Dear NJ Board Secretary,

I would like to comment on the effects of CC already felt here in Bloomfield. At the base of my street, there is already significant flooding in one offshoot street. We get it, too, but their flooding will have those neighbors moving very soon.

Likewise, the orange color from the Canadian wildfires indicated an effect on my own health for months. Adding to that pollution is the simple extreme heat during the summers now. It affects the mold growth outside. Yet mold that grows outside also grows INSIDE, as well. It has contributed to laying me on the couch for weeks at a time really ill from mold growth.

Please build and enforce Renewable energy sources on a massive scale at this point!

With Many Thanks,
Sincerely,
Susan C. Mullins
