Subject: [EXTERNAL] I do not support wind turbines!!!

Dear Board Secretary Sherri L. Golden,

As a New Jersey resident I oppose offshore wind. In Atlantic Shores own statements they say wind turbines will have no effect on climate change. A Havard study said that turbines lead to the warming of the ocean and earth. The wind farms will destroy our fishing industry a major supplier of fresh fish and jibs. More whales, dolphins and other sea life will die from sonar mapping, construction, and the constant vibration created by turbines. Plus the large amount of cables ran across the ocean floor will kill shellfish and other bottom dwellers. Destroying the Ocean to save the Earth doesn't make sense.

Sincerely,

Kathleen Harper
