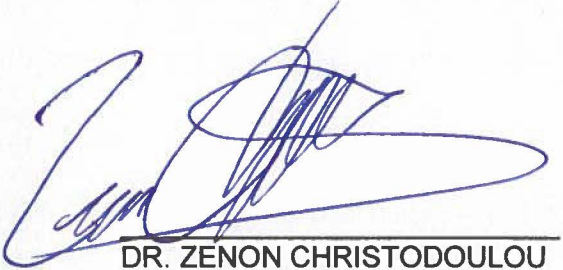

The effective date of this Order is February 21, 2024.

BPU DOCKET NOS. QW22030128, QW23050290, et al.

Appendix C

The Projects are divided into the following 6 sections based on next steps required for registration in the ADI Program. Each section is organized by the developer and then by the customer.

Next Steps - Sections	Pages
1. Valid Registration - Program Manager to Process	1 - 9
2. Registrant to Submit Final As-Built Paperwork to Program Manager	10
3. Registrant to Submit New Registration ¹	11 - 22
4. Registrant to Complete and Submit Pending Application ²	23 - 31
5. Registrant to Submit New Application with Full Capacity ³	32
6. No Relief Required; Application Processed	33

Section 1: Valid Registration - Program Manager to Process

No.	Developer	Customer Name	Registration No.	Docket No.	Relief Requested
1	1st Light Energy	Alycia Sterling	NJADRE1550479125	QW23060403	PTO prior to ADI conditional approval
2	Advanced Renewable Solutions	Charles And Susan Snyder	NJADRE1548563136	QO23100717	PTO prior to opening of ADI program
3	Ampericon	Sudhakar Ramanathan	NJADRE1552319603	QW23060419	PTO prior to ADI conditional approval
4	Azimuth Renewable Energy	Ellen Petit & Kap Carpentry	NJADRE1552569847	QO23100777	PTO prior to ADI conditional approval
5	Azimuth Renewable Energy	Sam Reckford	NJADRE1552734959	QO23100778	PTO prior to ADI conditional approval
6	CE Team, Inc.	Ryan Wheeler	NJADRE1552815708	QO23090673	PTO prior to ADI conditional approval
7	Exact Solar	Brigitta Van Rheinberg	NJADRE1553054396	QW23080626	PTO prior to ADI conditional approval
8	Exact Solar	Dan Tomalin	NJADRE1553019056	QO23080579	PTO prior to ADI conditional approval
9	Exact Solar	Edward Snyder	NJADRE1549343942	QW23120910	PTO prior to ADI conditional approval
10	Exact Solar	Matthew Litkey	NJADRE1552364068	QW23120880	PTO prior to ADI conditional approval
11	Fusion Solar Energy	Chiranjit Sapre	NJADRE1551005071	QO23070480	PTO prior to ADI conditional approval
12	Fusion Solar Energy	Jose Villalta	NJADRE1552549203	QO23070431	PTO prior to ADI conditional approval
13	Fusion Solar Energy	Joseph Golding	NJADRE1550487188	QW24010006	PTO prior to ADI conditional approval
14	Fusion Solar Energy	Mario Quinde	NJADRE1549844053	QW23070472	PTO prior to ADI conditional approval
15	Fusion Solar Energy	Omar Argueta	NJADRE1553289692	QO23070462	PTO prior to ADI conditional approval
16	Fusion Solar Energy	Suruj Persaud	NJADRE1553996573	QO23070467	PTO prior to ADI conditional approval
17	Harvest Power, LLC	Hector Castillo	NJADRE1550380990	QO23080584	PTO prior to ADI conditional approval

¹⁻³ Waiver is subject to petitioners (1) registering the projects within 20 calendar days of the effective date of the Order, (2) submitting the program number for the project(s) to the Program Manager within 20 calendar days, and (3) uploading a copy of the Board Order with the registration of each project.
