Subject: [EXTERNAL] Wind Energy

Dear Secretary:

I am all for wind energy in NJ. I think it's part of the future and we cannot keep going with fossil-fuel. I want to live to see the day where I don't have to close my windows driving up the turnpike near Elizabeth. Or when I lived in Wallington, some days the fumes would make it to my house and I would walk to school smelling them.

I believe in Wind Energy, just please place them as far out as possible. I see signs on LBI about how it would look, and I don't quite know what to believe, but over 10 miles sounds reasonable.

But I would rather see the tops of turbines over the disgusting sites and smells of exhaust and refineries anyday.
