Subject: [EXTERNAL] DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN)

Dear Board Secretary Sherri L. Golden,

I am a New Jersey resident and am writing to you on Docket Number QO24020126 to urge you to not support so-called clean energy. Solar and wind are not clean or green. They are both made using toxic materials. Oil is needed to keep the wind turbines running. Solar and wind are both intermittent .. the sun doesn't always shine and the wind doesn't always blow at the speed needed for the turbines to run. Natural gas, coal and oil will still be needed to provide energy when the turbines and solar do not produce energy. So we still be using the same forms of energy, and just adding these unreliable energy forms on top of them. It doesn't make sense.

If you truly care about reducing emissions, you will look at other forms of energy. Solar and wind do not reduce emissions one bit. In fact they may add to emissions.

In addition, the cost of electricity generated using solar and wind is significantly higher than other forms of energy. You will be placing an unnecessary burden on residents, particularly lower income residents.

I urge you to abandon solar and wind and look toward other more reliable and cost-efficient forms of energy that will not damage our oceans and marine life.

Sincerely,  
Elizabeth Raleigh
