Subject: [EXTERNAL] Please support clean energy (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN )

Dear Board Secretary Sherri L. Golden,

I am totally against and vehemently OPPOSE the INDUSTRIAL wind turbines polluting our ocean, killing our sea life and altering the oceanic ecosystem, financial stability for generations to come. What will be damaged will never be revived.

I also OPPOSE being forced to move over to all-electric everything! -- It should be "my income, my choice!"

These all-electric and INDUSTRIAL wind turbines are NOT such green energy because they rely on fossil fuels to be mined, constructed and to be functional.

Europe and other countries are abandoning these projects because they are not cost-efficient nor are they sustainable energy.

There is a long list of signed documents by world-renowned scientists explaining the dangers the above-mentioned projects pose to the earth.

This is NOT a "party" issue but is being opposed by voters from both parties.

Look into the revived nuclear industry instead if we want to save the planet. Plant more trees and stop overbuilding ("without the trees, there ain't no breeze!")

Sincerely,  
Bernadette Monari
