Dear Board Secretary Sherri L. Golden,

Stop the irreversible destruction of our ocean and coast. The damage to marine life, tourism, fishing, national security, radar interference, intermittency's, unreliability, exorbitant costs, warming waters from cooling routines, chlorine dumping from cooling routines, wake effect, oil laden generators, required fossil fuel backup generators, no viable decommissioning plan for generators and turbine blades, no proven ability to withstand hurricanes, BOEM's admitted turbines will have NO EFFECT ON CLIMATE CHANGE, and NOAA's ITA's & IHA's admitted harm to marine life is reason enough to abort any and all offshore wind development along the NJ coast. You were handed the keys to the castle to move forward an unproven and destructive agenda. NJ residents did not vote or approve any of this and the reckless spending with our tax dollars and rate payers monies. You are chartered with the task to protect the ratepayers of NJ. All of this little power generation will power NYC. Nuclear is the least invasive way to go and you need to steer your plans in that direction and look out for the residents of NJ and NJ itself for destroying our pristine, small coastline to power NYC will be your legacy.

Sincerely,  
Margaret Bagley
