| Sheila Dean | 3/26/2024 3:07:52 PM | There has not been enough research to warrant going forward with the wind turbines. It is still unknown what effect they will have on the environment, marine life and humans, both in the sea and on land. | |
| Bruce webber | 3/26/2024 3:06:52 PM | I am a lifelong resident of NJ and a frequent visitor and renter of many properties along the NJ shore, particularly for the last 7 years renting in LBI and visiting LBI frequently during the summer and offseason as well I am writing to express my concerns regarding the proposal for offshore wind turbines in our region. While I acknowledge the importance of renewable energy sources in combating climate change, I believe offshore wind turbines present significant drawbacks that warrant careful consideration. Firstly, the installation and maintenance of offshore wind turbines | |
