Subject: [EXTERNAL] DO NOT support clean energy (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN)

Dear Board Secretary Sherri L. Golden,

DO NOT SUPPORT Docket Number QO24020126. With every technology there are trade offs. The current proposed use of “clean” energy technology has tradeoffs that are destructive to our marine environment that I just cannot support. In addition it will create an unnecessary cost burden for NJ residents and taxpayers for little return.

I propose a pause on clean energy initiatives until we come up with a plan and technology that is cost-effective, efficient, and has less negative impact on the environment that it is claiming to save.

This plan is too expensive and contains technology that is inefficient and has been proven not to be “clean”.

Sincerely,
Cheryl Matthews
