Subject: [EXTERNAL] Please DO NOT support clean energy (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN )

Dear Board Secretary Sherri L. Golden,

As a New Jersey resident, I'm writing to you on Docket Number QO24020126 to urge you to REJECT the updated Energy Master Plan that foolishly creates the framework for our state to meet the goal of 100% clean energy by 2035 by providing a certainty for utilities, energy suppliers, and businesses.

Climate change affects everyone regardless of zip code, so I urge you to implement an ALTERNATIVE, REALISTIC, LESS EXPENSIVE AND OCEAN FRIENDLY plan that greatly reduces our emissions in a way that also benefits our communities and improves people's lives. BOEM has stated offshore wind will do very little to reduce carbon omissions! Wake up to the facts and protect our beautiful coast by rejecting offshore wind!

To reach our clean energy goals and reduce emissions, New Jersey must reduce harmful pollution from the transportation sector, decrease emissions from the building sector, maximize energy efficiency, and help residents lower their energy bills. Lower energy bills will not come to fruition through the high costs and maintenance of offshore wind turbines and substations.

Lastly, I urge you to think about New Jersey's most vulnerable communities who may not have access to these clean energy sources in all facets of the plan and who have not been properly informed of the changes offshore wind cables will bring to their communities. In order to make a fair transition to clean energy, all New Jerseyans must have access to affordable clean energy and be well-informed, not blindsided, of anticipated, marine life damaging changes.

Thank you for your time, and I look forward to New Jersey's thorough evaluation and unbiased investigation into a clean energy future that does not sacrifice the ecosystem, the livelihood of commercial fishermen and the shore town communities.

Sincerely,  
Mary Smith
