**Subject:** [EXTERNAL] Offshore Wind Turbines

Board Secretary:

STOP any forward motion that would approve offshore wind energy from prostituting our oceanic ecosystem. NO turbines, NO more surveying, NO drilling (for gas/oil offshore), NO cables. We must petition our federal government to RESCIND all offshore leases for such projects -- PERIOD!

Once we upset our oceanic ecosystem -- earth's most valuable resource! -- there is no turning it back. If the "powers that be" think global warming is bad? -- They have no idea what the atmospheric repercussions will be if they continue with this debacle under the guise of "green energy." The only "green" being had are for those political oligarchs who have their investments in these projects! Mother Nature will have her revenge!
