Subject: [EXTERNAL] DO NOT support clean energy (DOCKET NO. QO24020126 – 2024 ENERGY MASTER PLAN)

Dear Board Secretary Sherri L. Golden,

You have profited from years of energy from the NJ residents. And I am asking that you stop playing into the plan to kill our environment with Wind and solar energy!! They are more destructive to our environment and ecosystem than they are helpful.

As a New Jersey resident, I'm writing to you on Docket Number QO24020126 to urge you to ensure that the updated Energy Master Plan creates the framework for our state to meet the goal by providing a certainty for utilities, energy suppliers, and businesses by fixing a much out of date and over patched system. Renew the lines and take out the old and unused lines. Do not make more lines for a system of limited energy. Wind and solar will be limited and NOT beneficial to NJ residents as a whole!!

By saving the trees! Placing new lines where old and outdated lines are. But NOT relying on wind or solar as the source of fake limited energy.

Lastly, I urge you to think about New Jersey's most vulnerable shore communities. They see thousandths of tourists from around the tristate area as well as the world. These wind turbines will change our oceans and the those communities. Tourism will become a thing of the past. Our ocean waters will be littered with rusted turbine parts. It will be filled with fiberglass dust particles that will cause major health issues for swimmers and our sealife. The fiberglass dust will be from the committed need to "clean- file" the blades so they run optimally the dust flies through the air and into the ocean which will make its way near swimming children and adults. The particles will be seen as ptykton to the sealife. Which means our food systems will have fiberglass in them.

The thousands of miles of cable dug into the ocean floor will create a heated floor. Causing the vary same thing it is said to be trying to prevent! Warming oceans and climate change.

Thank you for your time, and I look forward to New Jersey's clean energy future!

Sincerely,

Sue Rang
