Subject: [EXTERNAL] DO NOT SUPPORT (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN)

Dear Board Secretary Sherri L. Golden,

As a New Jersey resident, I'm writing to you on Docket Number QO24020126 to urge you to eliminate the unparalleled diving board leap into the fantasy of ocean wind farms as a panacea for electricity production. There are dozens of reasons but I'll name a few

1. Marine ecosystem destruction
2. Decimation of the ocean fishing industry, both commercial and sport.

3. Inefficient and unreliable energy production.

4. Unknown health concerns surrounding

wiring and transfer stations on land

5. Purported elimination of fossil fuel need is relegated to dream status. Look at what's Needed in the build stage and ongoing maintenance.

6. Wealth transfer of our tax dollars to foreign companies

7. Significant tax revenue decline when vacationers stop visiting the jersey shore.

8. Virtually no information available to the public as the media hides the negative aspects as part of its cover for murphy

Sincerely,

Tony Alexander
